Wei Qian Sang

Peer-to-Peer Application Development Dreamtech Software Team, 2001-11-29

Part of the new Cracking the Code Series, Peer to Peer Application Development takes a look at the code behind Napster-style Peer to Peer (P2P) applications. This book covers complete web application with design specifications, flow diagrams and source code with line-by-line explanations. You'll build a completely functional P2P application and clients with audio/video streaming, chat and wireless capabilities. Other topics covered include building the P2P Server, building clients in C# and Java, XML data, wireless integration and more!

Impact of P2P and Free Distribution on Book Sales Brian O'Leary, 2009-05-08

Book publishers have long used free content as part of their marketing and selling efforts, with the vast majority of free content distributed in printed form. Digital distribution of free material, either intentional or via unauthorized availability through peer-to-peer sites and other Web outlets, offers a fast and expansive connection to consumers, but content can also be copied and disseminated without publishers' control. Some publishers are torn between the efficiencies digital distribution provides and concerns over piracy and print-sale cannibalization. This research report is part of an ongoing effort by O'Reilly Media Inc. and Random House to test assumptions about free distribution, P2P availability and their potential impact on book sales.

P2P Techniques for Decentralized Applications Esther Pacitti, Reza

Akbarinia, Manal El-Dick, 2012 As an alternative to traditional client-server systems, Peer-to-Peer (P2P) systems provide major advantages in terms of scalability, autonomy and dynamic behavior of peers, and decentralization of

control. Thus, they are well suited for large-scale data sharing in distributed environments. Most of the existing P2P approaches for data sharing rely on either structured networks (e.g., DHTs) for efficient indexing, or unstructured networks for ease of deployment, or some combination. However, these approaches have some limitations, such as lack of freedom for data placement in DHTs, and high latency and high network traffic in unstructured networks. To address these limitations, gossip protocols which are easy to deploy and scale well, can be exploited. In this book, we will give an overview of these different P2P techniques and architectures, discuss their trade-offs, and illustrate their use for decentralizing several large-scale data sharing applications. Steal This File Sharing Book Wally Wang, 2004 **Steal This File Sharing Book** tackles the thorny issue of file sharing networks such as Kazaa, Morpheus, and Usenet. It explains how these networks work and how to use them. It exposes the dangers of using file sharing networks--including viruses, spyware, and lawsuits--and tells how to avoid them. In addition to covering how people use file sharing networks to share everything from music and video files to books and pornography, it also reveals how people use them to share secrets and censored information banned by their governments. Includes coverage of the ongoing battle between the software, video, and music pirates and the industries that are trying to stop them.

Efficiency and Stability of Peer-to-peer File Sharing Systems Wei Qian Sang, 2007

File Sharing Applications Engineering Luca Caviglione, 2009 Luca Caviglione presents a discussion about file-sharing systems from an engineer's point of view. His principal aim is to rationalise the engineering process at the basis of peer-to-peer (p2p) file-sharing systems.

Complete Guide to Anonymous Torrent Downloading & File Sharing Matthew Bailey, 2013 Download & share torrents anonymously Don't be exposed and at risk. Take the steps in this Guide. Torrent file-sharing is a quick and easy way to obtain all kinds of great media on the Internet, ranging from full-length movies, music files, video clips, ebooks, apps, software programs, images, documents to basically any digital content you can think of. Downloading and sharing torrents can feel anonymous, but this is deceptive. Unless you take some extra steps to protect your privacy while downloading and sharing torrents, the prying eyes of unwelcome snoops can eavesdrop, monitor and record your torrenting activities. You need to protect yourself against: aggressive firms monitoring your torrent activities your Internet service provider (ISP) slowing down or throttling your connection consequences from inadvertently downloading copyright materials (hey, it can

happen to anyone) disclosure of torrent downloads you would rather keep hidden or secret intrusion and overreach on the part of businesses and governments prying into every aspect of our online lives (Big Brother syndrome) This no-nonsense Guide is your one-stop for how to download torrents anonymously, with helpful screenshots and recommendations along the way. It briefly explains the technology behind torrents, outlines the risks you take when downloading and sharing torrents, recommends the best ways to find torrents, and takes you step-by-step through the process of downloading and sharing torrents anonymously. If torrents are a new concept to you, don't worry, they are explained in the Guide without any fluff or technobabble. At the same time, even the most advanced users will learn new tips and tricks in this Guide. Either way, from beginner to advanced user, with the help of this Guide you will be downloading torrents anonymously like a pro in no time.

Trust Management for P2P Application in Delay Tolerant Mobile Ad-hoc Networks Basit I. Qureshi, 2011 Security is essential to communication between entities in the internet. Delay tolerant and disconnected Mobile Ad Hoc Networks (MANET) are a class of networks characterized by high end-to-end path latency and frequent end-to-end disconnections and are often termed as challenged networks. In these networks nodes are sparsely populated and without the existence of a central server, acquiring global information is difficult and impractical if not impossible and therefore traditional security schemes proposed for MANETs cannot be applied. This thesis reports trust management schemes for peer to peer (P2P) application in delay tolerant disconnected MANETs. Properties of a profile based file sharing application are analyzed and a framework for structured P2P overlay over delay tolerant disconnected MANETs is proposed. The framework is implemented and tested on

J2ME based smart phones using Bluetooth communication protocol. A light weight Content Driven Data Propagation Protocol (CDDPP) for content based data delivery in MANETs is presented. The CDDPP implements a user profile based content driven P2P file sharing application in disconnected MANETs. The CDDPP protocol is further enhanced by proposing an adaptive opportunistic multihop content based routing protocol (ORP). ORP protocol considers the store-carry-forward paradigm for multi-hop packet delivery in delay tolerant MANETs and allows multi-casting to selected number of nodes. Performance of ORP is compared with a similar autonomous gossiping (A/G) protocol using simulations. This work also presents a framework for trust management based on dynamicity aware graph re-labelling system (DA-GRS) for trust management in mobile P2P applications. The DA-GRS uses a distributed algorithm to identify trustworthy nodes and generate trustable groups while isolating misleading or untrustworthy nodes. Several simulations in various environment settings show the effectiveness of the proposed framework in creating trust based communities. This work also extends the FIRE distributed trust model for MANET applications by incorporating witness based interactions for acquiring trust ratings. A witness graph building mechanism in FIRE+ is provided with several trust building policies to identify malicious nodes and detect collusive behaviour in nodes. This technique not only allows trust computation based on witness trust ratings but also provides protection against a collusion attack. Finally, M-trust, a light weight trust management scheme based on FIRE+ trust model is presented.
