Financing Entrepreneurship and Innovation in

Emerging Markets Lourdes Casanova, Peter Klaus

Cornelius, Soumitra Dutta, 2017-11-17 Financing

Entrepreneurship and Innovation in Emerging Markets offers an original perspective on the links between macro data on innovation, data on micro-entrepreneurial processes and venture capital supply. The authors synthesize two disparate fields of research and thinking—innovation and entrepreneurship and economics—to illuminate how domestic companies compete and the business environment in which entrepreneurial firms operate. Its broad scope and firm linkages between processes at different levels leapfrogs research topics. For those investigating entrepreneurship and innovation in the early stages of economic development, this book demonstrates how micro and macro foundations of productivity, and hence economic growth and development, are inextricably intertwined. Combines macro and micro perspectives on innovation processes Reveals how economic growth and development are inextricably intertwined Uses case studies to portray the entrepreneurial firm and its role in accelerating the speed of innovation and dissemination of new technologies Identifies common flaws undermining public venture programs, including poor design, a lack of understanding for the entrepreneurial process and implementation problems

Tencent Min Tang, 2019-07-04 In this book, author Min Tang examines the political economy of the China-based leading global Internet giant, Tencent. Tracing the historical context and shaping forces, the book illuminates Tencent's emergence as a joint creation of the Chinese state and transnational financial capital. Tencent reveals interweaving axes of power on different levels, particularly interactions between the global digital industry and contemporary China. The expansion strategies Tencent has employed—horizontal and vertical integration, diversification and transnationalization—speak to the intrinsic trends of capitalist reproduction and the consistent features of the political economy of communications. The book also pinpoints two emerging and entangling trends—transnationalization and financialization—as unfolding trajectories of the global political economy. Some Lessons from Asian E-Money Schemes for the Adoption of Central Bank Digital Currency Tao Sun, Ryan

Rizaldy,2023-06-09 This paper synthesizes four lessons from the experiences of six Asian e-money schemes for central banks as they consider adopting central bank digital currency (CBDC): (i) CBDC should embody four attributes: trust, convenience, efficiency, and security; (ii) CBDC service providers can facilitate CBDC adoption through four channels: leveraging digital technology, targeting use cases, developing business models, and complying with legal and regulatory requirements; (iii) central banks could incentivize CBDC service providers to develop these four channels when considering CBDC adoption; and (iv) central banks may be able to establish data-sharing arrangements that preserve privacy while leaving room for CBDC service providers to explore the economic value of data.

Seeing the Unseen Guoli Chen, Jianggan Li, 2022-09-15 Meet the overnight tech success stories of China's globalizing business landscape In the last few years, we have seen a meteoric rise of Chinese tech companies across the world. Alibaba stock price movements unnerved investors globally, venture capitalists searched for the next Meituan or Pinduoduo in Southeast Asia and Latin America, and of course, Tik Tok, the most popular content platform in the world today, originated from China. The founders of such companies are typically credited with the "tenacity to rough it out," the "courage to venture into the unknown," and the "vision to take their companies to new heights." However, the same can be said about Silicon Valley founders, or any successful entrepreneur. So, what gives Chinese founders and their companies the advantage in becoming multi-billion global enterprises? How does their leadership set strategies? How do they motivate their people? How do they move so fast and defend their turf in China's hyper-competitive tech market? When they expand overseas, how do they determine what they keep and what they need to let go of? And most importantly, what do these things mean to you as a competitor, investor, regulator, or even as an executive or customer of such companies? *Seeing the Unseen: Behind Chinese Tech Giants' Global Venturing* answers these questions and delves into the fascinating world of Chinese logic that shapes how tech leaders make and implement decisions, many of which are seldom seen outside China. In this book, you will gain an accurate, concise understanding of Chinese tech companies' reflections as they scale. You will understand the different generations of Chinese tech giants from Alibaba, Tencent, Baidu and Huawei to Pinduoduo, Meituan, ByteDance, Xiaomi and more. In this *Seeing the Unseen*, the analysis behind the success and lessons learned is summarized into a unique framework that touches on People, Organization, and Product and Leadership (POP-Leadership). The

book covers: How Chinese history, folklore and Mao Zedong's political strategies have shaped the strategies of Chinese tech leaders, even today The mindsets of Chinese tech and internet companies and how they have evolved over the last two decades The unique business culture and leadership styles that steered these companies through uncertain and ultra-competitive periods How Chinese companies structure their organizations and products and how they remain agile as they scale The limitations of Chinese POP-Leadership, and what these companies must shed to keep up with international players in global markets How Chinese POP-Leadership is now becoming international, and how international players are leveraging these learnings How the worldwide expansion of Chinese companies will alter the business landscape in the coming decades Chinese firms undertaking overseas ventures can challenge our thinking on global strategy and implementation. This book gives you a better understanding of these emergent players in the global arena.

Limitless Supply: New Economy In The Digital Era

Chunsheng Zhou, Xiuhai Hu, 2022-04-08 Scarcity hypothesis is the cornerstone of traditional economic theory. However, in the digital era, new products such as Windows, Android, and Wechat have been introduced to the market. Traditional economic theory may not be able to explain various new economic phenomena in the digital era. This book creatively proposes the concept of limitless supply and then discusses its implications for economy at both macro and micro-levels. It analyses and summarizes the basic features of limitless supply products, and compares the differences and similarities of how limited supply and limitless supply products are manufactured and marketed. The book also provides reasons for why manufacturers of limitless supply products create intangible assets. It argues that the scale of an enterprise producing limitless supply products depends on the number of users, whereas the scale of an enterprise producing limited supply products depends on the production capacity. This book is mainly written to construct a preliminary, simple, yet relatively comprehensive economic theory framework for limitless supply, and to interpret the phenomena and corporate behaviour. It further explores how enterprises providing limitless supply products grow financially. It also proposes the fundamental difference in growth models between enterprises providing limitless supply products and those providing limited supply products. The book also looks at how growth models can achieve fission growth.

Faith by Aurality in China's Ethnic Borderland Ying Diao, 2023

Illuminates how voice, faith, and hearing become intertwined with technologies of sound reproduction and mobility amid the rapidly transforming religious landscape of China's ethnic borderland. The twentieth-century expansion of Protestantism among the

upland peoples in the China-Southeast Asia borderlands has catalyzed a profound sociocultural change in the region. In *Faith by Aurality in China's Ethnic Borderland*, Ying Diao finds important sonic evidence for this religious revolution in a rapidly transforming northwest Yunnan, presenting a compelling account of China's minority-Christian landscape and highlighting the importance of aurality in the peripheral peoples' response to Christianity and other modernizing projects. Diao documents a range of sounded religious practices by the Lisu, an indigenous yet historically migratory people, to examine how participatory music production, circulation, and consumption become integral to indigenous perception and experience of faith. Weaving together evidence from multisite fieldwork, archival records, and audiovisual media, Diao demonstrates nuanced understanding of people of faith at the margin, one centered on the sensual and material dimensions of religion and on the intertwining of local agency and external hegemonic forces. As the first full-length ethnographic account of China's Christian minorities on a transnational scale to be published in English, this book provides historical and contextual information that enriches anthropological, ethnomusicological, and historical scholarship on global Christianity, ethnicity, media, and mobility while showing how sound can be an ambivalent but fruitful avenue through which ways of faith are constructed and remain fluid in a context where discussions and practices of religion are constrained--
