Pepouza and Tymion William Tabbernee,Peter Lampe,2008-09-25 This book tells the exciting story of the discovery in July 2000 of Pepouza, the most Holy City in the theology of Montanism, a prophetic sect of early Christianity, and an imperial estate on which Tymion was located. The

discovery culminates three years of careful study and preliminary field work preceded by a further thirty years of Montanist research by William Tabbernee who led the discovery. This book also details the archaeological surface survey campaigns conducted from 2001 to 2004 at the sites. These campaigns, directed by original “team”-member Peter Lampe, have already revealed a great deal of specific information concerning the ancient site of Pepouza and the imperial estate around Tymion.

Introduction to Plastics Engineering Vijay K. Stokes, 2020-04-02 The authoritative introduction to all aspects of plastics engineering — offering both academic and industry perspectives in one complete volume. Introduction to Plastics Engineering provides a self-contained introduction to plastics engineering. A unique synergistic approach explores all aspects of material use — concepts, mechanics, materials, part design, part fabrication, and assembly — required for converting plastic materials, mainly in the form of small pellets, into useful products. Thermoplastics, thermosets, elastomers, and advanced composites, the four disparate application areas of polymers normally treated as separate subjects, are covered together. Divided into five parts — Concepts, Mechanics, Materials, Part Processing and Assembly, and Material Systems — this inclusive volume enables readers to gain a well-rounded, foundational knowledge of plastics engineering. Chapters cover topics including the structure of polymers, how concepts from polymer physics explain the macro behavior of plastics, evolving concepts for plastics use, simple mechanics principles and their role in plastics engineering, models for the behavior of solids and fluids, and the mechanisms underlying the stiffening of plastics by embedded fibers. Drawing from his over fifty years in both academia and industry, Author Vijay Stokes uses the synergy between fundamentals and applications to provide a more meaningful introduction to plastics. Examines every facet of plastics engineering from materials and fabrication methods to advanced composites Provides accurate, up-to-date information for

students and engineers both new to plastics and highly experienced with them Offers a practical guide to large number of materials and their applications Addresses current issues for mechanical design, part performance, and part fabrication Introduction to Plastics Engineering is an ideal text for practicing engineers, researchers, and students in mechanical and plastics engineering and related industries.

Public Health, Mental Health, and Mass Atrocity Prevention Jocelyn Getgen Kestenbaum,Caitlin O. Mahoney,Amy E. Meade,Arlan F. Fuller,2021-07-29 This multidisciplinary volume considers the role of both public health and mental health policies and practices in the prevention of mass atrocity, including war crimes, crimes against humanity, and genocide. The authors address atrocity prevention through the framework of primary (pre-conflict), secondary (mid-conflict), and tertiary (post-conflict) settings. They examine the ways in which public health and mental health scholars and practitioners currently orient their research and interventions and the ways in which we can adapt frameworks, methods, tools, and practice toward a more sophisticated and truly interdisciplinary understanding and application of atrocity prevention. The book brings together diverse fields of study by global north and global south authors in diverse contexts. It culminates in a narrative that demonstrates the state of the current fields on intersecting themes within public health, mental health, and mass atrocity prevention and the future potential directions in which these intersections could go. Such discussions will serve to influence both policy makers and practitioners in these fields toward developing, adapting, and testing frames and tools for atrocity prevention. Multidisciplinary perspectives are represented among editors and authors, including law, political science, international

studies, public health, mental health, philosophy, clinical psychology, social psychology, history, and peace studies.
