Startup Myths and Models Rizwan Virk, 2020-06-02 Budding entrepreneurs face a challenging road. The path is not made any easier by all the clichés they hear about how to make a startup succeed—from platitudes and conventional wisdom to downright contradictions. This witty and wise guide to the dilemmas of entrepreneurship debunks widespread misconceptions about how the world of startups works and offers hard-earned advice for every step of the journey. Instead of startup myths—legends spun from a fantasy version of Silicon Valley—Rizwan Virk provides startup models—frameworks that help make thoughtful decisions about starting, growing, managing, and selling a business. Rather than dispensing simplistic rules, he mentors readers in the development of a mental toolkit for approaching challenges based on how startup markets evolve in real life. In snappy prose with savvy pop-culture and real-world examples, Virk recasts entrepreneurship as a grand adventure. He points out the pitfalls that appear along the way and offers insights into how to avoid them, sharing the secrets of founding a startup, raising money, hiring and firing, when to enter a market and when to exit, and how to value a company. Virk combines lessons learned the hard way during his twenty-five years of founding, investing in, and advising startups with reflections from well-known venture capitalists and experts. His candid advice makes *Startup Myths and Models* an ideal guide for those readers just embarking on the startup life and those looking for their next adventure.

In *Treasure Hunt*, Virk reveals how you can tune into the messages that are all around us. These messages—which take the form of synchronicity, hunches, gut feelings, visions, experiences of déjà vu, bodily sensations, and more—are like clues in our own personal “Treasure Hunt”. Whether these clues come from our “inner mentor”, our “future selves”, or our spiritual guides, they can help us to uncover our hidden “Treasure Map”, which shows us the work we were meant to do in this life and how to get there. Virk also introduces the “Clue Lifecycle” and how using it can provide concrete guidance in our personal lives, jobs, career decisions, and investments. Lost in a Good Game Pete Etchells, 2019-04-04 'Etchells writes eloquently ... A heartfelt defence of a demonised pastime' The Times 'Once in an age, a piece of culture comes along that feels like it was specifically created for you, the beats and words and ideas are there because it is your life the creator is describing. Lost In A Good Game is exactly that. It will touch your heart and mind. And even if Bowser, Chun-li or Q-Bert weren't crucial parts of your youth, this is a flawless victory for everyone' Adam Rutherford When Pete Etchells was 14, his father died from motor neurone disease. In order to cope, he immersed himself in a virtual world - first as an escape,

but later to try to understand what had happened. Etchells is now a researcher into the psychological effects of video games, and was co-author on a recent paper explaining why WHO plans to classify 'game addiction' as a danger to public health are based on bad science and (he thinks) are a bad idea. In this, his first book, he journeys through the history and development of video games - from Turing's chess machine to mass multiplayer online games like World of Warcraft- via scientific study, to investigate the highs and lows of playing and get to the bottom of our relationship with games - why we do it, and what they really mean to us. At the same time, *Lost in a Good Game* is a very unusual memoir of a writer coming to terms with his grief via virtual worlds, as he tries to work out what area of popular culture we should classify games (a relatively new technology) under.
