Intellectual Property Branding in the Developing World Tshimanga Kongolo,2019-05-13 Intellectual Property Branding in the Developing World identifies success stories in the areas of intellectual property (IP) and branding for non-technological innovation in the developing world. The author examines the relationship between IP, branding and innovation to demonstrate that innovation, in general, and non-technological innovation, in particular, must go hand in hand with branding. Branding of non-technological innovations should be a good strategic tool to be used by countries in the developing world mainly in the areas where they have competitive advantages. This book will assist scholars and academics dealing with innovation, branding, and IP issues, providing context and guidance to policymakers from the developing world. It is also relevant to researchers and students in the fields of intellectual property law, commercial law, international law, management, and innovation.

Feminism and the Women's Movement in Malaysia Maznah Mohamad,Cecilia Ng,tan beng Hui,2006-04-18 Combining both personal and academic insights into the Malaysian women's movement, this study provides an in-depth account of the multiple struggles of the Malaysian women's movement, from securing gender equality in a patriarchal society to achieving unity among members of a multi-ethnic society that are further divided along class and religious lines. Most historical versions of national struggles have created icons out of male figures. The authors of this book have provided a corrective to this. They detail the importance of the role of the women's movement, led by numerous unsung personalities in promoting social change in Malaysia. The book centres on a crucial argument: that in the context of an ethnically fragmented post-colonial, authoritarian society, an autonomous woman movement, which began in the early eighties had actually achieved significant political success. However the study observes that by the late 1990s, feminist issues were also readily appropriated by the state and the market, and also suggests that the emergence of 'market feminism' poses specific challenges for the future of the Malaysian women's movement. This thorough and engaging account of feminism and the women's movement in Malaysia will capture the interest of scholars, policy makers and activists.

Corporate Secretarial Practice Compliance And Administration (UiTM Press) Zubaidah Zainal Abidin,2020-11-25 Corporate Secretarial Practice Compliance and Administration is a sequel to Corporate Secretaryship and Governance (2008) and Corporate Governance: Practice of the Company Secretary (2010) and has been revised to accommodate the fundamental changes in the Companies Act 2016. This book provides comprehensive coverage from incorporation to winding up, detailing the procedures associated with company formation and administration, managing and altering share capital, changes to the law on meetings, reporting and auditing requirements, corporate rescue, rehabilitation and reorganisation. This book focuses on the director's duties and responsibilities in the administration of the company and the governance role of the company secretary in ensuring compliance with the provisions of the Companies Act 2016, the company's Constitution, the Bursa Malaysia Listing Requirements, the Malaysian Code of Corporate Governance and other related laws and regulations. In addition, the new statutory forms are shown as Exhibits at the end of each chapter for easy reference.

Industrial Technology Development in Malaysia Greg Felker,K. S. Jomo,Rajah Rasiah,2013-02-01 This book, and its companion, Technology, Competitiveness and the State, examine and evaluate Malaysian industrialization in terms of its experience of and prospects for industrial technology development. The focus is on the development of Malaysia's technological-industrial base from a sector and firm-specific perspective, including the role of foreign multinationals in this process. Industrial Technology Development in Malaysia, provides a valuable analysis of the technological development of a Newly Industrializing Country and reflects on whether existing development strategies can be maintained in the wake of the financial crises sweeping the East Asian economies.

Recycling of Plastics, Metals, and Their Composites R.A. Ilyas,S.M. Sapuan,Emin Bayraktar,2021-12-28 Having a solid understanding of materials recycling is of high importance, especially due to the growing use of composites in many industries and increasingly strict legislation and concerns about the disposal of composites in landfills or by incineration. Recycling of Plastics, Metals, and Their Composites provides a comprehensive review of the recycling of waste polymers and metal composites. It provides the latest advances and covers the fundamentals of recycled polymers and metal composites, such as preparation, morphology, and physical, mechanical, thermal, and flame-retardancy properties. FEATURES Offers a state-of-the-art review of the recycling of polymer composites and metal composites for sustainability Describes a life-cycle analysis to help readers understand the true potential value and market for these recycled materials Details potential applications of recycled polymer and metal composites Includes the performance of natural fiber–reinforced recycled thermoplastic polymer composites under aging conditions and the recycling of multi-material plastics Covers recycling technologies, opportunities, and challenges for polymer-matrix composites This book targets technical professionals in the metal and polymer industries as well as researchers, scientists, and advanced students. It is also of interest to decision makers at material suppliers, recycled metal and polymer product manufacturers, and governmental agencies working with recycled metal and polymer composites.

Indian Multinationals in the World Economy Jaya Prakash Pradhan,2008 Indian multinationals have been active in the world economy since early 1960s. However, their number and scale of operation have grown significantly in the last fifteen years or so. In the face of increasing global competition unleashed by extensive liberalization measures, Indian firms have adopted the strategy of outward foreign direct investment (OFDI) as an integral part of their business strategies. By undertaking greenfield OFDI and brownfield OFDI for acquiring foreign companies, Indian firms are enhancing their potential for growth and global competitiveness. Consequently India has emerged as a major developing source country of FDI and Indian multinationals are likely to affect world

development in several ways. The book analyses the phenomenon of Indian multinationals from both macro level factors and firm-level corporate strategies and examines its implications for India and host countries. A detailed investigation of Indian overseas investment flows and stocks from sectoral, regional, ownership and motivational perspectives provides a rigorous long-run coverage of Indian multinational firms from 1970s onwards. The role of innovation, entrepreneurial skills, scale of business, productivity, and the role of government policies, received critical attention in explaining the emergence of Indian multinationals. The comprehensive quantitative and case studies approach offers valuable insights into the behaviour and impacts of these new global actors on home and host countries. This book offers a number of lessons to home country, host countries, and Indian enterprises becoming multinationals. With the growing global interest from policy makers, business practitioners, researchers, and students in Indian multinationals, this book would serve as an important and timely reading for all of them.

China in Malaysia Edmund Terence Gomez,Siew Yean Tham,Ran Li,Kee Cheok Cheong,2020-07-25 This book examines state-state relations and new forms of state business relations that have emerged with an increase in China's foreign direct investments in Malaysia. Focusing on investments in the industrial sector and through in-depth case studies, this book adopts a novel framework to analyse these different types of state-business relations. These new forms of state-business relations are created from the different modes of negotiations between different key actors in each of the cases. Diverse outcomes were found, reflecting the disparate forms of power relationships and state cohesiveness with unique institutional architectures formed in each case. The book identifies a major shift in structural power in these new forms of state-business relations as China's large multinational state-owned enterprises increasingly invest in Malaysia. A well-constructed institutional architecture is needed, not just in Malaysia but for other Southeast Asian countries, if foreign investments are to be harnessed to promote effective industrial development.

Information Technology and Intellectual Property Law David Bainbridge,2019-02-08 Information Technology and Intellectual Property Law is a complete exploration of the relationship between information technology and intellectual property laws a very wide-ranging and complex, ever changing area of law. It provides up-to-date coverage and analysis of the intellectual property laws applicable to all forms of computer software. placing the law in the context of computer use examining copyright, database rights, patents, trade marks, design rights and the law of confidence. There have been numerous cases before the Court of Justice for the European Union (CJEU) recently, in particular involving the use of trade marks on the Internet, and these are analysed in detail with the implications of the judgments explained in a practical and accessible way. Information Technology and Intellectual Property Law includes developments surrounding ISPs (Internet Service Providers), for example injunctions against ISPs both in the UK and before the Court of Justice of the European Union, and coverage of the Digital Economy Act provisions. It can either be read from cover to cover as a thorough introduction to the subjects addressed or be used as a very useful starting point for a specialist practitioner faced with a particular problem on a particular case. With this in mind Information Technology and Intellectual Property Law is an essential addition to any an IT and IP practitioner's bookshelf as well as a useful textbook for non-specialists as well as advanced undergraduate and taught postgraduate IT and IP courses.

Nuclear Safeguards, Security and Nonproliferation James Doyle,2011-04-08 With an increase of global security concerns over potential terrorist acts, the threat of WMDs, and increasing political issues with nations seeking nuclear capability, the need to track, detect, and safeguard nuclear material globally has never been greater. Nuclear Safeguards, Security and Nonproliferation is a comprehensive reference that covers cutting-edge technologies used to trace, track, and safeguard nuclear material. It is a contributed volume with sections contributed by scientists from leading institutions such as Los Alamos National Labs, Sandia National Labs, Pacific Northwest Nuclear Labs, and Texas A&M University, and the Monterey Institute of International Studies. The book is divided into 3 sections and includes 30 chapters on such topics as - the security of nuclear facilities and material, the illicit trafficking of nuclear materials, improvised nuclear devices, how to prevent nuclear terrorism. International case studies of security at nuclear facilities and illegal nuclear trade activities provide specific examples of the complex issues surrounding the technology and policy for nuclear material protection, control and accountability. Specific cases include analysis of the timely issues in the nuclear programs of countries such as North Korea, Iran, and Kazakstan among others. Nuclear Security is a must-have volume for the dozens of private and public organizations involved in driving Homeland Security, domestic, and international policy issues relating to nuclear material security, non-proliferation, and nuclear transparency. Written by some of the world's top scientists including members of the Nuclear Division of Los Alamos National Labs (U.S.) A timely discussion of current international nuclear security issues includes case studies on Iraq, Iran and North Korea Book takes a global perspective on nuclear security and non-proliferation detailing the little-known real-world technologies used to secure, detect and track nuclear material
