However, they have been largely overlooked in mainstream conservation and forestry politics. This volume explains the use and importance of certification and eco-labelling for guaranteeing best management practices of non-timber forest products in the field. Using extensive case studies and global profiles of non-timber forest products, this work not only seeks to further our comprehension of certification processes but also broaden understanding of non-timber forest product management, harvesting and marketing. 📖 **Dependence Logic** Jouko V[?] [?] N[?] nen,2007-05-10 Dependence is a common phenomenon, wherever one looks: ecological systems, astronomy, human history, stock markets - but what is the logic of dependence? This book is the first to carry out a systematic logical study of this important concept, giving on the way a precise mathematical treatment of Hintikka’s independence friendly logic. Dependence logic adds the concept of dependence to first order logic. Here the syntax and semantics of dependence logic are studied, dependence logic is given an alternative game theoretic semantics, and results about its complexity are proven. This is a graduate textbook suitable for a special course in logic in mathematics, philosophy and computer science departments, and contains over 200 exercises, many of which have a full solution at the end of the book. It is also accessible to readers, with a basic knowledge of logic, interested in new phenomena in logic.

📖 **User Experience is Brand Experience** Felix van de Sand,Anna-Katharina Frison,Pamela Zotz,Andreas Riener,Katharina Holl,2019-11-12 This book offers a new method for aligning brand management and user experience goals. Brand management deals with conveying individual brand values at all marketing contact points, the goal being to reach the target group and boost customer retention. In this regard, it is important to consider the uniqueness of each brand and its identity so as to design pleasurable and high-quality user experiences. Combining insights from science and practice, the authors present a strategy for using interaction patterns, visual appearance, and animations to validate the actual brand values that are experienced by users while interacting with a digital product. Further, they introduce a ‘UX identity scale’ by assigning brand values to UX related psychological needs. The method applied is subsequently backed by theoretical concepts and illustrated with practical examples and case studies on real-world mobile applications.
