On the Development of China's Information Technology Industry Jiang Zemin, 2009-11-13 In the early 1980's, Jiang Zemin, then Minister of Electronics Ministry of China, assessed the IT industry as 'the strategic high ground in international competition.' He perceived the discrepancy between China's level and the world's advanced level was so great that we had to do our utmost to catch up. Since then through numerous articles and frequent speeches he has drawn up a detailed technological and policy roadmap for doing exactly that. This volume collects over 25 pieces written over more than 20 years. It demonstrates the former president of China's authority and insight into the development of China's IT industry since the introduction of reforms, and the cutting-edge issues experienced throughout the global IT industry. Jiang's ambitious goal is the transformation of China into a leader in the global IT industry by 2020. This volume offers IT industry analysts, China watchers, policy makers and advisors, IT researchers, and investors a singular and authoritative view on how China should get there. Establishes key measurements for the development of China's IT industry Sets forth the priorities for government and industry Identifies opportunities for interrelating military and civilian R&D and applications Reveals key obstacles to progress and directives for

overcoming them Sets out an R&D agenda for industry Names the core industry sectors for government and industry investment Identifies opportunities and the necessity for international collaboration Establishes the need to develop China's own IPR and to respect and protect others' IPR

Language Shattered Maghiel van Crevel, 1996 Language Shattered is both a history of poetry from the People's Republic of China and a case study of the oeuvre of a leading Chinese poet. After the stifling orthodoxy of the 1950s and early 1960s, the terror of the Cultural Revolution (1966-1976) brought official Chinese literature to a total standstill. At the same time, disillusioned youths were more or less accidentally exposed to a varied body of foreign literature and began writing underground poetry. In the 1980s this poetry scene, now above ground, became one of pluriformity and proliferation in both official and unofficial circuits. The brutal suppression of the 1989 Protest Movement gave it an exile offshoot. The historical overview in Part I of this book is complemented in Part II by a discussion of Duoduo's poetry. Duoduo's career as a poet reflects the vicissitudes of Chinese Experimental poetry - and his beautiful, headstrong poems merit attention in themselves. They show that Chinese poetry is not just of interest as a chronicle of Chinese politics, but as literature in its own right.

The Literary Field of Twentieth Century China Michel Hockx, 2019-05-08 At least since the late nineteenth century onwards, Chinese literature as a form of cultural production has

been taking place within a specific social space, including writers, critics, journalists, editors, publishers, printers and booksellers. Focusing on people as well as on texts, and looking at what writers did as well as at what they wrote, the essays in this volume draw a vivid and variegated picture of Chinese literary life throughout the modern period. The book treats differences between periods, but also traces the continuities that have characterised modern Chinese literary practice and its discourses from the beginning to the present, including ties of allegiance, utilisation of 'the people' and appropriation of the west. The book places modern Chinese literature firmly within its socio-historical context, thereby increasing the reader's awareness of the hidden assumptions behind literary production. In doing so, it opens new perspectives on Chinese culture as a whole, and on literature as a cosmopolitan concept.

Plural Heritages and Community Co-production Christopher Whitehead, Tom Schofield, Gönül Bozoğlu, 2021-04-01
Plural Heritages and Community Co-production is a landmark contribution on the nature and plurality of heritages and how they can be creatively and ethically presented in urban space. Providing an overview of the concept of plural heritages, this book explores the theory, politics, and practice of community co-production as they intersect with currents in critical heritage thinking, walking as ethnography, and digital design methods. Told through a central case study in Istanbul, Turkey, this volume aligns with cultural and political imperatives to consider the plural values, meanings, affects, and relativities of heritage sites for the multiple communities who live – or, as for diaspora and displaced groups, have lived – with them. It suggests a range of methods for locating and valorising alternative perspectives to those centrally deployed

through museums or other institutions, such as UNESCO World Heritage listing, while also exploring the complexities of the past in the present and the ontology of heritage. *Plural Heritages and Community Co-production* will be of great interest to researchers, academics, postgraduate students in the fields of heritage and memory studies, museum studies, history, geography, cultural studies, sociology, anthropology, and politics. The book will also be of interest to heritage professionals, policy makers, and site managers involved in community engagement and participation.

The Strains of Eloquence Wesley T. Mott, 1989 The sermons of Ralph Waldo Emerson were central to his emergence as thinker and writer. This is the first extended study of the formative role of these long-neglected documents. Wesley Mott explores major topics and issues in Emerson scholarship: his vocational self-image; the significance and meaning of such quintessentially Emersonian concepts as self-reliance, the over-soul, and compensation; his sense of language his vision of America; his relation to Puritanism. Emerson's aphorisms, taken out of context, have enabled readers of every stamp to enlist him in their cause. Reformers, on the one hand, have claimed him as a prophet of social change, while, on the other hand, Henry Ford and Woody Hayes have found him a champion of conservative American values. These seemingly contradictory elements can be reconciled in large part by an understanding of Emerson's roots in liberal Christianity and of his lifelong religious habits of mind. Instead of regarding Emerson's career as a series of distinct stages (as Stephen Whicker did in *Freedom and Fate*), Mott emphasizes the essential continuity of his growth. David Robinson has so viewed Emerson's career as preacher and lecturer in *Apostle of Culture* (1982). Mott's study emphasizes the dynamics of specific sermons (mostly previously unpublished) and their role in shaping Emerson's understanding of major issues in his life of the mind. The book anticipates publication of *The Complete Sermons of Ralph Waldo Emerson*, to be issued by the University of Missouri

Press, 1989-92.
