### **Pedagogy of Tele-Proximity for eLearning** Chryssa

Themelis, 2022-08-08 This book examines networked science and the pedagogy of tele-proximity, a paradigm that integrates eLearning theories, information technology, and visual media competencies. The book conceptualises the idea of tele-proximity as a means to foster diversity and human-to-human contact online. It uses the lens of Social Physics and considers how to bridge the distance in eLearning, examining social connections, collective intelligence, and personal well-being. The book draws on qualitative and quantitative research in higher education to form fine-tuned eLearning networks that achieve demosophia, the core of democracy. It charts the progress of technology-enhanced learning approaches and shows the need for a sound pedagogical framework that is holistic and sustainable to promote mindful presence. Contributing to the literature on eLearning, this timely book will be of great interest to educational philosophers, policymakers, educators, researchers, and students in the field of distance education.

Critical Issues in Electronic Media Simon

Penny, 2015-03-10 Critical Issues in Electronic Media is an interdisciplinary sourcebook that offers new critical perspectives directly related to, or arising from, the practice of electronic media art. It sketches the changing topology of culture as it enters electronic space and specifically addresses questions of art practice in that space. Some of the contributions focus on the dynamics of specific emerging media such as interactive media, while others look at the cultural conditions formed by, and forming around, new technological complexes. Still others examine contemporary technocultural manifestations against

a background of social and technological history. The contributors are professionally and geographically diverse, representing professional fields such as computer graphics, video, sound, drama, and visual arts as well as media, cultural and literary theory, and the social sciences. Together, these essays provide a rich survey of contemporary technological critique and offer a perspective on creative practice in technological media.

It will help educators and stakeholders design and implement curricula that

effectively prepare learners for the challenges of tomorrow.

**Telemedicine, Telehealth and Telepresence** Rifat Latifi, Charles R. Doarn, Ronald C.

Merrell, 2020-11-24 Telemedicine and telehealth have consistently been shown to be effective for remote areas or limited-resource locations, regular medical and surgical practice, primary care, second opinion, extreme conditions, major crises, and disaster management. The aim of this book is to bring all aspects of telemedicine and e-health to the reader, in a simple, make-sense approach, in one tome. The book is structured in four parts with 29 chapters written by the best experts in the field from around the world, including clinicians, scientists, and administrators of telemedicine programs. Part I deals with basic principles of telemedicine and telepresence. Historical journeys of telemedicine and strategies, building sustainable telemedicine and telehealth programs in the United States and in the Balkans, as well as incorporation of telemedicine in the current ongoing pandemic COVID-19 are well described and are must read. Current technological developments, rules and regulations, legal and business aspects and consent are also addressed. Part II describes strategies for building sustainable telemedicine and telehealth programs. Telehealth patient portals and public-private partnership modes of technology, as well the role of international telemedicine and how to make it work, are valuable chapters of great significance. Part III describes outcomes-based evidence clinical applications of

telemedicine in trauma, burns, intensive care, pediatric care, psychiatry, and stroke. Finally, one important chapter for the readers is the telemedicine for prison and jail population. The final part, Part IV depicts surgical telementoring and teleproctoring, a chapter written by 18 various surgical experts, a true gem for the readers. The book ends with promises and hurdles of telemedicine in austere conditions.

**The Routledge International Handbook of Digital Social Work** Antonio López Peláez, Gloria Kirwan, 2023-06-13 This handbook provides an authoritative and cutting-edge overview of current research and trends related to the emerging field of digital technology and social work. This book is divided into six sections: Reframing Social Work in a Digital Society Shaping a Science of Social Work in the Digital Society Digital Social Work in Practice The Ethics of Digital Social Work Digital Social Work and the Digitalization of Welfare Institutions: Opportunities, Challenges and Country Cases Digital Social Work: Future Challenges, Directions and Transformations This book, comprised of 40 specially commissioned chapters, explores the main intersections between social work theory and practice in an increasingly

digitized world. Bringing a critical focus to how social work as a profession is adapting exponentially to embrace the benefits of technology, it gives specific consideration to the digitalization of the social work profession, including the ways in which social workers are using different forms of technology to provide effective services and innovative practice responses. With chapters on big data, digital archiving, e-citizenship and inclusion, gerontechnology, children and technology, and data ethics, this book will be of interest to all social work scholars, students and professionals as well as those working in science and technology studies more broadly.

In addition, concepts are developed in order to be able to analyze subjectivity in the context of current theoretical debates (including media sociology, cultural studies, psychoanalysis, practice theory, science and technology studies) as well as social, cultural and technical developments (including digitalization, mediatization, mobility and networking). Since subject conceptions are of central importance for any communication and media analyses, the volume fills a central gap in communication and media studies.
