**De Gruyter Handbook of Responsible Project Management** Beverly L. Pasian, Nigel L.

Williams, 2023-01-30 The narrative about the project management profession is dominated by discussions of “success” and “failure” along with the need to improve the competence of project managers. As a result, the community is engaged in a fruitless search for a combination of tools, techniques and practices that will result in desired outcomes for funders. While the profession has made recent attempts to incorporate environmental and social responsibility, these areas are still framed within the existing discourses of project delivery. The De Gruyter Handbook of Responsible Project Management seeks to rethink project management by integrating contributions from the emerging responsible Management domain. This handbook will explore the nature and extent of project professionals’ responsibility at different levels – individual, team, organizational and societal – along with the implications for education, research and practice. The De Gruyter Handbook of Responsible Project Management offers cutting-edge insights into the field of project management. It is an essential reference for scholars and practitioners.

**The Exercise Professional's Guide to Optimizing Health** Jeffrey L. Roitman, Tom La Fontaine, 2011  
Published in cooperation with the American College

of Sports Medicine, The Exercise Professional's Guide to Optimizing Health enables you to design and implement exercise programs based on the latest research to help people avoid the onset of chronic disease. Moreover, it shows you how to design exercise programs so that people with chronic disease can safely benefit from exercise. This text begins with an overview of the epidemiology of chronic disease and is then divided into three parts. Part One clearly explains pathophysiology concepts common to all chronic diseases as well as the healthful effects of exercise and nutrition. Part Two covers atherosclerosis, obesity, diabetes and metabolic syndrome, hypertension, and dyslipidemia, with specific recommendations for effective exercise programs to manage each disease. Finally, Part Three discusses behavior change and then summarizes all the exercise prescription information for each chronic disease in a single chapter.

The Mammary Gland / Human Lactation / Milk Synthesis Bruce L. Larson, 2013-10-22 Lactation: A Comprehensive Treatise, Volume IV, The Mammary Gland/Human Lactation/Milk Synthesis, forms the fourth in a series. When the first three volumes were published in 1974, publication of future volumes was not contemplated. However, the gratifying acceptance by the scientific community and the continuation of rapid advances in lactation, have provided the impetus for the continuation of the series. The present volume is concerned with general aspects of the mammary gland, human lactation, and mechanisms of milk

synthesis. The volume is divided into three main parts. Part I covers some aspects of the mammary gland and lactation not discussed in the first three volumes and expands on others. Topics discussed include the development of the mammary apparatus and neuroendocrine control of lactation. Part II is devoted to more specific consideration of human lactation as a whole. It includes studies on breast feeding and the breast cancer process. Part III on milk synthesis deals with the mechanisms of milk synthesis; enzymology and control of lactose biosynthesis; molecular aspects of milk protein biosynthesis; and ion and water transport in the mammary gland.

*Inorganic Reaction Mechanisms A G*

Sykes, 2007-10-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years the Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three, volumes covering Inorganic, Organic and Physical Chemistry. For more general coverage of the highlights in

chemistry they remain a 'must'. Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume.

*High-Density Lipoproteins* Christopher J. Fielding, 2008-11-21 This book meets the long-awaited need for a comprehensive overview of the biological role of HDLs. Edited by one of the pioneers in HDL and cholesterol research, this monograph summarizes current knowledge on HDL turnover, regulation and physiology. Clearly structured, the various sections cover HDL structure, formation, secretion and removal, as well as plasma metabolic factors. The biological activities and clinical aspects are equally discussed, as is the impact of HDL on common diseases and their prevention.

**Synchrony and Diachrony** Anna Giacalone Ramat, Caterina Mauri, Piera Molinelli, 2013-05-31 The focus of this volume is on the relation between synchrony and diachrony. It is examined in the light of the most recent theories of language change and linguistic variation. What has traditionally been treated as a dichotomy is now seen rather in terms of a dynamic interface. The contributions to this volume aim at exploring the most adequate tools to describe and understand the manifestations of this dynamic interface. Thorough

analyses are offered on hot topics of the current linguistic debate, which are all involved in the analysis of the synchrony-diachrony interface: gradualness of change, synchronic variation and gradience, constructional approaches to grammaticalization, the role of contact-induced transfer in language change, analogy. Case studies are discussed from a variety of languages and dialects including English, Welsh, Latin, Italian and Italian dialects, Dutch, Swedish, German and German dialects, Hungarian. This volume is of great interest to a broad audience within linguistics, including historical linguistics, typology, pragmatics, and areal linguistics.

**High-Density Lipoproteins as Biomarkers and Therapeutic Tools** Kyung-Hyun Cho, 2019-05-27 This book is the first of two volumes that offer a comprehensive, up-to-date account of current knowledge regarding high-density lipoprotein (HDL), the changes that occur in HDL under different conditions, the clinical applications of HDL, and means of enhancing HDL functionality. HDL comprises a diverse group of lipoproteins and its composition and metabolism are dynamic. In this volume, the focus is on the changes observed in HDL under different health statuses, with particular attention to the functional and structural correlations of HDL and apolipoprotein A-1. The impacts of a wide variety of factors on HDL are examined in depth, covering, for example, diet, exercise, smoking, age, diverse diseases, and different forms of environmental pollution. It

has long been known that HDL has anti-atherosclerotic and antidiabetic properties, and more recently its anti-aging activities have been recognized. These benefits of HDL are highly dependent on its lipids, proteins, apolipoproteins, and enzymes, and specifically their composition and ratios. In documenting the latest knowledge in this field, this volume will be of interest to both researchers and clinicians.

*Telamonian Ajax* Sophie Marianne Bocksberger,2022-01-22 *Telamonian Ajax* provides a complete overview of the development of Telamonian Ajax's myth in archaic and classical Greece. Bocksberger's study focuses on the Panhellenic figure of Ajax in early Greek hexameter poetry and archaic art, in the art of archaic and classical Aegina, and in the art of archaic and classical Athens.

**Molybdenum Enzymes** Thomas G. Spiro,1985-11-14 Volume 7 in the Metal Ions in Biology Series, divided into two parts, covers the nitrogenase enzyme complex and the molybdenum redox enzymes. Part one covers the chemistry of Mo-Fe-S clusters and their relationship to nitrogenase, cofactor chemistry and biochemistry of nitrogenase, spectroscopic and electrochemical studies of the Fe-Mo cofactor and Fe-S clusters, and more. Part Two surveys oxo-molybdenum chemistry, discusses the nature of the molybdo-pterin complex, and

describes the characteristics of several of the Mo redox enzymes.

*Cultures of Empire: Rethinking Venetian Rule, 1400–1700*, 2020-07-27 This book investigates perceptions, modes, and techniques of Venetian rule in the early modern Eastern Mediterranean (1400–1700) between colonial empire, negotiated and pragmatic rule; between soft touch and exploitation; in contexts of former and continuous imperial belongings; and with a focus on representations and modes of rule as well as on colonial daily realities and connectivities.

**Essays on Ancient History** Chester G. Starr, 1979

Lexique. Lexicologie. Lexicographie. Pierre Swiggers, Alfons Wouters, 2003 A joke, one might think, knowing that ancient grammar famously lacked a syntactic component. Not so, say the scholars: the very absence of the category syntax calls for theoretical and historical analysis, and a scratch at the surface reveals that ancient grammarians did indeed recognize and deal with various aspects of syntax. The 16 papers, five of them in English and the others in German or French, look at syntactic description and reflection in antiquity, Alexandrian grammarians and syntax, virtues and vices of speech, and the Latin and Byzantine heritage. *Onomatopoeia in the World's Languages* Lívia Körtvélyessy, Pavol Štekauer, 2024-04-01 This is the

very first publication mapping onomatopoeia in the languages of the world. The publication provides a comprehensive, multi-level description of onomatopoeia in the world's languages. The sample covers six macro-areas defined in the WALS: Euroasia, Africa, South America, North America, Australia, Papunesia. Each language-descriptive chapter specifies phonological, morphological, word-formation, semantic, and syntactic properties of onomatopoeia in the particular language. Furthermore, it provides information about the approach to onomatopoeia in individual linguistic traditions, the sources of data on onomatopoeia, the place and the function of onomatopoeia in the system of each language.

**Histones and Other Basic Nuclear Proteins** Gary S. Stein, Janet L. Stein, 1989-06-30 This comprehensive book is a compilation of Professor Lubomir S. Hnilica's twenty years of research experimentally addressing the chemistry and the biological functions of chromosomal proteins. The histones and other nuclear proteins found associated with DNA in a number of tissues and cell types are featured. Lubomir Hnilica played a major role in establishing the extent to which these basic chromosomal polypeptides are conserved and the manner in which they interact with DNA to modify chromatin structure. In addition, non-histone chromosomal protein research is explained, and his technique of applying several biochemical and immunological approaches to the characterization of this complex and heterogeneous class of chromosomal polypeptides is discussed. Highlighted is the use of chemical crosslinking

for studying protein/DNA interactions in intact cells. The proteins as well as the structure, organization, and regulation of the genes are also presented.
