Defying doom Bernardo Quinn,2015 This book is a call to action. If you need to know what it takes to break through to a new layer of oxygen in an organization that has been flying high in the past, you will find this both an inspiring and practical approach. Nothing will swoop down to remove your challenges, but the framework explained in this book carves a clear path toward transforming an organization, as opposed to sinking into decline. This framework is grouped around three simple steps: What's the story? Who's on board? Getting things done. Defying Doom recounts and explores genuine nightmares - lived, survived and avoided - in different corporate scenarios. These stories inspire executives not only to overcome but also to emerge stronger from certain situations despite uncertain and shifting environments. Quinn offers us a vivid and humane reading, full of tangible solutions for the 21st century executive.

EU Personal Data Protection in Policy and Practice Bart Custers,Alan M. Sears,Francien Dechesne,Ilina Georgieva,Tommaso Tani,Simone van der Hof,2019-02-28 In this book, the protection of personal data is compared for eight EU

member states,namely France, Germany, the United Kingdom, Ireland, Romania, Italy, Sweden andthe Netherlands. The comparison of the countries is focused on government policiesfor the protection of personal data, the applicable laws and regulations, implementationof those laws and regulations, and supervision and enforcement. Although the General Data Protection Regulation (GDPR) harmonizes the protectionof personal data across the EU as of May 2018, its open norms in combination withcultural differences between countries result in differences in the practical implementation,interpretation and enforcement of personal data protection. With its focus on data protection law in practice, this book provides indepth insightsinto how different countries deal with data protection issues. The knowledge and bestpractices from these countries provide highly relevant material for legal professionals,data protection officers, policymakers, data protection authorities and academicsacross Europe. Bart Custers is Associate Professor and Director of Research at the Center for Law andDigital Technologies of the Leiden Law School at Leiden University, the Netherlands.Alan M. Sears, Francien Dechesne, Ilina Georgieva and Tommaso Tani are all affiliated tothat same organization, of which Professor Simone

van der Hof is the General Director.

Intellectual Property Law in Ireland Robert Clark,Shane Smyth,Niamh Hall,2017-02-03 Intellectual Property Law in Ireland, 4th edition is a detailed guide to patents, copyright and trade mark law. It covers all relevant European legislation and traces its weaving into Irish law. It details European case law together with relevant case law from commonwealth countries, as well as detailing any Irish cases on the three areas and also covers design law. The areas that have been expanded and updated in this edition include: - The voluminous European case law on IP issues arising since 2010 - The impact of the new EU TRade Mark Regulation No 2015/2424 - Supreme Court decisions on the law of passing off (McCambridge Ltd v Joseph Brennan Bakeries) and unregistered design rights (Karen Millen Fashions v Dunnes Stores) Along with these, the book looks to future and the

developments on the horizon. It tracks the ongoing domestic copyright law and Digital Single Market, as well as discussing the potential benefits of the the Trade Secrets Directive (EU) 2016/943

Consumer and SME Credit Law Nora Beausang,2021-12-16 With 2000+ pages of guidance, this important new textbook provides an extensive and in-depth guide to the current labyrinthine regulatory regime relating to consumer and SME credit (by way of cash loans) and protection generally, including the Consumer Protection Code, the Consumer Credit Act (housing loans and non-housing loans), the EU Consumer Credit Regulations, the EU Mortgage Credit Regulations and the Central Bank Housing Loan Regulations. Other lending-related conduct of business requirements are also covered in detail, including the Code of Conduct on Mortgage Arrears, the Lending to SME Regulations,

the Code on Related Parties Lending and the Credit Reporting Act, together with applicable EBA/ECB Guidelines dealing with loan origination, product oversight and governance, non-performing exposures/loans and arrears. The regulated activities triggering authorisation as a retail credit firm or credit servicing firm are also addressed in detail. The book additionally extends beyond lending to have application to the wider business of regulated firms in the financial services arena, dealing in detail with issues including the general principles and requirements of the Consumer Protection Code,the fitness and probity regime including the area of minimum competency, distance marketing requirements and other background to the regulatory regime in Ireland including the increased regulatory focus on the culture of regulated firms and product oversight and governance. The available redress/recourse mechanisms are also covered, including the Financial Services and Pensions Ombudsman, the Credit Review Office, the regulatory and other consequences of breach of applicable requirements and the significant risk management area for regulated firms of their customers' statutory right to redress on breach of financial services legislation. In addition, the book has relevance to professionals dealing with consumers in any contractual context including

extensive treatment of how the concept of 'consumer' has developed under common law, the unfair commercial practices regime and the increasingly topical area of unfair contract terms legislation. Relevant case law of the Irish courts and other common law jurisdictions, together with an expanding corpus of decisions from the CJEU, are addressed in detail. This book's practical style is designed to assist bankers, other regulated firms, lawyers, compliance professionals and regulators in the application of a complex area. Rather than simply setting out the separate requirements, the book seeks to navigate the at times contradictory legislative and regulatory strands to give (in so far as is possible) a coherent sense of how they integrate. Much of the content is unique and cannot be found in any other publication. An essential addition to the library of every lender, practitioner and compliance and regulatory risk professional, particularly in the areas of consumer and SME credit.

Grids and Service–Oriented Architectures for Service Level Agreements Philipp Wieder,Ramin Yahyapour,Wolfgang Ziegler,2010-08-03 As Grids and service-oriented architectures

have evolved to a common infrastructure for providing and consuming services in research and commercial environments, mechanisms are needed to agree on the objectives and the quality of such service provision. There is a clear trend to use electronic contracts between service consumers and one or more service providers, in order to achieve the necessary reliability and commitment from all parties. Service Level Agreements (SLAs) are the means to model and manage such contracts in a unified way. Grids and Service-Oriented Architectures for Service Level Agreements, the thirteenth volume of the CoreGRID series, contains current research and up-to date solutions from research and business communities presented at the IEEE Grid 2009 Workshop on Service Level Agreements in Grids, and the Service Level Agreements in Grids Dagstuhl Seminar 2009. The contributions in this volume cover Grid environments, but also generic models for SLA management that are applicable to service-oriented systems in general, like market-economic strategies, negotiation models, or monitoring infrastructures. Grids and Service-Oriented Architectures for Service Level Agreements is designed for a professional audience composed of researchers and practitioners within the Grid community industry, and is also

suitable for advanced-level students in computer science.
