Contributions to Quantitative Linguistics Reinhard Köhler,Burghard B.

Rieger,2012-12-06 QUALICO has been held for the first time as an international conference to demonstrate the state of the art in quantitative linguistics. This domain of language study and research is gaining considerable interest due to recent advances in linguistic modelling, particularly in computational linguistics, cognitive science, and developments in mathematics like modern systems theory. Progress in hardware and software technology, together with ease of access to data and numerical processing, has provided new means of empirical data acquisition and the application of mathematical models of adequate complexity. This volume contains the papers read at QUALICO 91, and provides a representative overview of the state of the art in quantitative linguistic research.

Noah Viggo P. Hansen,2010 Every sailor and wanna-be sailor, whether they know it or not, is in direct contact with a personal god or gods - however many there may be. What we sailors fail to appreciate is that the gods are constantly trying to get in touch with us, but we ignore their messages since we are either too busy sailing or drinking beer. Keep this thought firmly in mind next time you untie your dock lines

Ararat Frank Westerman,2008-12-02 Mount Ararat in Turkey is where, as biblical tradition has it, Noah's Ark ran aground and God made his covenant with mankind. Now it stands astride the fault-line between religion and science, a geographical, political and cultural crossroads, bound up with the centuries-old history of warfare between different cultures in this region. Frank Westerman takes a pilgrimage from the mountain's foot to its highest slopes, meeting along the way geologists, priests and an expedition in search of the Ark's remains, as well as a Russian astronaut who observes that 'there is something between heaven and earth about which we humans know nothing'. Ararat is a dazzling, highly personal book about science, religion and all that lies between, by one of Europe's most celebrated young writers.

Summary & Study Guide - Homo Deus Lee Tang,2018-07-01 What Does the Future Hold for Humans? This book is a summary of 'Homo Deus: A Brief History of Tomorrow', by Yuval Noah Harari. For most of history, humans were preoccupied with three problems: famine, plagues, and war. As we enter the 21st century, we realize these problems are no longer uncontrollable. They have become manageable challenges. We know what we must do to reduce mortality from starvation, disease, and violence. The human agenda for the next few decades is immortality, happiness, and divinity. We will upgrade humans into gods and turn Homo sapiens into Homo deus. Homo Deus explores the projects, dreams, and nightmares that will shape the 21st century. It takes a deeper look at the relationship between Homo sapiens and other animals, trying to comprehend what makes our species so special. It explains how Homo sapiens come to believe in the humanist creed. Based on the deeper understanding of humankind and of the humanist creed, it describes our current predicament and our futures. Homo Deus is the next stage of evolution. This guide includes: * Book Summary—helps you understand the key concepts. * Online Videos—cover the concepts in more depth. Value-added from this guide: * Save time * Understand key concepts * Expand your knowledge

Storm on the Horizon Sylvia McKelvey,2019-08-19 Is there a covert plan for humanity? Are we on the brink of discovery? Every day huge cumbersome radio telescopes around the world scan the farthest regions of space; listening, probing, waiting. Waiting for that one tone, that one ring, that one sound, that would set the world ablaze with unbridled

excitement never before seen on this planet. We will have made contact with Extraterrestrials! Some say they are already here. Some say they have already made contact. Some say they have a plan. Is there a Mastermind behind them? Could Extraterrestrials be part of the largest deception ever to take place on this Earth? Some theorist say yes, and this may be how they do it.

Larger than Life Katerina Couroucli-Robertson, Ian Robertson, Katerina Robertson, 2018-03-26 *Larger than Life* is aimed at anyone interested in obesity and its treatment. It follows a dramatherapy group attended by six women, all struggling with their weight, using vignettes, transcriptions of the sessions attended, and commentary on the progress made by the participants. A final interview concludes each of the women's therapy, where they talk about their experiences within the group, followed by the therapist's summation of their treatment. The book concludes with brief telephone conversations with all six women three years after their treatment ended, giving a clear picture of the value of dramatherapy to the individual. As well as looking at these specific case studies, the authors also discuss the causes and effects of obesity, the dramatherapy group process, and why dramatherapy is an effective means of treating eating disorders. This is a must-read book for anyone interested in the subject of obesity or dramatherapy.

Psychoanalysis of Technoscience Hub Zwart, 2019-02-20 This book presents a psychoanalysis of technoscience. Basic concepts and methods developed by Freud, Jung, Bachelard and Lacan are applied to case histories (palaeoanthropology, classical conditioning, virology). Rather than by disinterested curiosity, technoscience is driven by desire, resistance and the will to control. Moreover, psychoanalysis focusses on primal scenes (Dubois' quest for the missing link, Pavlov's discovery of the conditioned reflex) and opts for triangulation: comparing technoscience to different scenes provided by novels, so that Dubois's work is compared to missing link novels by Verne and London and Pavlov's experiments with Skinner's Walden Two, while virology is studied through the lens of viral

fiction.
