Printing Landmarks Robert Goree,2022-03-07
Printing Landmarks tells the story of the late Tokugawa period's most distinctive form of popular geography: meisho zue. Beginning with the publication of Miyako meisho zue in 1780, these monumental books deployed lovingly detailed illustrations and informative prose to showcase famous places (meisho) in ways that transcended the limited scope, quality, and reliability of earlier guidebooks and gazetteers. Putting into spellbinding print countless landmarks of cultural significance, the makers of meisho zue created an opportunity for readers to experience places located all over the Japanese archipelago. In this groundbreaking multidisciplinary study, Robert Goree draws on diverse archival and scholarly sources to explore why meisho zue enjoyed widespread and enduring popularity. Examining their readership, compilation practices, illustration techniques, cartographic properties, ideological import, and production

networks, Goree finds that the appeal of the books, far from accidental, resulted from specific choices editors and illustrators made about form, content, and process. Spanning the fields of book history, travel literature, map history, and visual culture, *Printing Landmarks* provides a new perspective on Tokugawa-period culture by showing how *meisho zue* depicted inspiring geographies in which social harmony, economic prosperity, and natural stability made for a peaceful polity.

Emulsions and Nanosuspensions for the Formulation of Poorly Soluble Drugs Rainer H. Müller, Simon Benita, Bernhard H. L. Böhm, 1998 Explore possible new approaches for overcoming poorly soluble drugs - a challenge to drug formulation work and an increasing problem. Many newly developed drugs are poorly soluble, very often simultaneously in aqueous and in organic media. *Emulsions and Nanosuspensions for the Formulation of Poorly Soluble Drugs* aims to: review the possibilities, limitations and future perspectives of emulsions as drug carriers considering technology from other than the pharmaceutical industry (i.e food industry). show the production technology of nanosuspensions, explain the special dissolution properties (i.e. increased saturation solubility) and increased dissolution velocity (theory), and cover the possible applications. present the theory of high pressure homogenization and high pressure extrusion in dispersion techniques, including examples of applications and size measurements in concentrated dispersions.

Global Companies, Local Innovations Yasuyuki

Motoyama,2016-04-22 Investigating the innovation activities of multinational corporations, this book uncovers and examines why the geography of innovation by multinationals is overwhelmingly local, in spite of their global operations in manufacturing and sales through case studies of produce development by three global players: Toyota, Sony, and Canon. The microdynamic approach of the book allows an in-depth investigation of the engineering and technical aspects of innovation making. The book unfolds the complex and constant process of trial

and error in innovation and reveals three fundamental natures of innovation making: complexity, interdisciplinarity, and prototyping and testing. In order to manage these three natures of innovation, firms have to plan, ironically, for unplanned situations and to collocate knowledge, people, and resources.

□□□□□□1912-1990 Manfred Heiting,Duncan Forbes,2017 This book illustrates the development of photography as seen in photo publications in Japan--from the time of influence by European and American pictorialism, the German Bauhaus and Imperial military propaganda, to the complete collapse and destruction of the country in 1945. Then followed a new beginning: with the unique self-determination of a young generation of photographers and visual artists highlighted by the Provoke style as well as protest and war documentation of the late 1950s to the early '70s, the signature Japanese photobook, as we have come to know it, was born. With detailed information and illustrations of over 500 photo publications, an introduction by Kaneko Ryuichi and essays by Fujimura Satomi, Duncan Forbes, Manfred Heiting, Mitsuda Yuri, Iizawa Kotaro, Shirayama Mari and Takeba Joe, this is the first extensive Englishlanguage survey of Japanese photobooks of this period.
