

Radical Islam in the Former Soviet Union Galina M. Yemelianova,2009-12-16 This is the first comprehensive and comparative examination of Islamic radicalisation in the Muslim regions of the former Soviet Union since the end of Communism. Since the 1990s, the ex-Soviet Muslim Volga-Urals, Caucasus and Central Asia have been among the most volatile and dynamic zones of Islamic radicalisation in the Islamic East. Although partially driven by a wider Islamic resurgence which began in the late 1970s in the Middle East, the book argues that radicalisation is a post-Soviet phenomenon triggered by the collapse of Communism, and the break-up of the de facto unitary Soviet empire. The book considers the considerable differences in perceptions and manifestations of radical Islam in the republics, as well as the level of its doctrinal and political impact. It demonstrates how the particular histories of the regions' Muslim peoples - especially the length and depth of their Islamisation - have influenced the nature and scope of their radicalisation. Other significant factors include the mobilising power of the global jihadist network, and most significantly the level of social and economic hardship. Based on extensive empirical research including interviews with leading members of the political and religious elite, the Islamist opposition as well as ordinary muslims, the book reveals how unofficial radical Islam has turned into a potent ideology of social mobilisation. It identifies the different dynamics at work and how these relate to each other, assesses the level of foreign involvement and evaluates the implications of the rise of Islamic radicalism for particular post-Soviet states, post-Soviet Eurasia and the wider international community.

Bauxite Mining in Africa Johannes Knierzinger,2017-09-07 This book deals with the consequences of the inclusion of African states and communities in the global aluminium chain. The so-called "New Scramble for Africa" of the 2000s illustrated how seriously African living conditions are affected by continuous cycles of boom and bust, and how strongly the quality of life currently depends on the investment decisions and corporate social responsibility policies of transnational corporations. Taking the example of the global production network of bauxite and aluminium, the author focuses on the socio-political aspects of this dependency, which he achieves through the conducting of a series of interviews with various involved parties.

Killer Trucks Robert George,2021-01-25 Why did trucking go from the safest to the unsafest overnight? Why did the truckers go from upper middle class to lower middle class? Why did over-the-road drivers go from the knights of the road, to minimum-wage, aggressive bullies? This book explains it all. Plus, it will take you on trips that will teach you how to keep from killing yourself, or some poor four-wheeler. It will explain to you how to become a professional driver like the author who spent sixty years on the road.

The Politics of Security Sector Reform Dr Greg Simons,Dr Magnus Ekengren,2013-03-28 Security Sector Reform (SSR) is increasingly becoming a cornerstone in international security and development cooperation. Indeed, the concept has often been seen as a panacea for many of the biggest threats to the world such as failed states, terrorism and poverty. In particular, this book focuses on the complexities of implementation of SSR across the globe and the actual and potential role for the European Union (EU) to play in SSR. As suggested in the title of the book, this involves not only opportunities, but challenges to be overcome as well. There are three core themes to this book: Policy, Policies and Practice. By presenting the themes in this particular order a greater appreciation of the influences on the process of SSR, from conception to implementation is relayed to the reader. This volume appeals to audiences interested in the EU as a global actor and the interrelationships between foreign, security, defence and development policies.

Presidents, Oligarchs and Bureaucrats Dr Susan Stewart,Mr Hans-Henning Schröder,Ms Andrea Schmitz,Ms Margarete Klein,2013-04-28 Over the last decade the transition paradigm, which is based on the conviction that authoritarian political systems would over time necessarily develop into democracies, has been subjected to serious criticism. The complex political and societal developments in the post-Soviet region in particular have exposed flaws in the claim that a shift from authoritarianism to democracy is inevitable. Using case studies from the post-Soviet region, a broad range of international contributors present an original and innovative contribution to the debate. They explore the character of post-Soviet regimes and review the political transformations they have experienced since the end of the Cold War. Through a combination of theoretical approaches and detailed, empirical analysis the authors highlight the difficulties and benefits of applying the concepts of hybrid regimes, competitive authoritarianism and neopatrimonialism to the countries of the post-Soviet space. Through this in-depth approach the authors demonstrate how Presidents, Oligarchs and Bureaucrats in the region lead their countries, examine the sources of their legitimacy and their relationship to the societies they govern and advance the general theoretical debate on regime change and transition paths.

Labor and Health Economics in the Mediterranean Region: Migration and Mobility of Medical Doctors Driouchi, Ahmed,2013-11-30 The increasing demand for health care and advances in healthcare technologies has exacerbated the present shortage of health personnel. In response to these changes, physicians may choose to offer their services elsewhere. Labor and Health Economics in the Mediterranean Region: Migration and Mobility of Medical Doctors addresses the mobility of physicians in the Mediterranean region within a global context, focusing on the role mobility has played in the global health system in both developed and developing economies. Besides universities and researchers, public and private medical practitioners and agencies can make use of this book to further their knowledge of the changing healthcare industry.

The Religious Heritage Complex Cyril Isnart,Nathalie Cerezales,2020-05-14 The Religious Heritage Complex examines heritage-making of Christian-related legacies led by secular and clerical institutions. It argues that the relationship between public policies and spiritual practices is not as clear-cut as some might think. In fact, the authors show that religious activity has always combined care for the past with conscious practices of heritage-making, which they term “the religious heritage complex.” The book considers the ways patrimony, religion, and identity interact in different Christian contexts worldwide and how religious objects and sites function as identity symbols. It focuses on heritage-making as a religious and material activity for the groups in charge of a sacred inheritance and considers heritage activities as one of the forms of spiritual renewal and transmission. Case studies explore various Christian traditions located in Europe, the Americas, and Africa, investigating the longstanding and tightly-enmeshed connections that weave together religion and cultural heritage. Through comparing ecclesiastical and civil heritage institutions, this book allows us to consider the ambiguity of religious heritage.

In Pursuit of Prosperity David Reed,2014-10-03 In Pursuit of Prosperity provides a much needed exploration of the evolution of environmental sustainability in U.S. foreign policy. Through expert analysis of nine countries and regions of strategic importance, David Reed and his stellar team of experts in foreign policy and environmental affairs identify emerging threats to the prosperity and national security of the United States. They assert that U.S. foreign policy must shift away from its 100-year-old focus on obtaining energy and mineral inputs for the industrial economy. In the new millennium, U.S. foreign policy must be geared toward ensuring the prosperity of the country’s trading and political partners around the globe. To the degree that our partners’ economies and social stability are threatened by the natural resource scarcities and environmental change unfolding within their borders and in neighboring countries, threats to U.S. prosperity and national security increase proportionately. Directed to U.S. foreign policy makers, the intelligence and security communities, and influential think tanks and research organizations, the book proposes specific recommendations the U.S. government should embrace to respond to the disruption of global supply chains, social instability in partner countries, disruptive impacts on regional relations, and expansion of illegal trade and criminal networks. This unique focus establishes In Pursuit of Prosperity as a seminal work in understanding the challenges facing the United States in this period of global environmental change.

Überschüssiges Gewebe Anna-Katharina Meßmer,2017-03-20 „Make it clean, sleek and gentle.“ So lässt sich die zentrale Botschaft der Websites von Intimchirurgen und -chirurginnen zusammenfassen. Dieser Imperativ betrifft nicht nur die Medikalisierung von Ästhetik, die Frauenkörper erneut zum Gegenstand medizinischer Bearbeitung macht. Die Ästhetik des Glatten formt auch die gegenwärtig beobachtbare Ästhetisierung der Medizin – sei es auf Websites, Arztbewertungsportalen oder Stockfotografien. Die vorliegende Arbeit zeichnet die visuellen wie sprachlichen Plausibilisierungen von Intimchirurgie nach und setzt sich dabei mit den grundsätzlichen Fragen des Verhältnisses von Körper, Gesellschaft und Geschlecht auseinander. In einer innovativen empirischen Analyse von Websites als multimodalen Daten arbeitet die Autorin heraus, wie digitale Ästhetiken der Funktionalität medizinische Praktiken und Geschlechtskörper prägen.
