Udemy Tips Dr. Timothy Zahar,2022-01-01 INTRODUCTION Together we are going through the most difficult time in decades when the Covid-19 pandemic rages everywhere. The economy was stagnant and had to turn around to adapt to the new situation. Along with that, the object most affected is the employees (those who work for the bosses). A lot of people have been unemployed and laid off. And must live on government subsidies. However, we all know that this situation cannot last forever. Many people have gone to find new jobs, even doing jobs completely different from their previous jobs. This is a big obstacle, directly affecting the income of workers. When you are not proficient, the boss will not be able to pay you a high salary. However, also thanks to the development of online education. We have the opportunity to learn special knowledge, helping us to increase our

income immediately, from the most successful people around the world. I am talking about online educational websites, for example, <https://www.udemy.com/> When the pandemic happened, my work also faced many difficulties. My source of income (salary) was also severely affected (up to an 80% reduction in income). During that difficult time, I also struggled to find ways to try to bring my income back to the way it was before the Covid-19 epidemic. But really, the Covid-19 pandemic has turned everything upside down. Through many years of experience in my life, I understand that the previous understanding will no longer be relevant to the new situation. And I need to learn new skills. This skill must help me make money immediately. And I had to find the best person who was making a lot of money on that skill. I don't know where to look, because right outside my door is a society that is being isolated - isolated at home. As a habit, I go to Google and search for courses and skills that I think will help me make money right away. And then slowly step by step, God led me through each keyword (keywords). I discovered Udemy (<https://www.udemy.com/>). Where I can learn a lot of great things, from great teachers (really doing what they teach and getting great results), at amazingly cheap tuition fees (average around \$10/course). Of course, things weren't great from the start. Because my English listening ability is very limited. I can only hear ~ 10-15% of the content shared by the lecturer. I turned on Udemy's auto-subtitles, tried to follow along, but the speed was still very fast and couldn't keep up. "In this era, there must be away. I can't let my limited English ability stop me from moving forward" I told myself. And I managed to find a way to help me translate faster. We all understand that a foreign language (specifically English) is very useful for work and life. And mastering it will help us open up the sky of new opportunities. However, not everyone has the determination to become fluent in English. And I am one of them. So, in this little book, I'm going to show you a tip so you can learn as quickly and as effectively as possible from the amazing things that Udemy teachers teach. Whether you are good at English or don't know a word of English. No matter what your native language is (French, Spanish, Chinese, Japanese...), as long as you know your mother tongue, you can use the way that I will guide, to learn new skills. And change your financial results. Because this small book is written to help everyone (from all countries around the world, no matter what language you speak). Therefore, I will try to use as few words as possible. Instead, it will be specific screenshots, so that you can capture my ideas, and follow-through, and get immediate results (Whatever your native language is again). Please follow my instructions step by step. Dr. Timothy Zahar

As of September of 2021, the platform has more than 46 million students, 175,000 instructors, and 60,000 certified teaching courses in over 75 languages. effort to attract your target trainees seeking to complete coursework for completion of their mission. **Step 1: Choosing What Your Udemy Course Will Be About** These may seem like an obvious ones to the average person, but according to Jack Pitman, a Udemy Course Creator, a lot of aspiring course creators want to create a course, but they haven't figured out what they want to make a course on. Indeed, it goes beyond saying, "ok, I'll make a course on Python." According to Lou Croft, "you have to match your course to the level of demand which is increasing continually to which you will be competing against in the Udemy marketplace. You need to determine that by using Udemy's Market Intelligence tool." **Step 2: Setting Up the Groundwork** The stage has to do with planning and outlining your course. For starters, it is not advisable to make a very lengthy course. Four to six hours of content is usually advisable. You would also need to split your course into sections, including introduction and conclusion, for easy consumption. Each section should also have a number of sub-topics. Your video should be around 2 to 10 minutes long. However, for more practical videos, five to ten minutes is recommended. Just try to keep things short and sweet. Also, ensure you briefly describe what each section is meant to accomplish and also make descriptions for each lecture. They will give your course a rich, detailed quality. Want to learn more?
