**Recent Advances in the Message Passing Interface** Rainer Keller, Edgar Gabriel, Jack Dongarra, 2010-09-07 Annotation This book constitutes the proceedings of the 17th European MPI User's Group Meeting on Recent Advances in the Message Passing Interface held in Stuttgart in September 2010.

**Parallel Computing** Barbara Chapman, 2010 From Multicores and GPUs to Petascale. Parallel computing technologies have brought dramatic changes to mainstream computing the majority of today's PCs, laptops and even notebooks incorporate multiprocessor chips with up to four processors. Standard components are increasingly combined with GPUs Graphics Processing Unit, originally designed for high-speed graphics processing, and FPGAs Free Programmable Gate Array to build parallel computers with a wide spectrum of high-speed processing functions. The scale of this powerful hardware is limited only by factors such as energy consumption and thermal control. However, in addition to

**Applied Parallel Computing** Bo Kagström, Erik Elmroth, Jack Dongarra, Jerzy Wasniewski, 2007-09-22 This book constitutes the thoroughly refereed post-proceedings of the 8th International Workshop on Applied Parallel Computing, PARA 2006. It covers partial differential equations, parallel scientific computing algorithms, linear algebra, simulation environments, algorithms and applications for blue gene/L, scientific computing tools and applications, parallel search algorithms, peer-to-peer computing, mobility and security, algorithms for single-chip multiprocessors.

**Stopping Spam** Alan Schwartz, Simson Garfinkel, 1998 Schwartz explores spam--unwanted e-mail messages and inappropriate news articles--and what users can do to prevent it, stop it, or even outlaw it. Stopping Spam provides information of use to individual users (who don't want to be bothered by spam) and to system, news, mail, and network administrators (who are responsible for minimizing spam problems within their organizations or service providers).

**The 1920 Olympic Games** Bill Mallon, Anthony Th. Bijkerk, 2015-07-11 Until this volume was compiled, the results of the 1920 Olympics held in Antwerp, Belgium, have been far from complete. The Antwerp organizing committee typed up a report of the results almost as an afterthought because it was so financially strapped after the games. For some events only the medalists are listed, with little, if any, additional information. Very few copies were ever produced, and those few copies were in French. The seventh in a series on the early Olympics, this work fills a gap in the recording of early Olympics history by providing complete results for all competitors and all events (except for shooting, which has only partial information available). In virtually all cases, a 1920 source has been used in preference to a more modern source of information, and all details have been fully researched in contemporary newspapers, journals, and magazines and checked for accuracy by experts on various sports from all over the world.

**The Antibody Molecule** Anthony R. Rees, 2014-10-30 The Antibody Molecule follows the extraordinary journey of the medics and scientists who shaped the course of medical advances in the field of immunology. One of the oldest of the medical sciences, immunology has a history that has seen chemists, physicists and biologists alike seeking to unravel the most complex system in the human body outside the brain. This book charts its intriguing history, from the genetic basis of antibody diversity, through the understanding of the mechanism by which the immune system's first line of defence works, to breakthroughs in crystallography and the exploitation of immunoglobulins as therapeutic platforms to treat cancer, inflammation and allergy. Tracing the developments in immunology in chronological order, Professor Anthony R. Rees presents the historical contexts of the periods in rich detail, bringing them to life with quotes and illustrations. This fascinating book examines the literature of the time, turning points, and controversies. A must read for immunologists and life scientists, as well as historians of science and medicine.
