The Esc Textbook of Heart Failure Petar Seferovic,Andrew Coats,Gerasimos Filippatos,Johann Bauersachs,Giuseppe Rosano,2024-02-09 The ESC Textbook of Heart Failure is the latest addition to the European Society of Cardiology (ESC) publications portfolio and is fully supported by the European Heart Failure Association. The textbook brings together internationally renowned experts in the field of heart failure to present an up-to-date understanding of all aspects of this chronic condition that worsens with time. It is estimated that the worldwide population of patients suffering from heart failure is approximately 26 million. This clinically oriented work reflects contemporary European guidelines from the ESC and the European Heart Failure Association and summarizes the latest evidence from clinical trials. Made up of eighteen different sections the textbook covers the epidemiology, etiology, prevention, pathophysiology, and clinical phenotypes of heart failure. The assessment and management of chronic, acute, and advance heart failure are all discussed in detail. As well as chapters dedicated to self-care and patient education, the multidisciplinary approach to heart failure management, and clinical trial design and interpretation. The future direction of the field is discussed throughout with separate chapters on digital health, big data, and telemedicine/remote monitoring in heart failure also included. A must read for cardiovascular healthcare specialists in Europe and across the world it should also appeal to those in training, general physicians and those caring of the elderly, cardiothoracic surgeons, primary care doctors, and specialist nurses too.

Redemption: Saving Our Town Erica Brown,Ge'Khiya Brown,2016-09-15 Our Inspiration: This story was inspired by my daughter and her very vivid imagination. All of the illustrations are her original drawings. As in the book Charlottes Web, this story also features several savvy characters that form camaraderie to save the lives of their friends. Among these is twelve-year-old Crazi Boui Palmer (aka CB) who is very determined to free his town from an evil spell. Actually, the overall plot of the story is similar to the all-time favorite cartoon, Super Friends, in that no matter how evil the villain, the FRIENDS always unite and conquer. It is action-packed from beginning to end! Its a great read for all ages! About the book: Redemption: Saving Our Town is set as a riveting, modern-day chain of events. Its tone highlights the existence of stolen morality. If he is going to reverse the curse of illogical mindsets among his fellow townspeople, then CB Palmer needs to cleverly evolve a plan, immediately! A plan to correct warped ways of thinking, that is. You see, CB, along with a few other townspeople, managed to escape the mind-altering, invisible gas invented by Mr. Smoke Choo (the evil Chemist). With grave perseverance CB, Officer Man Mouse (the town cop), and Call~a~doo~dee~Girl (a special friend) lead the others in a daring escapade! The intent is to counteract Mr. Choos wicked scheme to corrupt their thought patterns and violate their life-standards. First, Officer Mouse discovers something extremely interesting. Then, he calls for a secret meeting. Sure enough, after sharing details from his investigation, they manage to unfold Mr. Choos conspiracy. Unknowingly, their source of rescue just happens to be something they all have in common: Eggs!!! Let the brainstorming begin, stated CB. Get your copy, sit back, relax, and allow your imagination to flourish! Buy it today!!

Applications of Multi-Agent Systems John Perram,1996-04-24 This book constitutes the refereed proceedings of the 6th European Workshop on Modelling Autonomous Agents in a Multi-Agent World, MAAMAW '94, held in Odense, Denmark, in August 1994. The 15 revised full papers included in the book were carefully selected from the workshop contributions; they address various current aspects of multi-agent systems, with a certain focus on applicational aspects. In addition, there is an invited paper Agents: towards a society in which humans and computers cohabitate by Mario Tokoro.
