KILLER INSTINCT JAGENDRA RANA, 2023-02-08 Killer instinct is an aggressive tenacious urge for domination in a struggle to attain a set goal. If you say that a sports player or politician has the killer instinct, you admire him for his toughness and determination to succeed. We don't strive to go the extra mile, which is the toughest in any endeavour. We should not create an impression that there's nothing more to achieve. Complacency and overconfidence are proven recipes for disaster. Winning isn't about finishing in first place. It isn't about beating the others. It is about overcoming yourself, overcoming your body, your limitations, and your fears. Winning means surpassing yourself and turning your dreams into reality. Success is an excellent acquired quality of a person to sustain a strong spirit which can willfully overpower the dictums of mind

Environmental Adaptations and Stress Tolerance of Plants in the Era of Climate Change Parvaiz Ahmad, M.N.V. Prasad, 2011-12-02 Climate change is a complex phenomenon with a wide range of impacts on the environment. Biotic and abiotic stress are a result of climate change. Abiotic stress is caused by primary and secondary stresses which are an impediment to plant productivity. Prolonged exposure to these stresses results in altered metabolism and damage to biomolecules. Plants evolve defense mechanisms to withstand these stresses, e.g. synthesis of

osmolytes, osmoprotectants, and antioxidants. Stress responsive genes and gene products including expressed proteins are implicated in conferring tolerance to the plant. This volume will provide the reader with a wide spectrum of information, including vital references. It also provides information as to how phytoconstituents, hormones and plant associated microbes help the plants to tolerate the stress. This volume also highlights the use of plant resources for ameliorating soil contaminants such as heavy metals. Dr. Parvaiz is Assistant professor in Botany at A.S. College, Srinagar, Jammu and Kashmir, India. He has completed his post-graduation in Botany in 2000 from Jamia Hamdard New Delhi India. After his Ph.D from the Indian Institute of Technology (IIT) Delhi, India in 2007 he joined the International Centre for Genetic Engineering and Biotechnology, New Delhi. He has published more than 20 research papers in peer reviewed journals and 4 book chapters. He has also edited a volume which is in press with Studium Press Pvt. India Ltd., New Delhi, India. Dr. Parvaiz is actively engaged in studying the molecular and physio-biochemical responses of different plants (mulberry, pea, Indian mustard) under environmental stress. Prof. M.N.V. Prasad is a Professor in the Department of Plant Sciences at the University of Hyderabad, India. He received B.Sc. (1973) and M.Sc. (1975) degrees from Andhra University, India, and the Ph.D. degree (1979) in botany from the University of Lucknow, India. Prasad had published 216 articles in peer reviewed journals and 82 book chapters and conference proceedings in the broad area of environmental botany and heavy metal stress in plants. He is the author, co-author, editor, or co-editor for eight books.
