Mastering Business for Strategic Communicators Matthew W. Ragas,Ron Culp,2017-11-14 Mastering Business for Strategic Communicators provides strategic communication students and professionals with expert insights on the various major business functions and areas from an assemblage of top strategic communication leaders.

*Corporate Communications* Lars Thoege Christensen,Mette Morsing,George Cheney,2008-02-28 The field of corporate communications describes the practices organizations use to communicate as coherent corporate 'bodies'. Drawing on the metaphor of the body and on a variety of theories and disciplines the text challenges the idealized notion that organizations can and should communicate as unified wholes. The authors pose important questions such as: - Where does the central idea of corporate communications come from? - What are the underlying assumptions of most corporate communications practices? - What are the organizational and ethical challenges of attempting truly 'corporate' communication? Clearly written with international vignettes and executive briefings, this book shows that in a complex world the management of communication needs to embrace multiple opinions and voices. Rewarding readers with a deeper understanding of corporate communications, the text will be a 'must read' for advanced undergraduates, graduate students, and scholars, in the arenas of corporate communications, organizational communication, employee relations, marketing, public relations and corporate identity management. Practitioners in these areas will be provoked to re-examine their assumptions and habits.

**Digital Communication Management** Beatriz Peña-Acuña,2018-09-19 The director of communication is an impassioned profession that discovers which strategies are the best and the most intelligent. There are few manuals, and there are some that offer general and sparsely updated information about the change that new technologies imply. We find the literature isolated that can be directly useful. However, we will say that there is no single recipe for DirCom or communication consultants. Each one will offer different models according to the variables or factors that seem to them to be able to rectify the direction of a company according to his or her personal mood.

**New Communications Environments** Giuseppe Mantovani,2021-03-04 This multi-disciplinary book develops three intertwined themes: the perspective of situated action from cognitive science, a model of social context as a framework for inspiring artifact use and starting from it, and the individual and organizational impact of the new electronic environments of communication. Using plenty of up-to-date references from different scientific disciplines such as HCI, computer-mediated communication, cognitive sciences, social psychology, cultural anthropology and research in decision making, the book challenges older models of communication as information transfer and discusses the new communication environments.

Specifically, the book provides insights into the nature of the communications profession, the issues that define this profession, the strategies and activities that fall within its remit, and the ways in which it can be managed and organized in companies. This book will be truly appreciated by all the readers.

Integrated Marketing Communications in Risk and Crisis Contexts Robert S. Littlefield,Deanna D. Sellnow,Timothy L. Sellnow,2021-03-09 Integrated Marketing Communications in Risk and Crisis Contexts is part of the Lexington Books Integrated Marketing Communication (IMC) series. The authors present a culture centered model for examining risk and crisis communication within the context of IMC to provide a more robust understanding of myriad cultural variables affecting the perception of risk and crisis messages and the means by which these messages are processed by different publics, particularly multicultural and international groups. While the conceptualization of what constitutes IMC has been broad, from the perspective of risk and crisis communication, the focus is quite specific: All communication and messages created and disseminated in a risk or crisis situation must be carefully created and strategically presented if the intended outcomes associated with the publics' responses are to be realized by the sender of the messages.

The Televisionaries: The Untold Story of the World Trade Center as a Crucible for New Communication Ideas ,  
*The Communications Toolkit* P. H. Longstaff,2002 A toolkit of basic principles to help those in business, industry, law, and other professions deal with a constantly changing communications sector. Although telephone, cable, broadcast, print, and Internet companies are changing at a fantastic rate, the fundamentals of communications, networks, and competition have remained constant. This book provides the tools necessary to build lasting, flexible strategies to survive and grow in these times of transition. Whether you are a business executive, lawmaker, policy analyst, industrialist, stock analyst, lawyer, or judge, these tools will help you to solve real problems right away. The toolkit contains six tools -- essentially

ways to view the workings of the communications sector from a larger, more inclusive perspective. The tools draw on knowledge and concepts from communications, engineering, biology, business, and law. Tool #1, New Building Blocks, presents the big picture of the communications sector. Tool #2, Networks, develops the fundamental parts and processes found in all networks. Tool #3, Competition and Cooperation, presents the basic characteristics shared by most processes in which two or more entities compete or cooperate to obtain a scarce resource. Tool #4, The Three Visions of Convergence, sorts out the many things people mean when they say convergence. Tool #5, Convergence Theology, shows how people's faith (or lack of it) in convergence influences their predictions for the future. Finally, Tool #6, Concentration/Diversity, focuses on the forces that drive things together and those that pull them apart. The book also discusses how the tools can be used to understand and influence public policy issues.

Integrated Marketing Communications Tony Yeshin, 2012-05-23 Integrated Marketing Communications is a new text which will answer the key questions of what marketing communications is, how it works and why it is such a vital contemporary marketing function. It is a comprehensive and authoritative overview of this complex and rapidly evolving area. The author's long experience in the industry, and as a senior academic, ensures that the book is able to show how the communications process really works and how it can best be managed in a strategically and tactically cost effective manner. Throughout the book the framework of analysis, planning, implementation and control is used to help the student organize their approach to the complex decision making in the present communications environment. This is both an essential text and an indispensable reference resource and has been rigorously developed for undergraduates and postgraduates in Marketing and Business, and for the new CIM Certificate and Diploma exams in Business Communication, Promotional Practice and Marketing Communications.

**Corporate Communications** Joseph Fernandez, 2004-12-08 This accessible book discusses the role of journalism, advertising and public relations in corporate communications. **Manager's Guide to Excellence in Public Relations and Communication Management** David M. Dozier, Larissa A. Grunig, James E. Grunig, 2013-10-18 This book reports findings of a three-nation study of public relations and communication management sponsored by the International Association of Business Communicators (IABC) Research Foundation. The Excellence Study provides communication managers and public relations practitioners with information critical to their own professional growth, and supplies organizations with tools that help them communicate more effectively and build beneficial relations with key publics. Communication excellence is a powerful idea of sweeping scope that applies to all organizations -- large or small -- that need to communicate effectively with publics on whom the organization's survival and growth depend. The essential elements of excellent communication are the same for corporations, not-for-profit organizations, government agencies, and professional/trade associations. And they are applicable on a global basis. The study identifies three spheres of communication excellence. These spheres consider the overall function and role of communication in organizations, and define the organization of this book. They are: \* the core or

inner sphere of communication excellence -- the knowledge base of the communication department, \* the shared expectations of top communicators and senior managers about the function and role of communication, and \* the organization's culture -- the larger context that either nurtures or impedes communication excellence. This text also examines communication excellence as demonstrated in specific programs developed for specific publics.

**Integrating Corporate Communications** James L. Horton, 1995-09-30 Seldom does a work on corporate communications take such a radical economic approach to the topic. Horton integrates corporate communications cost-effectively into all business activity and presents a new way to look at corporate communications as a force behind all business disciplines. He describes and reviews external and internal communication; examines human behavior in communicating; reviews corporate communication structure; and analyzes messages and media and shows how to get started toward cost-effective corporate communication. In 11 chapters, the book presents a look at corporate communications based on economic principles. Separate chapters examine the business environment and communication; corporate communication and strategy and reputation; corporate communication and the individual; corporate communication and messages; corporate communication and media; corporate communication and measurement; and corporate communication and business structure. A major resource for senior managers, strategists, and other communications specialists.

**Strategic Communications in Russia** Katerina Tsetsura, Dean Kruckeberg, 2020-09-07 This book serves as a reader exploring the scholarly inquiry, professional education, and practice of Russian public relations and advertising in multiple contexts. It examines significant parts of what can be encompassed under the umbrella of strategic communications, including public relations and advertising, rather than investigating all areas of communication in Russia. Within the context of Russia's history, culture, and ideology, the book begins by tracing the development of communication as a field, as a discipline, and as a social institution in Russia. It then samples current studies in Russian strategic communications, examining this professional specialization's current state and likely future directions. The book's authors are mostly Russians who are experts in their specializations. Chapters are predicated upon the premise that this is an exciting time of great opportunity for Russian strategic communications. However, in Russia, exploiting such opportunities for strategic communications scholarship, education, and professional practice presents challenges within the context of that nation's cultural, historical, and ideological heritage that presently may be unique. The book concludes with a prognosis of the future of Russian strategic communications. The book is recommended reading for a worldwide audience of strategic communications scholars, educators, students, and practitioners. Such readers will find the book of interest and of unique value as the book will help them to better understand, appreciate, and respect Russian strategic communications, its genesis, and present state.
