Borussia Dortmund consoled themselves with the runners-up spot and a place in the Champions League final. This was the year when everyone sat up and took notice of German football. Chemosensors of Ion and Molecule Recognition J.P. Desvergne, A.W. Czarnik, 2012-12-06 In the broad field of supramolecular chemistry, the design and hence the use of chemosensors for ion and molecule recognition have developed at an extraordinary rate. This imaginative and creative area which involves the interface of different disciplines, e.g. organic and inorganic chemistry, physical chemistry, biology, medicine, environmental science, is not only fundamental in nature. It is also clear that progress is most rewarding for several new sensor applications deriving from the specific signal delivered by the analyte-probe interaction. Indeed, if calcium sensing

in real time for biological purposes is actually possible, owing to the emergence of efficient fluorescent receptors, other elements can also be specifically detected, identified and finally titrated using tailored chemosensors. Pollutants such as heavy metals or radionuclides are among the main targets since their detection and removal could be envisioned at very low concentrations with, in addition, sensors displaying specific and strong complexing abilities. Besides, various species of biological interest (or others, the list is large) including sugars and other miscellaneous molecules such as oxygen and carbon dioxide can be actually probed with optodes and similar devices. The present volume in which the key lectures of the workshop are collected gives a survey of the main developments in the field. The success of the workshop mainly came from the high quality of the lectures, the invited short talks, the two posters sessions and the many very lively discussions which without doubt will produce positive outcomes.

Advances in Service and Industrial Robotics Carlo Ferraresi, Giuseppe Quaglia, 2017-07-24 This volume contains the proceedings of the 26th International Conference on Robotics in Alpe-Adria-Danube Region, RAAD 2017, held at the Polytechnic University of Turin, Italy, from June 21-23, 2017. The conference brought together academic and industrial researchers in robotics from 30 countries, the majority of them affiliated to the Alpe-Adria-Danube Region, and their worldwide partners. RAAD 2017 covered all major areas of R&D and innovation in robotics, including the latest research

trends. The book provides an overview on the advances in service and industrial robotics. The topics are presented in a sequence starting from the classical robotic subjects, such as kinematics, dynamics, structures, control, and ending with the newest topics, like human-robot interaction and biomedical applications. Researchers involved in the robotic field will find this an extraordinary and up-to-date perspective on the state of the art in this area.

Bundesliga 2011-2012 Simon Barclay, 2012 The exciting conclusion to the 2011-12 Bundesliga season saw Borussia Dortmund retain the title with a record points total ahead of Bayern Munich. At the other end of the table there were stormy relegations for Cologne and Hertha Berlin as well as a poor Kaiserslautern side. Augsburg surprised many by keeping their Bundesliga status in their debut season. Schalke 04 will join the top two in the Champions League in 2012-13 thanks in no small part to Klaas-Jan Huntelaar's 29 league goals. This 373-page book details every match of the season, with week-by-week tables showing the teams' movements throughout the 34 rounds of matches. Every match line-up is included, along with details of every player appearance. Finally, this comprehensive record also provides statistics on attendances, referees performances, disciplinary records and goalscorers. Fully in English.

Blue Maneuver Linda Andrews, 2016-06-17 The extraterrestrials have landed. And they're human. Now one out of work accountant stands between the invaders

and world domination. Rae Hemplewhite didn't believe in aliens until a close encounter with out-of-this-world technology drags her into the extraterrestrial security program. Helping alien refugees adjust to life on Earth is difficult enough, but her first clients have a price on their heads. Plus, her new partner seems torn between the urge to kiss her or kill her. And that's the good news. The bad news: plans are afoot to force Earth's governments into alliances that benefit the alien civilizations. If Rae doesn't keep her witnesses alive long enough to transfer their top secret information to the right faction of humanity, Earth will become a battlefield. Blue Maneuver is the first installment in an action-packed urban sci-fi adventure. If you like stepping into the head of a quirky and sassy heroine while she navigates a world of conspiracies, suspicion, and alien encounters, then you'll love Linda Andrews' humorous series starter. Rationality in Social Science Ivar Krumpal, Werner Raub, Andreas Tutić, 2021-09-02 The concept of rationality and its significance for theory and empirical research in social science are key topics of scholarly discussion. In the tradition of an analytical as well as empirical approach in social science, this volume assembles novel contributions on methodological foundations and basic assumptions of theories of rational choice. The volume highlights the use of rational choice assumptions for

research on fundamental problems in social theory such as the emergence, dynamics, and effects of social norms and the conditions for cooperation and prosociality.

Managing Safety of Heterogeneous Systems Yuri Ermoliev, Marek Makowski, Kurt Marti, 2012-02-01 Managing safety of diverse systems requires decision-making under uncertainties and risks. Such systems are typically characterized by spatio-temporal heterogeneities, inter-dependencies, externalities, endogenous risks, discontinuities, irreversibility, practically irreducible uncertainties, and rare events with catastrophic consequences. Traditional scientific approaches rely on data from real observations and experiments; yet no sufficient observations exist for new problems, and experiments are usually impossible. Therefore, science-based support for addressing such new class of problems needs to replace the traditional “deterministic predictions” analysis by new methods and tools for designing decisions that are robust against the involved uncertainties and risks. The new methods treat uncertainties explicitly by using “synthetic” information derived by integration of “hard” elements, including available data, results of possible experiments, and formal representations of scientific facts, with “soft” elements based on diverse representations of scenarios and opinions of public, stakeholders, and experts. The volume presents such effective new methods, and illustrates their applications in different problem areas, including engineering, economy, finance, agriculture, environment, and policy

making.

They Also Serve Jane P. Ives, 2020-03-31 Stories from the women and men who have served alongside Methodist and United Methodist bishops. When a bishop is elected in The United Methodist Church, it is not only the one elected who is asked to serve but his or her spouse and family as well. Hear the stories of how Methodist and United Methodist episcopal spouses have adjusted to and navigated this life-changing journey. While dealing with the full range of human experience—births, deaths, relationship struggles, and illness—they also travel the world, participate in mission and ceremonies, meet interesting people, and stand up for justice. Through hardships, celebrations, and everyday struggles, these spouses find their own paths of ministry, answering the calls that are also placed upon their lives. In these ways and many others, they also serve. Praise for *They Also Served* A meticulous labor of love by Jane P. Ives, *They Also Served* remembers faithful unsung Christians by chronicling previously unrecorded details of the spouses of episcopal leaders. Sometimes in the spotlight, often in the shadows, the bishop's spouses struggled to fulfill unpaid roles and undefined responsibilities in the church, usually far from family and friends. Ives empathetically highlights how these persons, usually without voice or vote,

helped shape the church's mission and ministry. - Dr. Donald E. Messer, Executive Director, Central for Health and Hope: Focusing on Global HIV and AIDS, Centennial Colorado. Bishops may ebb and flow in their popularity based on their decisions, but their spouses are almost universally loved and admired. Jane Ives helps readers understand why that is the case with her comprehensive story of the impressive, diverse, and thoroughly dedicated women and men who have contributed so much to God's work. –Lovett H. Weems, Jr., Distinguished Professor of Church Leadership Emeritus, Wesley Theological Seminary, Washington, DC In the gospel of Luke, Jesus sent the disciples out, two by two, to every town, and country, every charge and conference. Ives' book records the wisdom of sending two, and restores the names of those often forgotten in the story of the people called Methodists, the spouses. These are remarkable oral histories as well as timelines of social holiness and global service. This is not a book about survival in ministry and marriage; it's a testimony to those who thrived in their calling. –Heather Murray Elkins, Professor of Worship, Preaching, and the Arts, The Theological School of Drew University, Madison, New Jersey This is a book about discipleship. It is also a book about ministry and itinerancy. It tells stories of how God sometimes calls two people to the work of episcopacy, people who happen to be married to each other. It is a book that will make you laugh and cry! This book is an important addition to the literature of Methodist episcopacy. And it is a hard book to put down!

—William Boyd Grove, Bishop (Ret.) of The United Methodist Church Jane Ives has given the Methodist family a priceless treasure. Through an astonishing effort to collect memories and explore archival material, she has compiled a comprehensive record of episcopal spouses, their stories, accomplishments, and contributions to the church. But this book is more than a biographical dictionary. It offers a poignant, insightful account of the lives of bishops, their spouses and families, and the impact of the church's expectations on all of them. As a little boy, I knew firsthand the phone call: get on a train to New Orleans with your sister; your Daddy is going to be a bishop. Allow me to testify, then, that this book is the real deal -- genuine, human, and rich with faith and Spirit. —Thomas E. Frank, Associate Dean for Continuing Studies, Graduate School of Arts and Science, Wake Forest University, Winston-Salem, North Carolina Laity and clergy active in United Methodist life and their spouses will want to immerse themselves in this corporate autobiography, which provides an overview of Methodism through almost 80 years of personal experiences and cultural change. Jane Ives, an episcopal spouse, has amassed here narratives, reports, and communications crafted by her spousal colleagues, living and dead, as well as by those who have known them. For page after page, the reader will relive Methodism's sometimes gradual, sometimes dramatic evolution and its struggles with race, gender, inclusivity, and global relationships. The bishops' spouses have shown great creativity in making the most of their opportunities to be together during

Council meetings: sharing ideas, establishing covenant and interest groups, and adjusting their organization to respond to changing needs. Ives has devoted the final third of the book to profiles of the spouses, some quite famous and others whose names are not even known. These vignettes illustrate how different episcopal spouses have lived out their own calling and how they have impacted the church and the world. –Russell E. Richey, Dean Emeritus of Candler School of Theology and William R. Cannon Distinguished Professor of Church History Emeritus, Durham, North Carolina

Writing Identity Emanuelle Oliveira,2008 In the late 1970s, Brazil was experiencing the return to democracy through a gradual political opening and the re-birth of its civil society. Writing Identity examines the intricate connections between artistic production and political action. It centers on the politics of the black movement and the literary production of a Sao Paulo-based group of Afro-Brazilian writers, the Quilombhoje. Using Pierre Bourdieu's theory of the field of cultural production, the manuscript explores the relationship between black writers and the Brazilian dominant canon, studying the reception and criticism of contemporary Afro-Brazilian literature. After the 1940s, the Brazilian literary field underwent several transformations. Literary criticism's displacement from the newspapers to the universities placed a growing emphasis on aesthetics and style. Academic critics denounced the focus on a political and racial agenda as major weaknesses of Afro-Brazilian writing, and stressed, the need for aesthetic experimentation within the literary field. Writing Identity investigates how Afro-Brazilian writers maintained strong connections to the black movement in

Brazil, and yet sought to fuse a social and racial agenda with more sophisticated literary practices. As active militants in the black movement, Quilombhoje authors strove to strengthen a collective sense of black identity for Afro-Brazilians.

Acquisitions: Core Concepts and Practices, Second Edition Jesse Holden, 2017-11-21 As a discipline, acquisitions encompasses everything from purchasing and budgeting to enabling access to materials; and every format from books, monographs, and serials to e-books, subscription-based electronic resources, and beyond. In this guide, Holden boils it down to its essentials while providing a strategic framework that introduces and

integrates all aspects of acquisitions. Using a holistic, hands-on approach that's as useful for working librarians as for those studying the profession, this book provides an overview of acquisitions as a library profession, with a discussion of basic competencies, notions of ethics, and the organizing principle of "assemblage"; lays out a robust conceptual framework that unifies disparate aspects of acquisitions work and synthesizes its practical aspects; thoroughly examines content acquisitions in all formats, with an in-depth look at digital materials; covers such important trends as the rise of e-books, the ramifications of mobile devices as a mode of content access and interaction, demand-driven acquisition, and shifting expectations regarding paid-for content; tracks advancements in technology, including the widespread implementation of discovery services for content searching; underscores the responsive service component of acquisitions as informed by user expectations, community feedback, and usage standards such as COUNTER and SUSHI; addresses budgetary issues such as changes in services offered by vendors and subscription agents, and the emergence of a "new normal" for budget constraints and expectations resulting from the recession; and looks ahead to what anticipated changes to acquisitions means for the future. Presenting a model that's both comprehensive and flexible, Holden demonstrates how technical competencies and ethical imperatives can inform the day-to-day workflow of acquisition librarians.
