*For Better or For Worse* Hung Cam Thai,2008-02-20 Marriage is currently the number-one reason people migrate to the United States, and women constitute the majority of newcomers joining husbands who already reside here. But little is known about these marriage and migration streams beyond the highly publicized and often sensationalized phenomena of mail-order and military brides. Less commonly known is that most international couples are immigrants of the same ethnicity. In *For Better or For Worse*, Hung Cam Thai takes a closer look at marriage and migration, with a specific focus on the unions between Vietnamese men living in the United States and the women who marry them. Weaving together a series of personal stories, he underscores the ironies and challenges that these unions face. He includes the voices of working-class immigrant men dealing with marginalization in their adopted country. These men speak about wanting traditional wives who they hope will recognize their gendered authority. Meanwhile, young Vietnamese college-educated women, undesirable to bachelors in their own country who are seeking subservient wives, express a preference for men of the same ethnicity but with a more liberal outlook on gender-men they imagine they will find in the United States. A sense of foreboding pervades the book as Thai captures the incompatible viewpoints of the couples who appear to be separated not only geographically but ideologically.

**CIGOS 2021, Emerging Technologies and Applications for Green Infrastructure** Cuong Ha-Minh,Anh Minh Tang,Tinh Quoc Bui,Xuan Hong Vu,Dat Vu Khoa Huynh,2021-10-28 This book highlights the key role of green infrastructure (GI) in providing natural and ecosystem solutions, helping alleviate many of the environmental, social, and economic problems caused by rapid urbanization. The book gathers the emerging technologies and applications in various disciplines involving geotechnics, civil engineering, and structures, which are presented in numerous high-quality papers by worldwide researchers, practitioners, policymakers, and entrepreneurs at the 6th CIGOS event, 2021. Moreover, by sharing knowledge and experiences around emerging GI technologies and policy issues, the book aims at encouraging adoption of GI technologies as well as building capacity for implementing GI practices at all scales. This book is useful for researchers and professionals in designing, building, and managing sustainable buildings and infrastructure.

**The AUN/SEED-Net Joint Regional Conference in Transportation, Energy, and Mechanical Manufacturing Engineering** Anh-Tuan Le,Van-Sang Pham,Minh-Quy Le,Hoang-Luong Pham,2022-05-31 This book (The AUN/SEED-Net Joint Regional Conference in Transportation, Energy, and Mechanical Manufacturing Engineering) gathers selected papers submitted to the 14th Regional Conference in Energy Engineering and the 13th Regional Conference in Mechanical Manufacturing Engineering in the fields related to intelligent equipment, automotive engineering, mechanical systems and sustainable manufacturing, renewable energy, heat and mass transfer. Under the theme of “Integration and Innovation for Sustainable Development,” This book consists of papers in the aforementioned fields presented by researchers and scientists from universities, research institutes, and industry showcasing their latest findings and discussions with an emphasis on innovations and developments in embracing the new norm, resulting from the COVID-19 pandemic.

**On The Borders of State Power** Martin Gainsborough,2008-10-31 *On The Borders of State Power* explores the changing nature, meaning and significance of international borders over time in the area referred to today as the Greater Mekong Sub-region, incorporating Burma, Cambodia, Laos, Thailand, Vietnam and China's Yunnan province. An international line up of contributors examine the changing nature of borders over time, using examples from the 15th to 21st

centuries and engage with contemporary literature on globalisation, particularly as it applies to borders and the nature of state power. What the book finds is that there is far greater diversity in terms of the importance of borders across time than is commonly thought. Thus, borders commonly thought to be closed are often more open, open borders are found to be more restricted, while pre-colonial frontiers, which are usually viewed as relatively unimportant compared with the colonial era, are in fact found to have been more closely governed. Looking at the contemporary period, the book shows how economic liberalisation – or so-called cooperation between the Mekong states in the post-Cold War period – has been accompanied not by the retreat of the state but rather by its expansion, including in ways which frequently impose greatest restrictions on the poor and marginalised. Incorporating work by both historians and social scientists this book is a valuable read for those interested in the politics, development and geography of Southeast Asia.

**Vietnam and the South China Sea** Do Thanh Hai, 2016-12-01 Studies of the escalating tensions and competing claims in the South China Sea overwhelmingly focus on China and its increasingly assertive approach, while the position of the other claimants is overlooked. This book focuses on the attitude of Vietnam towards the South China Sea dispute. It examines the position from a historical perspective, shows how Vietnam's position is affected by its wish to maintain good relations with China on a range of issues, and outlines how Vietnam has occasionally made overtures to both the United States and Japan in order to bolster its position, and considered the possibility, so far resisted, of taking China to formal arbitration under the auspices of the United Nations Convention on the Law of the Sea. The book concludes by assessing the future prospects for Vietnam's position in the dispute.

**Consuming Urban Culture in Contemporary Vietnam** Lisa Drummond,Mandy Thomas,2005-07-25 Vietnam is currently undergoing a metamorphosis from a relatively closed society with a centrally planned economy, to a rapidly urbanising one with a global outlook. These changes have been the catalyst for an exciting ferment of activity in popular culture. This volume contains contributions from scholars engaged in the most up-to-date social research in Vietnam, as well as some of Vietnam's most popular cultural producers who are forging new ways of imagining the present whilst at the same time engaging actively in reinterpreting the past. The diverse ways that Vietnam is culturally and socially negotiating the future are examined as the book addresses issues of indigenisation of cultural influences, ambivalence surrounding change, and the consistent blurring of boundaries between informal, non-state cultural activities and formal institutional structures in the evolution of a civil society in Vietnam.

**MiG-17 and MiG-19 Units of the Vietnam War** István Tóperczer,2012-11-20 The erstwhile enemy of the USAF and US Navy during the nine years of American involvement in the Vietnam War, the Vietnamese Peoples' Air Force (VPAF) quickly grew from an ill-organised rabble of poorly trained pilots flying antiquated communist aircraft into a highly effective fighting force that more than held its own over the skies of North Vietnam. Flying Soviet fighters like the MiG-17, and -19, the VPAF produced over a dozen aces, whilst the Americans managed just two pilots and three navigators in the same period.

**MiG-17/19 Aces of the Vietnam War** István Toperczer, 2016-10-20 At the beginning of the Vietnam War, the Vietnam People's Air Force (VPAF) were equipped with slow, old Korean War generation fighters – a combination of MiG-17s and MiG-19s – types that should have offered little opposition to the cutting-edge fighter-bombers such as the F-4 Phantom II, F-105 Thunderchief and the F-8 Crusader. Yet when the USAF and US Navy unleashed their aircraft on North Vietnam in 1965 the inexperienced pilots of the VPAF were able to shatter the illusion of US air superiority. Taking advantage of their jet's unequalled low-speed maneuverability, small size and powerful cannon armament they were able to take the fight to their missile-guided opponents, with a number of Vietnamese pilots racking up ace scores. Packed with information previously unavailable in the west and only recently released from archives in Vietnam, this is the first major analysis of the exploits of Vietnamese pilots in the David and Goliath contest with the US over the skies of Vietnam.

*A global history of early modern violence* Erica Charters, Marie Houllemare, Peter H. Wilson, 2021-01-26 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This is the first extensive analysis of large-scale violence and the methods of its restraint in the early modern world. Using examples from Asia, Africa, the Americas and Europe, it questions the established narrative that violence was only curbed through the rise of western-style nation states and civil societies. Global history allows us to reframe and challenge traditional models for the history of violence and to rethink categories and units of analysis through comparisons. By decentring Europe and exploring alternative patterns of violence, the contributors to this volume articulate the significance of violence in narratives of state- and empire-building, as well as in their failure and decline, while also providing new means of tracing the transition from the early modern to modernity.

*Proceedings of the 2nd Annual International Conference on Material, Machines and Methods for Sustainable Development (MMMS2020)* Binh Tien Long, Yun-Hae Kim, Kozo Ishizaki, Nguyen Duc Toan, Ivan A. Parinov, Ngoc Pi Vu, 2021-03-26 This book presents selected, peer-reviewed proceedings of the 2nd International Conference on Material, Machines and Methods for Sustainable Development (MMMS2020), held in the city of Nha Trang, Vietnam, from 12 to 15 November, 2020. The purpose of the conference is to explore and ensure an understanding of the critical aspects contributing to sustainable development, especially materials, machines and methods. The contributions published in this book come from authors representing universities, research institutes and industrial companies, and reflect the results of a very broad spectrum of research, from micro- and nanoscale materials design and processing, to mechanical engineering technology in industry. Many of the contributions selected for these proceedings focus on materials modeling, eco-material processes and mechanical manufacturing.
