Finding Felicity Thomas Biehl, 2015-05-02 Passed over for a promotion at work, Devin wonders if his life has meaning; will he ever find that elusive happiness human beings all seek. While at a party attempting to drown his sorrows, the host suffers a tragic accident. Moments later, Devin meets the beautiful and mysterious Felicity, who somehow knows this dead man's tale. Felicity offers to share with him the whirlwind romance of Professor Ardor, who gets lost in the deceptive perfection of escapism. Using this and subsequent allusive stories, Devin's interactions with this enigmatic woman help him uncover the faulty ways people search for happiness, when the feelings they find are fleeting. Only then, can he discover genuine happiness and bring lasting meaning to his life.

The Person I Am Today Thomas Biehl, 2022-08-10 Some people don't know they are time travelers, because every time they change something in the past their memories get rewritten. Ollie finds out his girlfriend has disappeared moments before he intended to propose to her. Brad intends to win the favor of his boss by meddling in his daughter's life only to have the tables turned on him. Ketch discovers he is going to be a father and struggles to better his life.

Similarity-Based Clustering Thomas Villmann, M. Biehl, Barbara Hammer, Michel Verleysen, 2009-05-14 Similarity-based learning methods have a great potential as an intuitive and flexible toolbox for mining, visualization, and inspection of large data sets. They combine simple and human-understandable principles, such as distance-based classification, prototypes, or Hebbian learning, with a large variety of different, problem-adapted design choices, such as a data-optimum topology, similarity measure, or learning mode. In medicine, biology, and medical bioinformatics, more and more data arise from clinical measurements such as EEG or fMRI studies for monitoring brain activity, mass spectrometry data for the detection of proteins, peptides and composites, or microarray profiles for the analysis of gene expressions. Typically, data are high-dimensional, noisy, and very hard to inspect using classic (e. g. , symbolic or linear) methods. At the same time, new technologies ranging from the possibility of a very high resolution of spectra to high-throughput screening for microarray data are rapidly developing and carry the promise of efficient, cheap, and automatic gathering of tons of high-quality data with large information potential. Thus, there is a need for appropriate machine learning methods which help to automatically extract and interpret the relevant parts of this information and which, eventually, help to enable understanding of biological systems, reliable diagnosis of faults, and therapy of diseases such as cancer based on this information. Moreover, these application scenarios pose fundamental and qualitatively new challenges to the learning systems - cause of the specifics of the data and learning tasks. Since these characteristics are particularly pronounced within the medical domain, but not limited to it and of principled interest, this research topic opens the way toward important new directions of algorithmic design and accompanying theory.

Seven Mile Bridge Michael Biehl, 2012-09-20 Michael Biehl's first two novels, mysteries featuring medical law, were highly critically acclaimed. Now he enters new territory with an intensely introspective mystery, so finely written that *Seven Mile Bridge* transcends the genre—but still keeps you turning pages to find out who, if anyone, did it. Jonathan Bruckner, a middle-aged Florida Keys diveshop owner with a taste for whiskey and not much else, has returned to his Wisconsin childhood home after his mother's death. He knows he should tidy up, sell the house, and get back to the Keys. But he admits his journey home has deeper objectives. I didn't travel from Marathon, Florida, to Sheboygan, Wisconsin, and close my dive shop for three weeks because I thought I would find valuables or money in the house on Foxglove Lane. I came because I thought I might find answers.

What he finds in sifting through the sad remnants of his once-happy family life spins him back to the quest that obsessed him in his early adult years. When he was seventeen, he found his father dead in the garage. All the grownups said it was suicide, but Jonathan thought he knew better. He risked his life and compromised his future trying to find his father's killer. He has lived his entire adult life under the cloud of his father's death, isolated by suspicion and frustrated by his failure to uncover the truth. He now has one final chance to solve the mystery and track down whoever was responsible. Now, more than half my adult life is behind me, and where am I? Fearful that the blood of monsters runs in my veins, hoping for vindication, desperate for resolution one way or the other. As he searches for clues to his father's death, Jonathan is stunned by what he discovers about his father's life, and comes to know his parents in a way he never did as a child. He is shocked to find that he may have had a sister he never knew, and rediscovers his relationship with his schizophrenic brother. Mostly, he is surprised by what he learns about himself. Fluidly moving between past and present, between hope and despair, *Seven Mile Bridge* is a story about one man's obsession with the truth, and how much can depend on finding it.

Personal Money Management Thomas Edwards Bailard, David Lawrence Biehl, Ronald Walter Kaiser, 1973

The Good-natured Feminist Catriona Sandilands, 1999 Heroic mothers defending home and hearth against a nature deformed by multinationalist corporate practice: this may be a compelling story, but it is not necessarily the source of valid feminist or ecological critique. What's missing is the democratic element, an insistence on bringing to public debate all the relations of gender and nature that such a view takes for granted. This book aims to situate a commitment to theory and politics -- that is, to democratic practice -- at the center of ecofeminism and, thus, to move toward an ecofeminism that is truly both feminist and ecological. The Good-Natured Feminist inaugurates a sustained conversation between ecofeminism and recent writings in feminist postmodernism and radical democracy. Starting with the assumption that ecofeminism is a body of democratic theory, the book tells how the movement originated in debates about nature in North American radical feminisms, how it then became entangled with identity politics, and how it now seeks to include nature in democratic conversation and, especially, to politicize relations between gender and nature in both theoretical and activist milieus.

The Hunsbergers, 1995 The Hunsperger/Hunsberger/Huntsberger/Huntzberger families originally of Canton Bern, Switzerland. By about 1720 three brothers, Hans, Jacob and Ulrich Hunsperger, were living in Franconia Twp., Philadelphia Co., Pennsylvania. Hans had no known descendants. Therefore descendants in these books are mainly those of Jacob and Ulrich's. Includes other Huntzberger/Hunsberger etc. families that cannot be connected to these three brothers at this time. Family members have migrated all over the United States and Canada.

The Lyles of Washington County, Pennsylvania Alvin Dinsmore White, 1963 Robert Lyle (1698-1765), of Scottish lineage, immigrated from Ireland to New Brunswick, New Jersey in 1742. Descendants lived in New Jersey, Pennsylvania, Tennessee, Ohio and elsewhere.

Sensors in Science and Technology Ekbert Hering, Gert Schönfelder, 2022-01-21 Sensors are used to measure physical, chemical and biological quantities. The book offers a comprehensive overview of physical principles, functions and applications of sensors. It is structured according to the fields of activity of sensors and shows their application by means of typical examples. Measured variables that can be recorded by sensors are e.g. mechanical, dynamic, thermal, electrical and magnetic. Furthermore, optical and acoustical sensors are discussed in detail in the book. The sensor signals are recorded, processed and converted into control signals for actuators. Such sensor systems are also presented.

Subjectivity João Biehl, Byron Good, Arthur Kleinman, 2007-04-11 Talks about the ways personal lives are being undone and remade today. This book examines the ethnography of the modern subject, probes the continuity and diversity of modes of personhood across a range of Western and non-Western societies. It considers what happens to individual subjectivity when environments such as communities are transformed.
