Corporate Financialization Marcelo José do Carmo, Mário Sacomano Neto, Julio Cesar Donadone, 2023-03-30 The economic process of financialization is defined by many as the development of the dependence and subordination of the productive sector to the financial sector. Leading to an emphasis on maximizing shareholder value above all else, the financialization of the economy and production has an enormous impact on the everyday life of ordinary people including the erosion of employment right, the rise of precarious work, and rising inequalities. Using multicase study research and an exploratory approach, this book analyzes the financialization process in the ten companies with the highest market capitalization worldwide including tech firms, oil companies and banks. This book analyzes indicators of financialization in large corporations including a comparison between profitability sources; shareholding structure, acquisitions and sales of shares; mergers and acquisitions; the origins of directors; payment of compensation to executives; dividend payments to shareholders and stock repurchases; employee salaries; and employment levels. The data demonstrates that what would once have been considered non-core business activities have become more profitable than core business activities in many of these companies. In some cases, these companies are responsible for large investment funds and financial-type institutions which already surpass the largest banks in terms of assets under management. Meanwhile, the average salaries at some of these companies have been falling in real terms due to the rise of outsourcing and the use of cheap or precarious labour. Adopting an economic sociology approach, this book marks a significant contribution to the literature on financialization in economics, sociology and business.

Tencent Min Tang, 2019-07-04 In this book, author Min Tang examines the political economy of the China-based leading global Internet giant, Tencent. Tracing the historical context and shaping forces, the book illuminates Tencent's emergence as a joint creation of the Chinese state and transnational financial capital. Tencent reveals interweaving axes of power on different levels, particularly interactions between the global digital industry and contemporary China. The expansion strategies Tencent has employed—horizontal and vertical integration, diversification and transnationalization—speak to the intrinsic trends of capitalist reproduction and the consistent features of the political economy of communications. The book also pinpoints two emerging and entangling trends—transnationalization and financialization—as unfolding trajectories of the global political economy.

Understanding Tencent's dynamics of growth helps to clarify the complex nature of China's contemporary transformation and the multifaceted characteristics of its increasingly globalized Internet industry. This short and highly topical research volume is perfect for students and scholars of global media, political economy, and Chinese business, media and communication, and society.

The Era of Chinese Multinationals Lourdes Casanova, Anne Miroux, 2019-11-12 Chinese multinationals have grown in size and increased their global presence dramatically over the last decade. They have emerged as formidable competitors for western incumbents. These firms have instigated profound changes, such

as displaced trade and investment flows, new business models, and the emergence of a new geography of global innovation. In a single volume, *The Era of Chinese Multinationals* captures the forces driving the disruptive growth of Chinese multinational corporations. Following a presentation of the surge of Chinese companies, the book turns to corporate characteristics of those firms and how they compare with western multinationals in terms of revenues, profits, branding, and business strategy. The book uses data and case studies to depict the relevant issues with the goal of providing insights to global executives on collaborating and competing with Chinese companies. Covers the Chinese government's expansionist policies and Chinese firms' new role as a global acquirer of companies Examines common characteristics of Chinese companies and their efforts to make China an innovation hub Illustrates its analysis with case studies and interviews with corporate executives and experts in multilateral institutions

Financing Entrepreneurship and Innovation in Emerging Markets Lourdes Casanova, Peter Klaus Cornelius, Soumitra Dutta, 2017-11-17 *Financing Entrepreneurship and Innovation in Emerging Markets* offers an original perspective on the links between macro data on innovation, data on micro-entrepreneurial processes and venture capital supply. The authors synthesize two disparate fields of research and thinking—innovation and entrepreneurship and economics—to illuminate how domestic companies compete and the business environment in which entrepreneurial firms operate. Its broad scope and firm linkages between processes at different levels leapfrogs research topics. For those investigating entrepreneurship and innovation in the early stages of economic development, this book demonstrates how micro and macro foundations of productivity, and hence economic growth and development, are inextricably intertwined. Combines macro and micro perspectives on innovation processes Reveals how economic growth and development are inextricably

intertwined Uses case studies to portray the entrepreneurial firm and its role in accelerating the speed of innovation and dissemination of new technologies Identifies common flaws undermining public venture programs, including poor design, a lack of understanding for the entrepreneurial process and implementation problems

Youth Culture and the Media Bill Osgerby, 2020-09-29 This expansive, lively introduction charts the connections between international youth cultures and the development of global media and communication. From 1950s drive-ins and jukeboxes to contemporary social media, the book examines modern youth cultures in their social, economic, and political contexts. Exploring the rise of young people as a distinct media market, the book examines the relation of youth to modern consumerism, marketing, and digital technologies. The chapters are packed with analysis of media representations of youth, debates about the media's 'effects' on young audiences, and young people's use of the media to elaborate identities and negotiate social relationships. Drawing on a wealth of international examples, the book explores the impact of globalisation and new media technologies on youth cultures around the world.
