*Baroque Aesthetics in Contemporary American Horror* Gabriel Eljaiek-Rodríguez, 2021-12-10 This book traces a trend that has emerged in recent years within the modern panorama of American horror film and television, the concurrent—and often overwhelming—use of multiple stock characters, themes and tropes taken from classics of the genre. *American Horror Story*, *Insidious* and *The Conjuring* are examples of a filmic tendency to address a series of topics and themes so vast that at first glance each taken separately would seem to suffice for individual films or shows. This book explores this trend in its visible connections with American Horror, but also with cultural and artistic movements from outside the US, namely Baroque art and architecture, Asian Horror, and European Horror. It analyzes how these hybrid products are constructed and discusses the socio-political issues that they raise. The repeated and excessive barrage of images, tropes and scenarios from distinct subgenres of iconic horror films come together to make up an aesthetic that is referred to in this book as Baroque Horror. In many ways similar to the reactions provoked by the artistic movement of the same name that flourished in the XVII century, these productions induce shock, awe, fear, and surprise. Eljaiek-Rodríguez details how American directors and filmmakers construct these narratives using different and sometimes disparate elements that come

together to function as a whole, terrifying the audience through their frenetic accumulation of images, tropes and plot twists. The book also addresses some of the effects that these complex films and series have produced both in the panorama of contemporary horror, as well as in how we understand politics in a divisive world that pushes for ideological homogenizations.

**Graphic Politics in Eastern India** Nishaant Choksi, 2021-03-25 Investigating the communicative practices of indigenous Santali speakers in eastern India, Nishaant Choksi examines the overlooked role of script in regional movements for autonomy to provide one of the first comprehensive theoretical and ethnographical accounts of 'graphic politics'. Based on extensive fieldwork in the villages of southwestern West Bengal, Choksi explores the deployment of Santali scripts, including a newly created script called Ol Chiki, in Bengali-dominated local markets, the education system and in the circulation of print media. He shows how manipulating the linguistic landscape and challenging the idea of a vernacular enables Santali speakers to delineate their own political domains and scale their language on local, regional and national levels. In doing so, they contest Bengali-speaking upper castes' hegemony over public spaces and institutions, as well as the administrative demarcations of the contemporary Indian nation-state. Combining semiotic theory with ethnographically grounded investigation, *Graphic Politics in Eastern India* provides a new framework for understanding writing and literacy

practices among ethnic minorities and points to future directions for interdisciplinary research on indigenous autonomy in South Asia.

Queering the Vampire Narrative ,2023-10-20 Queering the Vampire Narrative offers classroom-ready original essays that continue our explorations of vampires as representations of the cultural Other, which builds on the work of our previous texts. The editors argue, ultimately, the vampire is a queer icon, infinitely blurring the boundaries of identity and cultural norms and queering even the most seemingly stable notions, such as life, death, humanity, and monstrosity. The Vampire is the undead monarch of subtextual articulations of Otherness, especially queer behaviors and desires, offering explorations of the AIDS epidemic, the destabilization of ideas of fixed and stable sexuality, the search for community and chosen family, and the issues of individual and generational trauma. In current fictions, vampires are coming out of the coffin and the closet, identifying as openly queer and often created by queer writers, artists, and directors and bringing the subtext to the surface of the narrative. This volume seeks to create a dialogue about the impact and importance of the vampire on queer identity and queer theory and to answer the questions of why the vampire is such a compelling queer icon and what visions of vampires articulate about our ideas surrounding issues of sexuality, sexual orientation, sexual behaviors, and desires.

The Oxford Guide to the Transeurasian Languages Martine Robbeets, Alexander Savelyev, 2020-06-26 The Oxford Guide to the Transeurasian Languages provides a comprehensive account of the Transeurasian languages, and is the first major reference work in the field since 1965. The term 'Transeurasian' refers to a large group of geographically adjacent languages that includes five uncontroversial linguistic families: Japonic, Koreanic, Tungusic, Mongolic, and Turkic. The historical connection between these languages, however, constitutes one of the most debated issues in historical comparative linguistics. In the present book, a team of leading international scholars in the field take a balanced approach to this controversy, integrating different theoretical frameworks, combining both functional and formal linguistics, and showing that genealogical and areal approaches are in fact compatible with

one another. The volume is divided into five parts. Part I deals with the historical sources and periodization of the Transeurasian languages and their classification and typology. In Part II, chapters provide individual structural overviews of the Transeurasian languages and the linguistic subgroups that they belong to, while Part III explores Transeurasian phonology, morphology, syntax, lexis, and semantics from a comparative perspective. Part IV offers a range of areal and genealogical explanations for the correlations observed in the preceding parts. Finally, Part V combines archaeological, genetic, and anthropological perspectives on the identity of speakers of Transeurasian languages. The Oxford Guide to the Transeurasian Languages will be an indispensable resource for specialists in Japonic, Koreanic, Tungusic, Mongolic, and Turkic languages and for anyone with an interest in Transeurasian and comparative linguistics more broadly.

**Mastering Fear** Rikke Schubart,2018-07-12 Mastering Fear analyzes horror as play and examines what functions horror has and why it is adaptive and beneficial for audiences. It takes a biocultural approach, and focusing on emotions, gender, and play, it argues we play with fiction horror. In horror we engage not only with the negative emotions of fear and disgust, but with a wide range of emotions, both positive and negative. The book lays out a new theory of horror and analyzes female protagonists in contemporary horror from child to teen, adult, middle age, and old age. Since the turn of the millennium, we have seen a new generation of female protagonists in horror. There are feisty teens in *The Vampire Diaries* (2009–2017), troubled mothers in *The Babadook* (2014), and struggling women in the New French extremity with

Martyrs (2008) and Inside (2007). At the fuzzy edges of the genre are dramas like Pan's Labyrinth (2006) and Black Swan (2010), and middle-age women are now protagonists with Carol in The Walking Dead (2010–) and Jessica Lange's characters in American Horror Story (2011–). Horror is not just for men, but also for women, and not just for the young, but for audiences of all ages.

**Exact Sciences in Greek Antiquity** John G. Dellis, Vassilis Kostopoulos, 2019-06-19 This book consists of 24 papers on ancient Greek science and technology. It covers such areas as mathematics, physics, engineering, astronomical methods and instruments, and environmental issues. A great variety of topics are discussed, including medical care in ancient Olympiads, mathematical concepts in Plato, the concept of the rate of change in various mathematical areas and the concept of symmetry in ancient Greece. Aristotle's Physics on free falling bodies, world-structure formation and matter according to the Presocratics, acoustic phenomena in archaeological sites, Trojan Horse reconstruction, offensive and defensive weapons in Homer's epics, and telecommunications in ancient Greece are also some of the issues addressed here. This book will be an important resource to physicists, mathematicians, engineers, archaeologists, historians, and philologists.
