*The Way of the VC* Ying Tan, 2012-11-28 Venture Capital funds are the fastest growing sector of the financial industry, and possibly the least understood. In this book, the author provides a primer on what some of the world's best venture capitalists have in common. How do the world's top venture capitalists consistently obtain supernormal returns? How do they add value to entrepreneurs they have backed? Why is a top venture capitalist like a skilled chef? How did Lip Bu Tan, when he was Chairman of Walden, manage to invest in Creative Technology, despite the CEO's aversion for VCs? How did Nam Ho, Founder and Managing Partner of Altos Venture, turn an introduction by a Stanford Business School professor into a venture capital firm managing a quarter billion dollars of capital? How does Bing Gordon, Partner at Kleiner Perkins Caufield & Byers and author of the business plan that resulted in KPCB's investment in Electronic Arts, time exits properly? Why did Soo Boon Koh, Managing Director of IGlobe Ventures, back a GPS company which was filing for Chapter 11, in the post-9-11 market? *The Way of the VC: Having Top Venture Capitalists on Your Board* is essential reading for venture capital practitioners, including partners, principals, analysts, consultants and limited partners-- both institutional and private. It is also useful to students of finance who want a better understanding of what goes on in the venture capital world.

Routledge Handbook of Internet Politics Philip N. Howard, 2010 The politics of the internet has entered the social science mainstream. From debates about its impact on parties and election campaigns following momentous presidential contests in the United States, to concerns over

international security, privacy and surveillance in the post-9/11, post-7/7 environment; from the rise of blogging as a threat to the traditional model of journalism, to controversies at the international level over how and if the internet should be governed by an entity such as the United Nations; from the new repertoires of collective action open to citizens, to the massive programs of public management reform taking place in the name of e-government, internet politics and policy are continually in the headlines. The Routledge Handbook of Internet Politics is a collection of over thirty chapters dealing with the most significant scholarly debates in this rapidly growing field of study. Organized in four broad sections: Institutions, Behavior, Identities, and Law and Policy, the Handbook summarizes and criticizes contemporary debates while pointing out new departures. A comprehensive set of resources, it provides linkages to established theories of media and politics, political communication, governance, deliberative democracy and social movements, all within an interdisciplinary context. The contributors form a strong international cast of established and junior scholars. This is the first publication of its kind in this field; a helpful companion to students and scholars of politics, international relations, communication studies and sociology.

**The Better Mousetrap** Simon Pont,2012-11-03 Advertising can be great. Great advertising, that is. Brands live or die on the power of their advertising and the advertiser's role is to build better mousetraps. But why do we love certain brands and passionately or indifferently reject the rest? What do our brands say about us? And why do we feel so compelled to use digital brands to say even more? Advertising has always been the hard sell and subtle hustle that piques our interest and gets us

thinking I WANT that, but in a world that now moves with binary speed, the Brand Game is taking ever-new and remarkable turns in its pursuit of better and faster mice. A provocative and insightful look at the chase, *The Better Mousetrap* lifts the lid on the brand and advertising strategies of leading companies who, in a world redefined by digital media, are setting the best traps for these ever quicker mice.
