

*NATO and the Greater Maghreb* David Garcia Cantalapiedra, 2022-09 NATO and the Greater Maghreb offers a distinctive focus and study of NATO's future policy in North Africa and the Sahel after the new 2022 Strategic Concept, expected to be published during the next NATO Summit in Madrid. The book will use three main axes to frame the contributors' analysis, which are not usually used together for analyzing NATO policy: Geopolitics, Great Power Competition, and Threats. These lenses create a distinctive approach to reviewing a Greater Maghreb Regional Security Complex confronted with the necessities of a distinctive approach by NATO. The idea of MENA (Middle East and North Africa), still used by the EU and NATO is already obsolete for several reasons: first, it is no more possible to split West Africa geopolitically from North Africa and Sahel. Second, the action of terrorist groups such as Al Qaida in the Islamic Maghreb, ISIS, and Boko Haram are not related to Middle East problems, nor strategies and policies necessary to tackle them. Second, the difficulties in cooperation between these countries, the corruption fed by organized crime (above all cocaine trafficking) and the impact of desertization, makes it very difficult to establish sound strategies and policies for the area. Third, there is an increasing presence of Great Powers in the area, including Russia and China, Turkey, and some Gulf states with different goals and policies.

*NATO and the Future of European and Asian Security* Christensen, Carsten Sander, Maisaia, Vakhtang, 2021-06-25 The key role in the security policy of the North Atlantic Treaty Organization (NATO) is to prevent new types of asymmetric challenges and deal with the new architecture of the Euro-Atlantic security environment, including the control of weapons of mass destruction. In modern international politics, the growing militaristic policies of the states have created many dangers and raised the need for NATO to address new issues that the Alliance did not face during the Cold War. NATO and the Future of European and Asian Security reflects on difficult geopolitical and geostrategic conditions and reviews how new types of warfare have a drastic impact on NATO's military and defense doctrine. This book provides the newest data and theories and contributes to the understanding of the transformation of the regional security environment in the aegis of the Euro-Atlantic. Covering topics including foreign policy, global security, hybrid warfare, securitization, and smart defense, this book is essential for government officials, policymakers, public relations officers, military and defense agencies, teachers, historians, political scientists, security analysts, national security professionals, administrators, government organizations, researchers, academicians, and students.

*Reliability and Risk Analysis* Mohammad Modarres, Katrina Groth, 2023-04-26 Emphasises an introduction and explanation of the practical methods used in reliability, and risk studies with a discussion of their uses and limitations Offers basic and advanced methods in reliability analysis that are commonly used in daily practice Provides methods that address unique topics such as dependent failure analysis, importance analysis, and analysis of repairable systems Presents a comprehensive overview of modern probabilistic life assessment methods such as Bayesian estimation, system reliability analysis, and human reliability Includes many ends of chapter problems, a tools website with computational codes, along with a solutions manual to support course adoptions

*Charting the Divide Between Common and Civil Law* Thomas Lundmark, 2012-08-15 What does it mean when civil lawyers and common lawyers think differently? In *Charting the Divide between Common and Civil Law*, Thomas Lundmark provides a comprehensive introduction to the uses, purposes, and approaches to studying civil and common law in a comparative legal framework. Superbly organized and exhaustively written, this volume covers the jurisdictions of Germany, Sweden, England and Wales, and the United States, and includes a discussion of each country's legal issues, structure, and their general rules. Professor Lundmark also explores the discipline of comparative legal studies, rectifying many of the misconceptions and prejudices that cloud our understanding of the divide between the common law and civil law traditions. Students of international law, comparative law, social philosophy, and legal theory will find this volume a valuable introduction to common and civil law. Lawyers, judges, political scientists, historians, and philosophers will also find this book valuable as a source of reference. *Charting the Divide between Common and Civil Law* equips readers with the background and tools to think critically about different legal systems and evaluate their future direction.

*Alliances, Nuclear Weapons and Escalation* Stephan Frühling, Andrew O'Neil, 2021-12-14 In an era of great power competition, the role of alliances in managing escalation of conflict has acquired renewed importance. Nuclear weapons remain the ultimate means for deterrence and controlling escalation, and are central to US alliances in Europe and the Indo-Pacific. However, allies themselves need to better prepare for managing escalation in an increasingly challenging geostrategic and technological environment for the US and its allies. While the challenge of great power competition is acute at both ends of Eurasia, adversary threats, geography and the institutional context of US alliances differ. This book brings together leading experts from Europe, Northeast Asia, the United States and Australia to focus on these challenges, identify commonalities and differences across regions, and pinpoint ways to collectively manage nuclear deterrence and potential escalation pathways in America's 21st century alliances. 'Nuclear weapons play an important role in deterrence and preventing military conflict between great powers, while also posing an existential threat to humanity. It is vital that we have a nuanced understanding of this important challenge, so that such weapons are never used. This book offers many important perspectives and makes a significant contribution to the overall debate about these powerful weapons.' — The Hon Julie Bishop, Chancellor, The Australian National University, Former Foreign Minister of Australia 'This timely book identifies a wide range of challenges US alliances both in the Indo-Pacific and Euro-Atlantic face as they seek to ensure the value of US extended deterrence, particular the US nuclear umbrella, against China and Russia. This unique collection of chapters written by experts in US allies in both regions presents widely varying security perceptions and priorities. To understand such differences is the key to globally strengthen the US alliance systems, which are a significant advantage Washington enjoys over the two competitors.' — Yukio Satoh, former President of The Japan Institute of International Affairs (JIIA) 'This is a timely and thoughtful collection of essays that should serve to jumpstart public discussion and debate—the absence of which is widely noted and much bemoaned. Each contributor examines an aspect of the complicated, multifaceted nuclear debate by discussing the range of dilemmas from deterrence to disarmament. The various views set out here are more relevant than ever as Russia, China and the United States flex their nuclear muscles in new and sometimes dangerous ways. This book should be read by anyone interested in the preventing the use of nuclear weapons and understanding complexities of alliances in an increasingly dangerous world.' — Madelyn Creedon, former Principal Deputy Administrator of the US National Nuclear Security Administration and Assistant Secretary of Defense for Global Strategic Affairs

**Territory, Identity and Spatial Planning** Mark Tewdwr-Jones, Philip Allmendinger, 2006-09-27 This book provides a multi-disciplinary study of territory, identity and space in a devolved UK, through the lens of spatial planning. It draws together leading internationally renowned researchers from a variety of disciplines to address the implications of devolution upon spatial planning and

the rescaling of UK politics. Each contributor offers a different perspective on the core issues in planning today in the context of New Labour's regional project, particularly the government's concern with business competitiveness, and key themes are illustrated with important case studies throughout.

**Routledge Handbook of Strategic Culture** Kerry M. Kartchner, Briana D. Bowen, Jeannie L. Johnson, 2023-10-11 This handbook offers a collection of cutting-edge essays on all aspects of strategic culture by a mix of international scholars, consultants, military officers, and policymakers. The volume explicitly addresses the analytical conundrums faced by scholars who wish to employ or generate strategic cultural insights, with substantive commentary on defining and scoping strategic culture, analytic frameworks and approaches, levels of analysis, sources of strategic culture, and modalities of change in strategic culture. The chapters engage strategic culture at the civilizational, regional, supra-national, national, non-state actor, and organizational levels. The volume is divided into five thematic parts, which will appeal to both students who are new to the subject and scholars who wish to incorporate strategic culture into their toolbox of analytical techniques. Part I assesses the evolving theoretical strengths and weaknesses of the field. Part II lays out elements of the theoretical and methodological foundations of the field, including sources and components of strategic culture. Part III presents a number of national strategic cultural profiles, representing the state of contemporary strategic culture scholarship. Part IV addresses the utility of strategic culture for practitioners and scholars. Part V summarizes the key theoretical and practical insights offered by the volume's contributors. This handbook will be of much interest to students of strategic studies, defense studies, security studies, and international relations in general, as well as to professional practitioners.

*Peace, War, and Partnership* William A. Taylor, 2023-12-14 Covering the period from World War II through the Trump presidency, *Peace, War, and Partnership: Congress and the Military since World War II* unpacks the vital and dynamic relationship between Congress and the military, two entities that have worked together, at times with different purposes, to solve myriad important issues impacting the United States in both peace and war. Congress and the military have had their periods of cooperation. However, they have also had alternating periods of resistance to each other, based on distinct conceptions of national interests and divergent strategies. Their partnership has been a symbiotic relationship in which one entity or the other has ebbed and flowed in power depending on the circumstances. They have altered each other in far-reaching ways and transformed American society as a result of their liaisons. *Peace, War, and Partnership* analyzes the significant, powerful, and central relationship between Congress and the military. It investigates intersections of policy, politics, and society to theorize the impact of this relationship on the United States in the modern era. This work also offers a better understanding of earlier attempts by policy makers in Congress and the military to provide national security, contextualizing highly relevant current issues such as military service, proliferation, foreign intervention, national security, joint operations, diplomacy, alliances, mobilization, post-conflict resolution, citizenship, and military innovation. It illuminates crucial questions involving military policies in American democracy, and their sway on America historically and today, sparking and informing public debate about its implications now and for the future.

*The Transatlantic Era (1989–2020) in Documents and Speeches* Bram Boxhoorn, Giles Scott-Smith, 2021-11-29 This accessible textbook uses key documents embedded in a clear narrative to chart the post-Cold War rise and decline of transatlantic relations. It provides a novel interpretive framework by proposing that the three decades between 1989 and 2020 represent a distinct 'transatlantic era'. Providing a unique new look at the recent history and politics of transatlantic relations, the book argues that three key phases can be identified: 1989–1999: victory? 2000–2010: divergence? 2011–2020: disarray? Each period defines a particular set of political, economic, and security dynamics, with the trend being a gradual undermining of the strengths on which transatlantic unity once relied. These three decades therefore represent both the high point of the transatlantic region's power and potential, and its gradual decline in a global context. Presenting students with a critical perspective of US and European transatlantic policies through annotated key documents covering central aspects of security, political, economic, and cultural affairs, it will be essential reading on all International Relations courses as well as of great interest to scholars and students of US and European Studies, Foreign Policy, and Security Studies.

**NATO in the Post-Cold War Era** Massimo de Leonardis, 2022-11-29 This book analyses the evolution of the North Atlantic Treaty Organization (NATO) and its policies from the Cold War until today. NATO's future cannot be fully understood without analysing its past: the origins of its structure and goals, and their transformation over time. By exploring NATO's geopolitical and military role at crucial points throughout history, this edited volume considers the challenges and threats which have faced the alliance, as well as its strengths and weaknesses. It covers highly-debated and unresolved issues such as budgetary burden-sharing and the military transatlantic gap, the enlargement process, and the role of Asia in influencing NATO's policies. Combining a historical approach with international perspectives, this book is an interdisciplinary read that will appeal to scholars of diplomatic history and international relations. Chapters 1 and 2 are available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](https://link.springer.com).

*Higher Education in Regional and City Development: State of Paraná, Brazil 2011* OECD, 2011-08-24 This book analyses how higher education in the State of Paraná in Brazil impacts regional and local development.

*NATO's Enlargement and Russia* Oxana Schmies, 2021-04-30 The Kremlin has sought to establish an exclusive Russian sphere of influence in the nations lying between Russia and the EU, from Georgia in 2008 to Ukraine in 2014 and Belarus in 2020. It has extended its control by means of military intervention, territorial annexation, economic pressure and covert activities. Moscow seeks to justify this behavior by referring to an alleged threat from NATO and the Alliance's eastward enlargement. In the rhetoric of the Kremlin, NATO expansion is the main source for Moscow's stand-off with the West. This collection of essays and analyses by prominent politicians, diplomats, and scholars from the US, Russia, and Europe provides personal perspectives on the sources of the Russian-Western estrangement. They draw on historical experience, including the Russian-Western controversies that intensified with NATO's eastward expansion in the 1990s, and reflect on possible perspectives of reconciliation within the renewed transatlantic relationship. The volume touches upon alleged and real security guarantees for the countries of Eastern and Central Europe as well as past and current deficits in the Western strategy for dealing with an increasingly hostile Russia. Thus, it contributes to the ongoing Western debate on which policies towards Russia can help to overcome the deep current divisions and to best meet Europe's future challenges.

**The Nordic, Baltic and Visegrád Small Powers in Europe** Hilmar Þór Hilmarsson, 2023-03-10 This volume addresses and seeks to answer a number of questions on the current issues facing small states/powers in Europe. How can small European states survive and prosper within a multipolar world of great powers? What part should small states take in European integration? Are EU fiscal and monetary policies allowing for Keynesian economic stimulus when needed and are euro area convergence criteria viable as the world recovers from the COVID-19 crisis? Are small state alliances within the EU useful to counterbalance the influence of the larger EU member states? How far should EU and NATO expansion go? Should it include countries such as Ukraine? Can the EU rely on US leadership of NATO for its security? How should small states relate to great powers seeking to influence Europe, most notably the US, the People's Republic of China and the Russian Federation? Do smaller states need to choose a single ally among the major powers? Using an interdisciplinary approach, the author discusses issues of economic policy, international relations and politics, economic and political integration, as well as the effects of global and regional institutions, and priorities in bilateral development cooperation, demonstrating how policies are shaped by the interaction between small states (small powers) and large states (great powers).

*The Belt and Road Initiative in South-South Cooperation* Li Sheng, Dmitri Felix do Nascimento, 2021-11-17 This book seeks to

illuminate what China's Belt and Road initiative truly means for the global south, offering historical context and explaining the vision that the Chinese State has in coordinating actions in the territorial, political and economic spheres in a multilateral pretension. How does the BRI generate economic returns for China, and what are the political and economic impacts of the BRI? In this provocative and deeply researched new work, the authors provide a new framework for understanding the BRI, one which will be useful to scholars, policymakers and economists.

*Shaping National Security* Pawel Gromek,Mariusz Feltynowski,Monika Wojakowska,2023-12-14 Shaping National Security: International Emergency Mechanisms and Disaster Risk Reduction presents international emergency mechanisms relative to disaster risk reduction (DRR). The goal is to share knowledge about existing frameworks, and utilize established DRR policies and programs, as another means to reinforce and strengthen national security in countries around the world. The book outlines, in detail, the United Nations Disaster Assessment and Coordination (UNDAC), the International Search and Rescue Advisory Group (INSARAG), the North Atlantic Treaty Organisation (NATO) and the Union Civil Protection Mechanism (UCPM) DRR programs. While these entities' versions of DRR best practices are largely directed at decreasing the impact of disaster hazards, limiting relevant exposure, local vulnerabilities, increasing capacities to cope with disaster, the authors present these frameworks as potential tools, and effective means, to support national security efforts. This is especially important in disaster circumstances when local, and national emergency resources, may be insufficient to face hazards and multi-hazards, and result in cascading effects to occur as hazard events transpire. Chapters present various resources available to them, through these programs, to encourage authorities from every country to effectively apply the mechanisms—and emergency mechanisms specifically—to offer domestic solutions. Due to these programs proven track records in providing organisational standards, the use of such mechanisms can serve as both the basis to foster sound DRR practices and, by extension, can supplement resiliency, security, and continuity within countries. This concept is based on the premise that the UNDAC, INSARAG, NATO and ECPM emergency mechanisms have been developed to be implementable (directly or indirectly) in every country in the world when disasters occur. Shaping National Security takes a big-picture, holistic view of DRR and national security to offer innovative ideas and solutions to professionals and officials working in disaster management, disaster risk reduction, emergency management, crisis management, civil protection, public security management, national security, criminal justice, international studies, and homeland security.

**NATO 2030** Jason Blessing,Katherine Kjellström Elgin,Nele Marianne Ewers-Peters,Rakel Tiderman,2021-11-30 The North Atlantic Treaty Organization (NATO) is the world's largest, most powerful military alliance. The Alliance has navigated and survived the Cold War, the collapse of the Soviet Union, and the post-9/11 era. Since the release of the 2010 Strategic Concept, NATO's strategic environment has again undergone significant change. The need to adapt is clear. An opportunity to assess the Alliance's achievements and future goals has now emerged with the Secretary General's drive to create a new Strategic Concept for the next decade—an initiative dubbed NATO 2030. A necessary step for formulating a new strategic outlook will thus be understanding the future that faces NATO. To remain relevant and adjust to new circumstances, the Alliance must identify its main challenges and opportunities in the next ten years and beyond. This book contributes to critical conversations on NATO's future vitality by examining the Alliance's most salient issues and by offering recommendations to ensure its effectiveness moving forward. Written by a diverse, multigenerational group of policymakers and academics from across Europe and the United States, this book provides new insights about NATO's changing threat landscape, its shifting internal dynamics, and the evolution of warfare. The volume's authors tackle a wide range of issues, including the challenges of Russia and China, democratic backsliding, burden sharing, the extension of warfare to space and cyberspace, partnerships, and public opinion. With rigorous assessments of NATO's challenges and opportunities, each chapter provides concrete recommendations for the Alliance to chart a path for the future. As such, this book is an indispensable resource for NATO's strategic planners and security and defense experts more broadly.

*Global Media Dialogues* Lee Artz,2023-07-24 This book, the first of its kind, brings together leading scholars from multiple perspectives in a serious dialogue about continuity and change in global media production and content. Looking at a wide swath of the world, these authors show the emergence of transnational collaboration in global television and film production across national borders that seem to transcend national cultures and identities. At the same time, traditional class analysis of such phenomena is reframed within the rise of myriad social movements for equality, democracy, human rights, and defense of the environment. What are the effects of media, local or global? Does the West continue to dominate or is cultural imperialism waning? With original chapters written by leading scholars from a variety of disciplines, this book will appeal to students and scholars interested in global media communication, cultural studies, and international political economy.
