*The Economic Theory of Fiscal Policy* Bent Hansen,2014-04-04 The book explores whether fiscal policies can secure full employment without inflation, one of the key questions in economics after Keynes. Part 1, General Theory of Public Finance and Fiscal Policy, discusses Ends and Means in economic policy. The results of this ends-means analysis are applied to fiscal policy. Part 2, Microeconomics, deals with the impact of fiscal measures on the behaviour of the individual household, firm and other organization, concentrating on the effects on consumption and saving. Part 3, Macroeconomics, considers how the problem of keeping the price-level constant and the labour market in equilibrium at full employment may be solved by means of fiscal and monetary measures. Problems connected with the volume of investments and the balance of payments are considered simultaneously.

**The Transfer of Calcium and Strontium Across Biological Membranes** R Wasserman, 2012-12-02 The Transfer of Calcium and Strontium Across Biological Membranes represents the proceedings of a Conference on The Transfer of Calcium and Strontium Across Biological Membranes, held in Cornell University, Ithaca, New York on May 13-16, 1962. This book is organized into seven sections encompassing 22 chapters, and deals first with some of the properties of biological membranes, the general aspects of ion transport, and chelation of divalent cations. These subjects are all important to understand the transfer of calcium and strontium across membranes. The subsequent sections are devoted to the physiological and nutritional aspects of intestinal absorption, with a particular emphasis on the influence of vitamin D and other nutritional factors on the absorption of calcium and strontium. A section describes the biological transfer and movement of calcium and strontium across kidney, mammary gland, nerve, and muscle. The last section examines the behavior of chronically ingested radiostrontium in animals. This section also provides an overview of strontium and calcium metabolism principles.

**Ocean Acidification** Jean-Pierre Gattuso, Lina Hansson, 2011-09-15 The ocean helps moderate climate change thanks to its considerable capacity to store CO<sub>2</sub>, through the combined actions of ocean physics, chemistry, and biology. This storage capacity limits the amount of human-released CO<sub>2</sub> remaining in the atmosphere. As CO<sub>2</sub> reacts with seawater, it generates dramatic changes in carbonate chemistry, including decreases in pH and carbonate ions and an increase in bicarbonate ions. The consequences of this overall process, known as ocean acidification, are raising concerns for the biological, ecological, and biogeochemical health of the world's oceans, as well as for the potential societal implications. This research level text is the first to synthesize the very latest understanding of the consequences of ocean acidification, with the intention of informing both future research agendas and marine management policy. A prestigious list of authors has been assembled, among them the coordinators of major national and international projects on ocean acidification.

**FY2018-FY2020 Medium-Term Budget** International Monetary Fund. Office of Budget and Planning, 2017-12-05 The Fund has been operating under a flat real resource envelope for the past six years. With continued efforts to maximize the use of available resources, spending in FY 17 is projected to reach 99 percent of the net administrative budget, and a low vacancy rate has helped stabilize overtime at 11 percent. Internal savings and reallocations have allowed the Fund to dedicate more resources to country work, including capacity development, without requiring an increase in the approved budget—apart from \$6 million provided in FY 17 to cover rising security costs. An unchanged real net administrative budget in FY 18, despite deeper Fund engagement in a number of areas, as well as increased costs for corporate modernization. Accordingly, the budget proposal incorporates significant savings from reallocations and efficiency gains to fund new demands, as well as a further increase in the upfront allocation of carry-forward funds by about \$10 million. The broad themes of the proposal are: (i) more intensive country work with a shift from surveillance to programs, but net savings in field offices; (ii) significant policy and analytical work on the financial sector and the role of the Fund (global safety net, facilities, and quotas), albeit less than in FY 17, with more work on structural issues and new challenges; (iii) funding for transforming IT and HR services, offset by central savings; and (iv) enhanced risk mitigation and knowledge management (KM), with the establishment of a KM unit to support cross-country analysis and knowledge transfer. At this stage, a flat resource envelope is assumed also for the medium term, contingent on continued reprioritization and a broadly unchanged global economic environment. Upward pressure on resources will arise from growing capacity development activities and certain revenue losses. Savings are expected from the TransformIT initiative and internal efficiency gains. But for the budget to remain flat, the Fund will need to continuously reprioritize and adjust its activities to make room for new demands. Even then, a more challenging global environment, with a further ramping up of Fund lending, or significant demands for deeper engagement in other areas, would put significant strains on resources over the medium term. The proposed capital budget envelope for FY 18-20 remains broadly unchanged from current levels. Some frontloading, however, is planned for the first two years, due to the cyclical nature of these investments and to accommodate strategic IT projects.
