*Ahkabal-Ná 2100. Third Part* Pablo Hernández Encino, 2012-08-16 Finally, the cavalier Shanhuinic, the serpent, has been freed from the dangerous hand of the man. He put his life at risk for centuries. How many times has he escaped death, the slashing of machete and the hitting he received for trying to cross the roads in his serpent form, carrying at his back the heavy treasure chest. But thanks to Nicols, though with his dull mind, he was able to help and save the serpent from the final slashing of machete. More than a recognition, Shanhuinic considers it as a profound gratitude on his part. Tatic Mamal decided to offer the treasure box to Nicols. Hes worthy for this fortune because of his bravery and patience. It now depends on him if he will flourish his wealth or allow it to vanish. He also has the witchs rings. May everything go well.

Mechanical Working of Metals John Noel Harris,2014-05-20 Mechanical Working of Metals: Theory and Practice provides a comprehensive examination of the stress–strain relationships involved in the principal methods of shaping materials by mechanical working. This book discusses the various processing equipment and its application. Organized into seven chapters, this book begins with an overview of the metals utilized on a substantial scale for construction and engineering purposes. This text then examines the behavior of metal under compressive stress, which can be seen from an analysis of what happens when a cylindrical sample is compressed between two platens. Other chapters consider the effect of mechanical work on the structure and macro-properties of metals. This book discusses as well the classification of the processes used for mechanical working. The final chapter deals with the techniques of manufacturing tin cans, which are ideal packaging for food and beverages. This book is a valuable resource for mechanical engineers and metallurgists.
