The Text and the Voice Alessandro Portelli,1994-01-05 The Text and the Voice

Text--sound Texts Richard Kostelanetz,1980 Representing a fusion of the avant-garde in poetry, music, and the performing arts, this unique anthology includes poems, scores, scripts, and detailed performance instructions as well as theoretical manifestos and critical essays. Among the more than one hundred pieces are works by Allen Ginsberg, John Cage, Jack Kerouac, Claes Oldenberg, Philip Glass, Raymond Federman, Glenn Gould, Jerome Rothenberg, and Gertrude Stein. Text-Sounds Texts is the first collection of sound poetry to be published in North America; unlike anthologies published abroad, it is devoted exclusively to American and Canadian authors.--Publisher

Hands-On Natural Language Processing with Python Rajesh Arumugam,Rajalingappaa Shanmugamani,2018-07-18 Foster your NLP applications with the help of deep learning, NLTK, and TensorFlow Key Features Weave neural networks into linguistic applications across various platforms Perform NLP tasks and train its models using NLTK and TensorFlow Boost your NLP models with strong deep learning architectures such as CNNs and RNNs Book Description Natural language processing (NLP) has found its application in various domains, such as web search, advertisements, and customer services, and with the help of deep learning, we can enhance its performances in these areas. Hands-On Natural Language Processing with Python teaches you how to leverage deep learning models for performing various NLP tasks, along with best practices in dealing with today's NLP challenges. To begin with, you will understand the core concepts of NLP and deep learning, such as Convolutional Neural Networks (CNNs), recurrent neural networks (RNNs), semantic embedding, Word2vec, and more. You will learn how to perform each and every task of NLP using neural networks, in which you will train and deploy neural networks in your NLP applications. You will get accustomed to using RNNs and CNNs in various application areas, such as text classification and sequence labeling, which are essential in the application of sentiment analysis, customer service chatbots, and anomaly detection. You will be equipped with practical knowledge in order to implement deep learning in your linguistic applications using Python's popular deep learning library, TensorFlow. By the end of this book, you will be well versed in building deep learning-backed NLP applications, along with overcoming NLP challenges with best practices developed by domain experts. What you will learn Implement semantic embedding of words to classify and find entities Convert words to vectors by training in order to perform arithmetic operations Train a deep learning model to detect classification of tweets and news Implement a question-answer model with search and RNN models Train models for various text classification datasets using CNN Implement WaveNet a deep generative model for producing a natural-sounding voice Convert voice-to-text and text-to-voice Train a model to convert speech-to-text using DeepSpeech Who this book is for Hands-on Natural Language Processing with Python is for you if you are a developer, machine learning or an NLP engineer who wants to build a deep learning application that leverages NLP techniques. This comprehensive guide is also useful for deep learning users who want to extend their deep learning skills in building NLP applications. All you need is the basics of machine learning and Python to enjoy the book.

Text-to-Speech Synthesis Paul Taylor,2009-02-19 Text-to-Speech Synthesis provides a complete, end-to-end account of the process of generating speech by computer. Giving an in-depth explanation of all aspects of current speech synthesis technology, it assumes no specialised prior knowledge. Introductory chapters on linguistics, phonetics, signal processing and speech signals lay the foundation, with subsequent material explaining how this knowledge is put to use in building practical systems that generate speech. Including coverage of the very latest techniques such as unit selection, hidden Markov model synthesis, and statistical text analysis, explanations of the more traditional techniques such as format synthesis and synthesis by rule are also provided. Weaving together the various strands of this multidisciplinary field, the book is designed for graduate students in electrical engineering, computer science, and linguistics. It is also an ideal reference for practitioners in the fields of human communication interaction and telephony.

Freeing Shakespeare's Voice Kristin Linklater,1993-01-01 A passionate exploration of the process of comprehending and speaking the words of William Shakespeare. Detailing exercises and analyzing characters' speech and rhythms, Linklater provides the tools to increase understanding and make Shakespeare's words one's own.

Representation and the Text William G. Tierney,Yvonna S. Lincoln,1997-07-31 Focuses on authorial representations of contested reality in qualitative research.This book focuses on representations of contested realities in qualitative research. The authors examine two separate, but interrelated, issues: criticisms of how researchers use voice, and suggestions about how to develop experimental voices that expand the range of narrative strategies. Changing relationships between researchers and respondents dictate alterations in textual representations--from the view from nowhere to the view from a particular location, and from the omniscient voice to the polyvocality of communities of individuals. Examples of new representations and textual experiments provide models for how some authors have struggled with voice in their texts, and in so doing, broaden who they and we mean by us.

Review of Some Text to Speech Converters, Voice Changers, Video Editors, Animators, Speaking Avatar Makers and Live Str Dr. Hedaya Mahmood Alasooly,2020-09-23 As videos are so much important todays, I believe that everyone must have some knowledge on creating and editing videos for of common tasks required by his personal or business use. This book has mainly an objective to evaluate some text to speech converters, voice changers, video editors, cartoon animators and video recording and live streaming programs. As I am Arabic, I gave special importance to look for the best tools that can convert Arabic text to voice with good quality because of the lack of these tools. And I also gave special importance to look for the best tools that can change the voice tune as a lot of people don't like to make videos with their voice for special reasons. Then I gave quick guide on how to use the two important video editors, VSDC Free Video Editor and Camtasia Studio. Then I gave quick guide on how to use two websites that enable people to create cartoon animation videos in a simple way, animaker.com/ website and powtoon.com website. Then I gave quick guide on how to us one of the best animator programs, which is Reallusion Cartoon Animator 4. I explained also how it is possible to make face mockup through Cartoon Animator 4Motion Live 2D Plugin. Then I introduced Adobe Character Animator as alternative program to make face mockup. Finally I explained about one of the video recording and live streaming programs, which is OBS Studio. I mentioned briefly how to setup OBS studio to create livestream video on Youtube and Facebook. At the end, I showed how to use Voki website to create customizable speaking avatars This work is divided to the following sections. 1. Some tools to reshape the Arabic letters so they can be converted to voice in other tools. 2. Some tools to convert English text to speech TTS. 3. Some tools to convert Arabic text to speech TTS. 4. Evaluation of some voice changers 5. Creating video of audio file with list of images (slideshow) using VSDC Free Video Editor.: 6. Screen capture using VSDC Free Video Editor. 7. Video capture using VSDC Free Video Editor. 8. Using animaker.com/ website to create simple cartoon animation video. 9. Using powtoon.com website to create animation video. 10. Using Camtasia Studio Video Editor 11. Using Camtasia Studio Recorder 12. Using Reallusion Cartoon Animator 4: 13. Making Face Mockup on Cartoon Animator 4 through Motion Live 2D Plugin 14. Introduction to Adobe Character Animator 15. Setting OBS Studio for live stream: 16. Creating live stream video on Youtube with OBS studio: 17. Creating Live stream video on Facebook with OBS studio: 18. Using Voki website voki.com/ to create customizable speaking avatars.

Voice into Text Ian Worthington,2018-07-17 This volume deals with orality and literacy in ancient Greece and what consideration of these areas yields for that society, its literature, traditions and practices. Individual chapters focus on art, comedy, historiography, oratory, religion, rhetoric, philosophy, poetry, tragedy, and on orality in contemporary cultures (Greek and South African), which have a bearing on the ancient world. By considering such factors as oral elements in various genres and practices and how these have shaped the texts we have today, as well as the extent of literacy and the impact of literacy on oral traditions and on singers/writers, the book presents another insight into ancient Greek society and its people.

Programming Voice Interfaces Walter Quesada,Bob Lautenbach,2017-11-20 Get a step-by-step guide for developing voice interfaces for applications and devices connected to the Internet of Things. By allowing consumers to use natural human interactions, you can avoid awkward methods of input and interactivity to provide them with elevated user experiences. This practical book is ideal for software engineers who build applications for the Web, smartphones, as well as embedded systems that dominate the IoT space. Integrate voice interfaces with internet connected

devices and sensors Learn how to integrate with existing voice interfaces Understand when to use a voice over other Natural User Interface technologies Build a prototype with tools such as Raspberry Pi, solderless breadboards, jumper cables, sensors, Arduino, Visual Studio, and other tools Use cloud services such as Azure and AWS to integrate voice with your existing or new web service end-points

Text In Action Cicely Berry,2011-05-31 Following on from the widely acclaimed The Actor and the Text - which was addressed directly to the actor - Text in Action is drawn from Cicely's group work experiences, encompassing the viewpoint of the director as well. To begin with, the author explores language from a cultural and personal perspective. In these days of management jargon and internet technology are we losing touch with the ability to communicate fully?' Is the deeper imaginative world being left unexpressed? The main body of the book contains detailed, practical exercises for actors and directors during the rehearsal process. All exercises will be tied to specific scenes, leading to a fuller exploration of the rext. Text In Action analyses the imagery of plays, speech structures, the physicality of language and emphasises the importance of finding a collective voice. Cicely's guidance on the matter of voice will help actors find relationships and situations through the text in a unique way, in order to make it more dynamic and creative.

Text and Voice Gabriel Josipovici,1992

Perfect SoloPreneur They Call Me Hoz,2018-12-31 I wrote Perfect SoloPreneur to answer the question: how would I become a SoloPreneur if I had to start from scratch all over again? Today, everybody has the opportunity to create a personal brand and become a SoloPreneur or an entrepreneur using mostly free tools on the World Wide Web. But the path is littered with traps, sharks and missing information. If you're hustling to build your own side business - your own digital empire - then you already know about the endless temptations for cool tools and software and the endless monthly subscriptions that are required to run these tools. You know also about the countless motivational videos and tips out there telling us to just go for it, make it happen, etc.In this book, I talk about the things not to fall for and the mindset the SoloPreneur needs to cultivate. I talk about the things to be mindful of when you're building your personal brand and the ways others may try to attack it in future. I talk about the problem with all these motivational videos (they're great to watch and I recommend that you use them to get inspired, but we need to remember context because context is everything.The fact is that today, there is an incredible opportunity for anyone to become a SoloPreneur and build a successful business online in their spare time from their spare room, and every day more people join the laptop lifestyle (aka the Internet lifestyle) and become financially independent. But the idea of achieving online success is being romanticised into a work your b*tt off and it will happen formula (well, those make great videos...)I tried and failed more times than I care to remember and ended up in ugly situations from following a lot of similar advice blindly. I finally got things to work after a lot of effort and backtracking and applying certain rules based on common sense.At the end of that 'little journey' it struck me that is should not have been this hard, and I should not have had to go through so much stress both financially and emotionally. I realised that the reason I made things a lot harder than they need to be is because I followed other people's models without applying any criteria of my own.This book is about the things I've learnt on this journey, and about how I would do this next time, to make it as easy and efficient as possible.Enjoy.HozAbout Hoz:Hoz has worked with clients in 21 countries. He has created 3 physical product brands of his own which he runs to this day as well as a digital marketing agency and a publishing business. Before that he was a touring musician.Recently, Hoz decided to start blogging and vlogging to share his journey with other SoloPreneurs. He's just getting started in the bloggesphere but he brings all his experience and humour with him. He decided to put his hindsight to use and write Perfect SoloPreneur as the blueprint he would have followed if he had to do this whole thing again from scratch. Perfect SoloPreneur is a bird's eye view of what it takes to create digital empires. The premise of the book is a call to action to today's unprecedented opportunity to create a personal brand and generate revenue online working from home or anywhere else and designing the life you want.Q&AsWhat's the difference between a solopreneur and an entrepreneur? Entrepreneurs have teams on whom they rely on to carry out their ideas. SoloPrenerus come up with ideas and then roll up their sleeves and do the work. Because of this limitation, SoloPreneurs have less scale than entrepreneurs - especially those on a budget. This book talks about the most important things SoloPreneurs can leverage to increase their output.

Stop Typing! Keith Connes,2018-11-17 Now it's easier than ever to write better and more quickly by letting your voice do the typing. This completely updated version of Dragon NaturallySpeaking 13 & Professional Individual 15 Handbook for Writers now includes evaluations of the three free speech recognition programs as well as new Dragon programs. Also, the author has broadened the scope of this informative book to make it useful to anyone who has a computer. Included are techniques for becoming skilled at dictation, pros and cons of different types of headsets, and the many benefits of using a compatible digital recorder. Let this book help you decide if voice typing software is for you and whether a free or commercial program will serve you best. The author, Keith Connes, has been using different versions of speech recognition software for the past 20 years and as an independent journalist, he impartially describes the pros and cons of all the programs that are currently available -- including one of the best that has been discontinued by its producer but is still on the market, at fire-sale prices! You're sure to find a goldmine of useful information and ideas about this exciting technology, right here in this book.

The Speaking Voice Richard Wood Cone,1908

Voice Quality John H. Esling,Scott R. Moisik,Allison Benner,Lise Crevier-Buchman,2019-06-20 Offers a new model of vocal tract articulation that explains laryngeal and oral voice quality, both auditorily and visually, through language examples and familiar voices.

The Need for Words Patsy Rodenburg,2018-02-22 Patsy Rodenburg explores how we speak, what we speak and the impact of the spoken word. As one of the world's leading voice coaches, she describes practical ways to approach language, and uses Shakespeare, Romantic poetry, modern prose and a range of other texts to help each of us discover our own unique need for words. In Part One the author attacks the myth that there is only one correct way to speak by clearing away the blocks that can make language inaccessible. Part Two, a series of language and text exercises, connects the voice to the shape and quality of individual words and phrases. Drawing on the author's time spent coaching in the worlds of business and politics, this new edition reflects on how the way we use words has changed since the book was first published. It brings a renewed focus on the language of power – spoken in the worlds of politicians and company directors – which will give readers an insight into the potency of clear, direct communication. Finally, new language exercises provide readers with unmediated access to this new research, allowing them to practice and master the language and words that drive the modern world.

Written Voices, Spoken Signs Egbert J. Bakker,Ahuvia Kahane,1997-07 Written Voices, Spoken Signs is a stimulating introduction to new perspectives on Homer and other traditional epics. Taking advantage of recent research on language and social exchange, the nine innovative essays in this volume--by leading scholars of Homer, oral poetics, and epic--focus on performance and audience reception of oral poetry.

Voice, Text, Hypertext Raimonda Modiano,Leroy F. Searle,Peter L. Shillingsburg,2016-06-01 Voice, Text, Hypertext illustrates brilliantly why interest in textual studies has grown so dramatically in recent years. For the distinguished authors of these essays, a "text" is more than a document or material object. It is a cultural event, a matrix of decisions, an intricate cultural practice that may focus on religious traditions, modern "underground" literary movements, poetic invention, or the irreducible complexity of cultural politics. Drawing from classical Roman and Indian to modern European traditions, the volume makes clear that to study a text is to study a culture. It also demonstrates the essential importance of heightened textual awareness for contemporary cultural studies and critical theory—and, indeed, for any discipline that studies human culture.

Qualitative Researching with Text, Image and Sound Martin W Bauer,George Gaskell,2000-05-16 `This excellent text will introduce advanced students - and remind senior researchers - of the availability of a broad range of techniques available for the systematic analysis of social data that is not numeric. It makes the key point that neither quantitative nor qualitative methods are interpretive and at the same time demonstrates once and for all that neither a constructivist perspective nor a qualitative approach needs to imply abandonment of rigor. That the chapters are written by different authors makes possible a depth of expertise within each that is unusually strong´ - Susanna Hornig Priest, Texas A&M University; Author of `Doing Media Research´ Qualitative Researching with Text, Image and Sound offers a unique resource for today´s social researcher. This practical handbook provides a comprehensive and accessible introduction to a broad range of research methods with the objective of clarifying procedures, good practice and public accountability. Following an introduction which discusses quality and quantity, and how these relate to issues of representation and

knowledge interests in social research, the book is organized into four parts: · Part I covers different ways of collecting data and different types of data relating to text, image and sound: corpus construction, individual and group interviewing, narrative and episodic interviewing, video and film, and bemetology. · Part II introduces the main analytic approaches for text, image and sound: classical content analysis, argumentation, discourse, conversation analysis, rhetoric, semiotics, analysis of moving images, and of noise and music - each includes an introduction with examples and step-by-step advice on how to do it. · Part III covers computer-assisted analysis - including computer-assisted qualitative data analysis and key-word-in-context analysis. · Part IV addresses issues of good practice, looking at problems and fallacies in interpretation and develops quality criteria for qualitative research. This book provides researchers with the skills and knowledge to make the appropriate choices between different methods, types of data, and analytic procedures, and gives examples and criteria of good practice for each one. It will be essential reading for students and researchers across the social sciences.
