Among Tigers K. Ullas Karanth,2022-11-01 Today ten times more tigers live in captivity than survive in the wild. For over five decades, K. Ullas Karanth has been engaged in the struggle to bring wild tigers back from the brink in India, their last remaining wild stronghold. He tells the story of the tiger itself—its incredible biology, its critical role in shaping natural ecosystems of Asia, and the unique place it holds in our collective imagination. Among Tigers is the story of how we wound up with fewer than 5,000 wild tigers, and how, with focused efforts we can grow that population ten times or more in a few decades. In doing so, we would bring not only the world's largest and most beloved feline back from the brink, but also save countless other species that share the tigers habitats from the freezing forests of Siberia to the tropics of India. Karanth shares the adventurous real-life story of his quest to save a species and, along the way, the hopeful realization that tiger conservation is a battle that can be won. Ultimately, the book is a roadmap showing us how to not only to save the greatest of great cats, but to bring it roaring back at numbers never before seen in our lifetimes.

Redefining Diversity and Dynamics of Natural Resources Management in Asia, Volume 1 Ganesh Shivakoti,Ujjwal Pradhan,Helmi Helmi,2016-09-01 Redefining Diversity and Dynamics of Natural Resources Management in Asia, Volumes 1-4 brings together scientific research and policy issues across various topographical area in Asia to provide a comprehensive overview of the issues facing the region. Sustainable Natural Resources Management in Dynamic Southeast Asia, Volume 1, pulls together regional experts in the field to look specifically at sustainability issues across the region, to see what has been implemented, what the impacts have been, and what other options are available. In the race to be a developed region, many Southeast Asian countries have foregone natural resources through haphazard use. As a result, the people are faced with numerous environmental challenges, particularly deforestation and forest degradation, biodiversity loss and ecosystem degradation, reduction in soil quality, and decreases in the quantity of available water. Community-based forest management is the involvement of local communities in the protection, conservation and management of public forests to prevent degradation through sustainable practices while still responding to the basic social and economic needs of local populations. When the people who depend on forest resources for their livelihoods are jointly responsible for managing and protecting them, they tend to do so in a more sustainable manner by focusing on the long-term benefits rather than the immediate short-term gains. However, when tenure rights are weak, unclear, or insecure, or offer limited benefits, people are incited in extracting more immediate benefits, resulting in suboptimal forest management and the reduction of carbon stocks. Features case studies that cover issues such as rising levels of deforestation, forest degradation, regional food security, ecosystem degradation, biodiversity loss, conflicts over natural resource use, water management issues, and impacts on local communities Includes contributions from local researchers who are dealing with these issues first hand, and on a daily basis Includes a comparative review on REDD+ implementation in different communities Focuses on sustainability issues across the region

Fear, Anger and Worry: Paano Ko Iha-handle? Harold Sala,

The Tiger Diaries Nayona Nag,2023-09-06 Tiger Diaries - the diary of a little Indian girl fascinated with the Tiger. Tiger Diaries gives us snippets into the world of Sumatran, Siberian and of course The Royal Bengal Tiger. The book peers into the thick foliage of the Indian ‘jungles’ and finds stories to share about her famous tigers like Machli, Collarwali, Avni, Zalim T25 and Dollar. Nayona’s journey, trials and travails as she documents her passion, from 6th to 8th grade, in a little diary, with newspaper cuttings, and smoking hot commentary on her day-to-day shenanigans tracking the magnificent beast, for other young readers to read, laugh, wonder and feel incredulously impassioned just as she is about The Royal Bengal Tiger! ROAR!

Traditional Chinese Characters Alan Hoenig,Professor of Mathematics Alan Hoenig, Dr,2013-01-31 The pioneering memory technique taught in this book removes the major obstacle to learning modern Mandarin Chinese: how to remember the meanings of more than 2,000 of the most common of traditional Chinese characters--enough to read more than 96 percent of the characters in almost any Chinese text. The lessons included here will help to learn new definitions at a breakneck pace, build up new characters using characters already learned, develop memory tricks to associate meanings with these characters, and fix meanings and characters forever in the mind. This unique manual provides a sure-fire way to master the most challenging and intimidating aspect of learning Chinese, vital for any student of the Chinese language.

The Tiger Prince Chen Jiang Hong,2018-10-23 A magnificently illustrated Chinese folklore tale about a tigress, a seer, a King, and the prince, who must leave his family and learn the ways of the tigers so that the war between man and animal can end. Deep in the Great Forest, a tigress is mourning the death of her tiger babies who have been killed by hunters. Seeking revenge, she attacks the villages, destroying houses and prompting the king to gather his army. But a seer named Lao Lao warns the king that if he angers the tigress further she will destroy the kingdom. Lao Lao counsels the king to give his own son to the tigress and promises that no harm will come to the boy. The next morning, the king brings the prince to the edge of the Great Forest and tells him, “Now you must go on alone.” To end the war between man and animal, the prince must forget his human ways and begin to learn what tigers know. The Tiger Prince was inspired by The Tigress, a late Shang dynasty bronze vessel in the Cernuschi Museum in Paris depicting a scene from the Chinese folktale of a baby raised by a tigress.

Korean Myths and Folk Legends Hwang Pae-Gang,2006-01-20 This book is a collection of myths and legends describing the beliefs and customs of the ancient people in the formative stage of Korean civilization,

and will help the reader understand the Korean people, their traditions and their culture. The twenty-eight myths and legends in this volume are selected from several books of historic importance. Though they have been enjoyed throughout the ages in Korea, they are not known outside so well and this volume will fill that void.

A World Checklist of Birds Burt L. Monroe,Charles G. Sibley,1997-02-27 Many field ornithologists record where and when they identify species of birds, especially when they encounter a species out of its normal range or for the first time. Until now, however, a checklist based on the Sibley-Ahlquist-Monroe classification has not been available. In this book, Burt L. Monroe, Jr., and Charles G. Sibley provide a list of 9,702 living avian species based on their 1990 book Distribution and Taxonomy of Birds of the World and its 1993 Supplement.

The Monkey and The Tiger Robert Hans van Gulik,1992 In the first [story], a gibbon drops an emerald in the open gallery of Dee's official residence, leading the Judge to discover a strangely mutilated body in the woods. In the second, Dee is traveling to the imperial capital to assume his new position when he is separated from his escort by a flood and marooned in a large country house surrounded by fierce bandits--P. Tigers of the World Ronald Tilson,Philip J. Nyhus,2009-11-30 The second edition of Tigers of the World explores tiger biology, ecology, conservation, management, and the science and technology that make this possible. In 1988, when the first edition was published, tiger conservation was still in its infancy, and two decades later there has been a revolution not only in what is known, but how information about tigers is obtained and disseminated. In the fast changing world of conservation, there is a great need to summarize the vast and current state-of-the-art, to put this into historical perspective, and to speculate in what yet remains to be done. Tigers of the World, 2e fulfills this need by bringing together in a unique way the world's leading tiger experts into one volume. Despite the challenges ahead, there are bright spots in this story and lessons aplenty not only for tiger specialists but large carnivore specialists, conservation biologists, wildlife managers, natural resource policymakers, and most importantly the caring public. *Examines the past twenty years of research from the world's leading tiger experts on biology, politics, and conservation. *Describes latest methods used to disseminate and obtain information needed for conservation and care of this species. *Includes coverage on genetics and ecology, policy, poaching and trade, captive breeding and farming, and the status of Asia's last wild tigers. *Excellent resource for grad courses in conservation biology, wildlife management, and veterinary programs. *New volume continues the classic Noyes Series in Animal Behavior, Ecology, Conservation and Management.
