The Broadcast News Toolkit Kirsten Johnson, Jodi Radosh, 2023-06-01 The Broadcast News Toolkit focuses on the writing, shooting, and production of broadcast news across multimedia platforms in a non-technical and visually engaging way. Covering a range of different story forms in broadcast news (RDR, FS, VO, VO/SOT, PKG, and Liveshots), this book illustrates basic audio/video shooting and editing techniques through straightforward examples, including online video tutorials that can be accessed via a QR code within the book. Specific issues relating to online content, social media, and audience engagement are discussed in detail, and the authors further explore why trust in news media is declining, the impact that fake news and deep fake videos have on media credibility in newsrooms, and what can be done to increase the perceived credibility of the news. Students will also learn how to write leads and teases that will keep viewers engaged. This is an ideal text for undergraduate and graduate students of Broadcast and Multimedia Journalism who are looking for a clear and concise guide to the modern digital newsroom.

The textbook is organized into five sections: building a foundation, storytelling and writing, producing, live performance, and ethics and career progression. The authors also provide step-by-step instructions on how to efficiently multitask while staying true to journalist ethics. Each chapter includes clear learning objectives, review questions and practical assignments, making it ideal for classroom use. QR codes integrated in the text allow students to easily see and hear examples of the stories they are learning to write. *Broadcast News in the Digital Age* is an engaging, student-friendly guide for those seeking to become successful writers, producers, anchors and journalists in today's newsrooms, both on-air and online.

Rogus, 2009-03-04 *Managing Television News* provides a practical introduction to the television news producer, one of the most significant and influential roles in a newscast. Rogus have combined their expertise and experience to shape this essential resource on the responsibilities, demands, and rewards of the news producer position. Their book provides a strategic approach to producing newscasts and serves as an in-depth guide to creating quality, audience-friendly newscasts working within the realistic limitations of most newsrooms. It helps the student and the professional producer sort through the various deadline-driven challenges of creating a 30-minute newscast. Filled with real-world examples and advice from news directors, producers, and anchors currently in the business, and photographs illustrating the varied perspectives in the position, *Managing Television News* provides critical skill sets to help resolve ethical dilemmas, as well as keen and fresh insights on how to win the ratings without compromising news quality. Career concerns are also addressed. This resource is a pioneering book for the professional television newsroom and the individual reader interested in starting or expanding a producing career. September's Camera Jeffrey Scarborough,2007-03 Jeff Scarborough was the only cameraman on duty at WNBC's newsroom in New York when the attacks of 9/11 began. Armed with privileged information from the '93 attack on the World Trade Center-realizing both towers were doomed-Jeff pulled out of an emergency convoy just short of the WTC as he and reporter Rob Morrison approached the burning towers. Taking charge at the scene, Jeff ordered live-truck engineer Eddie Alonzo to stay 500 feet away and told all responding crews to back-off-dangerously becoming NBC's sole cameraman broadcasting live from Ground Zero. He permitted only the live-shot reporter to join him at his camera position-and during their live broadcast, the South Tower collapsed. They ran for their lives; Jeff rescued Eddie and stayed to videotape the panic and the North Tower collapse. September's Camera is the story of that fateful day, and of a career lived on the edge of danger-as Jeff's lens captured conflict, urban riots, blackouts, serial killers, plane crashes and human frailty in all its forms.

Anchored in Bias, Fired Over "White Tears" Lisa Benson, 2020-09-11 In this timely book, journalist Lisa Benson shares her journey from the newsroom to the courtroom in her fight for justice at a local television station. Lisa made national news when her twenty-year career as a news reporter / anchor ended abruptly after she shared an article on her personal Facebook page entitled, *How White Women Use Strategic Tears to Avoid Accountability* written by fellow journalist Ruby Hamad—an article that offended two of her white female coworkers, which ultimately got her fired. After being terminated for sharing TheGuardian.com article, Lisa committed herself to understanding racism, unconscious biases, institutionalized racism, and how those issues factored into her stagnant career and job loss. In this book, courtroom testimony, along with exhibits, prove that the employer expected to support Lisa's career goals only wanted to harness and control her labor while silencing her voice. Guilty of racial ignorance, Lisa foolishly believed that if she worked hard, played by the rules, and people liked her, she could avoid the racial pitfalls that swallowed the dreams of her forefathers and condemned others to a life of criminalization, poverty, and shame. She was wrong. Lisa's book is a powerful, transparent look at the racism, systemic racism, and the anti-blackness that exists in cities, neighborhoods, and newsrooms throughout the United States. Hi Lisa, I am so sorry to hear of this ordeal - I can only imagine the impact. I am glad you have turned to anti-racist education, and I hope my work has been/can be helpful to you. But for what it is worth - on behalf of my fellow white people, I apologize. -Robin DiAngelo, author of *White Fragility* Lisa Benson is a diversity, inclusion and anti-racism consultant, speaker, author and Emmy-award winning journalist. She has helped countless people understand unconscious biases and systemic racism. Lisa wants her knowledge and first-hand experiences to help others navigate systems, institutions and organizations when it comes to race and institutionalized racism.

Ryan, bestselling author Colorful characters, intriguing, intelligent mystery, plus the state of Wyoming leaping off every page. - Emilie Richards, USA Today bestselling author Be prepared for lots of twist and turns. I read it in one sitting. I hadn't planned it that way, but just couldn't stop. The characters were a mix of funny, sad, and quirky and were totally believable. There was just enough humor to lighten the story, but not to disrespect the seriousness of crime. What an entertaining story, great characters and a fun, sometimes funny mystery! On to the next in the series, lots of fun! The writing is excellent, the twists and turns keep the brain engaged, and Elizabeth's wry commentary keeps a smile on my face. E.M.'s internal monologues are sharp, snappy and often hilarious. "If you haven't started reading this series and you enjoy reading funny, sassy, interesting, characterful books, then start at book one and continue through. You won't be sorry." Hoping this series lasts forever! McLinn has created in E.M. a female protagonist who is flawed but likable, never silly or cartoonish, and definitely not made of cardboard. While the mystery itself is twisty-turny and thoroughly engaging, it's the smart and witty writing that I loved the best. - Diane Chamberlain, bestselling author "I would recommend anyone who loves a good mystery to start reading now. Medical Image Computing and Computer-Assisted Intervention -- MICCAI 2004

Christian Barillot, David R. Haynor, Pierre Hellier, 2011-04-05 The 7th International Conference on Medical Imaging and Computer Assisted Intervention, MICCAI 2004, was held in Saint-Malo, Brittany, France at the "Palais du Grand Large" conference center, September 26-29, 2004. The purpose of MICCAI 2004 was to strongly encourage and support IRISA, Rennes. IRISA is a publicly funded national research laboratory with a staff of 370, including 150 full-time research scientists, 115 postgraduate students. INRIA, the CNRS, and the University of Rennes 1 are all partners in this mixed research unit, and all three organizations were helpful in supporting MICCAI. MICCAI has become a premier international conference with in-depth perspectives on the multidisciplinary fields of medical image computing, computer-assisted intervention and medical robotics. The conference brings together clinicians, biological scientists, computer scientists, engineers, physicists and other researchers and offers them a forum to exchange ideas in these exciting and rapidly growing fields. The impact of MICCAI increases each year and the quality and quantity of submitted papers this year was very impressive. We received a record 516 full submissions (8 pages in length) and 101 short communications (2 pages) from 36

different countries and 5 continents (see figures below). All submissions were reviewed by up to 4 external reviewers from the Scientific Review Committee and a primary reviewer from the Program Committee. All reviews were then considered by the MICCAI 2004 Program Committee, resulting in the acceptance of 235 full papers and 33 short communications.
