In the Seasons of Blooming Night Jasmine Tanuj Handique,2018-08-21 Ankur is one of them who'd grab any chances to travel the time by a time machine, at any cost to change his past, if it was possible. He's a permanent resident of Assam, currently employed in one of the leading third party telecom dealers in Delhi, and he knows how hard is it to stay apart from the ones he's loved the most, as well as the places that he'd always known; especially when they are far enough to be together again. He could never learn to not keep thinking about his wife and four years old daughter. He goes on a trip to the mountains of Northern India with his close ones. There he witnesses the colorful and most spectacular sceneries of nature with them, celebrates the moments of joy with them; but still he remains tied up with the memories of his long gone past, those keep pushing him back to his ruined past all the time. He faces a series of misfortunes, which include fight with a stranger, an attempt to a murder, even let him witness a murder; but fortune awaits for him too, that comes with a prize which he'd always wished for.

Diwali in Muzaffarnagar Tanuj Solanki,2018-01-25 Winner of the 2019 Sahitya Akademi Yuva Puraskar Award Muzaffarnagar, the infamous north Indian town that's a byword for unrest, and where skirmishes are prone to break out ever so often. This is a place where teenage love and friendships are tested by the violence that threatens to spill out at the slightest provocation. A town that always pulls you back into its ways, no matter how cosmopolitan the city has made you. In *Diwali in Muzaffarnagar* - Tanuj Solanki's new book of short stories after *Neon Noon* - young men and women straddle the past and the present, the metropolis and the small town, and also the parallel needs of life: solitude and family. Advance Praise for *Diwali in Muzaffarnagar* Intimacy and inevitable grief collide often in these haunting stories of kinship and frayed ties. Solanki writes with great sensitivity about women and men who circle around their roles in families and society, seeking identities that free them from the past, even as its hold on them remains insoluble. These are stories that ache with love, and brave the knowledge that only rarely does love transcend its attendant pain. -Sharanya Manivannan Solanki not only surprises me with his craft and voice but also revives my interest in short stories. His observations are precise, his language lyrical and his style extremely pleasing. *Diwali in Muzaffarnagar* is not just another collection of well-written stories. It is a reminder that we have a goldmine of tales from which gifted writers like Solanki can bring us dazzling pieces. - Anees Salim Solanki gradually opens a door into a fascinating world, putting to the sword patronizing myths about small-town India. - Prayaag Akbar Solanki's stories are brilliantly nuanced, that quintessential mofussil north Indian town - Muzaffarnagar, in this case - reflected in them with all its intimacy and prejudices. The small town is never romanticized, though, and there is an admirable matter-of-fact quality to how the stories progress and end. - Hansda Sowvendra Shekhar

Innovation Stories from India Inc Vijay Menon,2017-08-17 Beyond jugaad, that great Indian tradition of short-term fixes, what does innovation mean in Indian business? That is the question this book addresses through a collection of stand-alone stories that describe sustained innovation at a cross-section of companies that include conglomerates, MNCs, large and mid-sized companies, and start-ups. Based on extensive research and one-to-one conversations, what sets this book apart are first-person accounts by some of India's finest business leaders on the innovation journey in their companies. Filled with anecdotes and real-life examples, the book would be of interest to anyone interested in Indian business. It would also be an ideal gift to showcase India to customers, trade delegations, investors, and other stakeholders. The Organizations and Stalwarts Featured are Conglomerates: Ratan Tata, Adi Godrej, Suresh Krishna (TVS) MNCs: Munesh Makhija (GE India Technology Center), Suresh Narayanan (Nestle India), Dilip Khandelwal (SAP Labs India) Large companies: A M Naik (L&T), Aditya Puri (HDFC Bank), N R Narayanamurthy (Infosys), K B S Anand (Asian Paints), G V Prasad (Dr Reddy's Laboratories), Bhaskar Bhat (Titan) Mid-sized companies: Harsh Mariwala (Marico), Kiran Mazumdar-Shaw (Biocon), P R S 'Biki' Oberoi (Oberoi Hotels), Meraj Manal (Himalaya), Dr Devi Shetty (Narayana Health), William Bissell (Fabindia), Kiran Khalap (chlorophyll) Startups: Vijay Shekhar Sharma (Paytm), Raghav Bahl (Quintillion Media), Team Indus

Government-Sponsored Health Insurance in India Gerard La Forgia, Somil Nagpal,2012-09-14 This book presents the first comprehensive review of all major government-supported health insurance schemes in India and their potential for contributing to the achievement of universal coverage in India are discussed.

Atrial Fibrillation and Percutaneous Coronary Intervention Andrea Rubboli, Gregory Y. H. Lip,2016-11-30 This book considers paradigmatic clinical cases in order to cast light on key issues relating to elective or emergency stent implantation and the use of oral anticoagulation (OAC) in patients with atrial fibrillation. The topics addressed include the optimal periprocedural antithrombotic treatment (uninterrupted vs interrupted OAC, intraprocedural use of heparin and glycoprotein IIb/IIIa inhibitors, etc.), the most appropriate type of stent (bare metal vs drug eluting vs "bioactive"), the optimal regimen (e.g., triple therapy of OAC, aspirin, and clopidogrel vs the combination of OAC and a single antiplatelet agent), and the most suitable duration of the antithrombotic treatment prescribed at discharge (1 vs 6–12 months). The case-based management recommendations will be of wide practical value in the current health care context, where percutaneous coronary intervention is available even to patients with relevant co-morbidities, such as those warranting long-term OAC, and the indications for OAC are much broader than in the past. The book will appeal especially to clinical and interventional cardiologists, internal medicine specialists, hematologists, and family physicians and will also be of interest to cardiology and internal medicine residents and fellows.

Handbook of International Insurance J. David Cummins, Bertrand Venard,2007-12-23 *Handbook of International Insurance: Between Global Dynamics and Local Contingencies* analyzes key trends in the insurance industry in more than 15 important national insurance markets that represent over 90 percent of world insurance premiums. Well-known academics from Europe, the Americas and Asia examine their own national insurance markets, including the competitive structure, product and service innovations, and regulatory developments. The book provides academics and executives with an unprecedented range of information about today's insurance markets. This book also provides important 'new' information on the evolution of the financial sector worldwide and comprehensive chapters on reinsurance, Lloyd's of London, alternative risk transfer, South and East Asian insurance markets, and European insurance markets. Setting the stage is an overview chapter by the editors focusing on overall conclusions on globalization.

Biocompatible Glasses Juliana Marchi,2016-11-30 This book focuses on the applications of bioglasses in the biomedical field. It starts with the history and evolution of bioglasses before moving on to the structure and percolation theory, and lastly investigating their current and potential future applications in various fields including dentistry, tissue engineering, bone regeneration, ophthalmology, and drug delivery. The chapters were written by a team of international experts in the field and will be of great interest not only to material scientists, but also to medical doctors and other health sector professionals.

Molecular Dynamics Simulations of Disordered Materials Carlo Massobrio, Jincheng Du, Marco Bernasconi, Philip S. Salmon,2015-04-22 This book is a unique reference work in the area of atomic-scale simulation of glasses. For the first time, a highly selected panel of about 20 researchers provides, in a single book, their views, methodologies and applications on the use of molecular dynamics as a tool to describe glassy materials. The book covers a wide range of systems covering traditional network glasses, such as chalcogenides and oxides, as well as glasses for applications in the area of phase change materials. The novelty of this work is the interplay between molecular dynamics methods (both at the classical and first-principles level) and the structure of materials for which, quite often, direct experimental structural information is rather scarce or absent. The book features specific examples of how quite subtle features of the structure of

glasses can be unraveled by relying on the predictive power of molecular dynamics, used in connection with a realistic description of forces.

Atkins Diabetes Revolution Robert C. Atkins,Mary C. Vernon,Jacqueline A. Eberstein,2009-03-17 More than a program for living with diabetes, here is a groundbreaking approach to preventing, treating, and even reversing an American epidemic, based on the science of the doctor who invented the low-carb lifestyle and wrote the #1 New York Times bestseller Dr. Atkins’ New Diet Revolution featuring the Atkins Nutritional Approach™— a celebrity-favorite diet perfect for losing weight before your wedding or to bounce back into shape post-baby, or if you just want to look and feel your best. The statistics are staggering. Thirteen million Americans have been diagnosed with Type 2 diabetes; another 5.2 million don't know that they have it. During the past thirty years the diabetes rate has tripled, and each year about 200,000 people die from complications of the disease. The Centers for Disease Control project that one out of every three children born in the year 2000 will develop the disease. But Type 2 diabetes is largely preventable. Find out how you can avoid becoming a statistic. As a respected physician and pioneer in the field of complementary medicine, Dr. Robert C. Atkins recognized early on that diabetes and obesity are twin epidemics, and that the way to reverse both is to permanently change the way people eat. Yet much of the mainstream medical establishment continues to advocate the treatment of diabetes with insulin and other drugs, while recommending a diet high in carbohydrates including sugar, which raises your blood sugar. What you'll learn from reading Atkins Diabetes Revolution is that rather than correcting your metabolism, such a diet can actually increase your risk of developing diabetes—and heart disease. The Atkins Blood Sugar Control Program (ABSCP) helps you identify the metabolic signposts that indicate trouble long before the onset of Type 2 diabetes so you can stop it in its tracks. If you already have the disease, the ABSCP offers you and your physician a strategy for weight management and blood-sugar control, while minimizing your exposure to drugs. Atkins Diabetes Revolution presents a comprehensive lifestyle program, including diet, exercise, and nutrient supplementation. The book also contains meal plans, recipes, a fitness routine, and case studies. This revolutionary book, a fitting tribute to Dr. Atkins, tackles one of the greatest health challenges you and your family may ever face.

Glasses and Glass-Ceramics M.H. Lewis,2013-04-17 The emergence of synthetic ceramics as a prominent class of materials with a unique combination of properties has been an important part of the materials-science scene over the past 20 years. These 'high-technology' ceramics have varied applications in areas utilizing their exceptional mechanical, thermal, optical, magnetic or electronic properties. A notable development of the 1970s was that of 'Si-based' ceramics (Si3N4' SiC and 'Sialons') as high-temperature engineering solids. More recently the zirconia-based ceramics have evolved as a class of material with significant improvements in fracture-toughness. In the 1980s we are on the threshold of development of ceramic-matrix composites with the promise of over coming major limitations in engineering design with 'brittle' ceramics and the development of novel properties unattainable with monolithic micro structures. Throughout this period there have been significant but less well-publicized developments in the field of glass-ceramics and glasses. It is the purpose of this publication to review selected topics within this important area of materials science. A key element in understanding the relation between properties and microstructure is a knowledge of atomic arrangement in ceramic phases. Recent developments in NMR and X-ray absorption spectroscopies have had considerable impact on studies of atomic co-ordination in glasses and crystalline ceramic materials and are reviewed in Chapters 1 and 2. Glass-ceramics are derived from the parent glasses by controlled crystal lization and have properties dictated, in part, by the efficiency of crystal nucleation within the glass volume.

Ghalib Danger Neeraj Pandey,2013-12-15 Kamran Khan is a cocky young taxi driver trying to make it big in Mumbai. But his life transforms when he saves a don called Mirza from being killed. What seems like a good deed however has a cruel payback and in a single moment, Kamran loses everything dear to him. This is when Mirza, in gratitude, takes Kamran under his wing and the young man gets drawn into the mafia boss’s dangerous world of cops and rival gangsters, eventually taking over from him. Kamran also inherits Mirza’s philosophy that all of life’s problems can be solved through Ghalib’s poetry. Soon, the innocent taxi driver has cops, criminals and even cabinet ministers at his beck and call. And he has a new name—Ghalib Danger.
