**Indian Multinationals in the World Economy** Jaya Prakash Pradhan, 2008 Indian multinationals have been active in the world economy since early 1960s. However, their number and scale of operation have grown significantly in the last fifteen years or so. In the face of increasing global competition unleashed by extensive liberalization measures, Indian firms have adopted the strategy of outward foreign direct investment (OFDI) as an integral part of their business strategies. By undertaking greenfield OFDI and brownfield OFDI for acquiring foreign companies, Indian firms are enhancing their potential for growth and global competitiveness. Consequently India has emerged as a major developing source country of FDI and Indian multinationals are likely to affect world development in several ways. The book analyses the phenomenon of Indian multinationals from both macro level factors and firm-level corporate strategies and examines its implications for India and host countries. A detailed investigation of Indian overseas investment flows and stocks from sectoral, regional, ownership and motivational perspectives provides a rigorous long-run coverage of Indian multinational firms from 1970s onwards. The role of innovation, entrepreneurial skills, scale of business, productivity, and the role of government policies, received critical attention in explaining the emergence of Indian multinationals. The comprehensive quantitative and case studies approach offers valuable insights into the behaviour and impacts of these new global actors on home and host countries. This book offers a number of lessons to home country, host countries, and Indian enterprises becoming multinationals. With the growing global interest from policy makers, business practitioners, researchers, and students in Indian multinationals, this book would serve as an important and timely reading for all of them.

Plunkett's Engineering & Research Industry Almanac 2008 Jack

W. Plunkett,2008-05 A guide to the trends and leading companies in the engineering, research, design, innovation and development business fields: those firms that are dominant in engineering-based design and development, as well leaders in technology-based research and development.

**TCS Story ... and Beyond** A. Ramadorai,2013-02-12 In 2003, Tata Consultancy Services set itself a mission: 'Top Ten by 2010'. In 2009, a year ahead of schedule, TCS made good on that promise: in fourteen years, the company had transformed itself from the \$155 million operation that S.Ramadorai inherited as CEO in 1996. Today it is one of the world's largest IT software and services companies with more than 2,40,000 people working in forty-two countries, and annual revenues of over \$10 billion. The TCS story is one of modern India's great success stories. In this fascinating book, S. Ramadorai, one of the country's most respected business leaders, recounts the steps to that extraordinary success, and outlines a vision for the future where the quality initiatives he undertook can be applied to a larger national framework.
