Global Game Industries and Cultural Policy Anthony Fung, 2017-02-10 This is the first book that sheds light on global game industries and cultural policy. The scope covers the emerging and converging theory and models on cultural industries and its development, and their connection to national cultural policy and globalization. The primary focus of the book is on Asian cultural policy and industries while there are implicit comparisons throughout the book to compare Asia to other global markets. This book is aimed at advanced undergraduates, graduate students and faculty members in programs addressing cultural policy and digital games. It will also be of interest to those within the cultural policy community and to digital games professionals.

Driving Entrepreneurship in Southeast Asia Vanessa Ratten, 2022-03-17 Southeast Asia is one of the most dynamic and entrepreneurial regions in the world. Despite its entrepreneurial nature, the study of entrepreneurship has largely been on North America and Europe. This book showcases the entrepreneurial capabilities that are taking place in Southeast Asia from a digital innovation perspective. The book questions the role of entrepreneurship in the Southeast Asian context. It also provides a historical analysis of how entrepreneurship is influenced by the history of individual Southeast Asian countries. It goes on to examine heritage tourism to explore how entrepreneurship is embedded in cultural and social endeavours, and explores how digital technologies and innovations are leading change in the region's business ecosystems. The book closes by examining the effects of the pandemic from a risk management perspective to show the interrelationship between crisis management and innovation, before highlighting areas for future research. The comprehensive coverage of different countries within Southeast Asia regarding their entrepreneurial initiatives will enrich the existing literature and will be a useful reference to scholars researching entrepreneurship.

applications; high performance computing and networks; geometric modeling, graphics and visualization; advanced and emerging applications; and information systems and technologies.

Vietnam 2035 World Bank Group;Ministry of Planning and Investment of Vietnam,2016-11-07 Thirty years of Đổi Mới (economic renovation) reforms have catapulted Vietnam from the ranks of the world's poorest countries to one of its great development success stories. Critical ingredients have been visionary leaders, a sense of shared societal purpose, and a focus on the future. Starting in the late 1980s, these elements were successfully fused with the embrace of markets and the global economy. Economic growth since then has been rapid, stable, and inclusive, translating into strong welfare gains for the vast majority of the population. But three decades of success from reforms raises expectations for the future, as aptly captured in the Vietnamese constitution, which sets the goal of "a prosperous people and a strong, democratic, equitable, and civilized country." There is a firm aspiration that by 2035, Vietnam will be a modern and industrialized nation moving toward becoming a prosperous, creative, equitable, and democratic society. The Vietnam 2035 report, a joint undertaking of the Government of Vietnam and the World Bank Group, seeks to better comprehend the challenges and opportunities that lie ahead. It shows that the country's aspirations and the supporting policy and institutional agenda stand on three pillars: balancing economic prosperity with environmental sustainability; promoting equity and social inclusion to develop a harmonious middle- class society; and enhancing the capacity and accountability of the state to establish a rule of law state and a democratic society. Vietnam 2035 further argues that the rapid growth needed to achieve the bold aspirations will be sustained only if it stands on faster productivity growth and reflects the costs of environmental degradation. Productivity growth, in turn, will benefit from measures to enhance the competitiveness of domestic enterprises, scale up the benefits of urban agglomeration, and build national technological and innovative capacity. Maintaining the record on equity and social inclusion will require lifting marginalized groups and delivering services to an aging and urbanizing middle-class society. And to fulfill the country's aspirations, the institutions of governance will need to become modern, transparent, and fully rooted in the rule of law.

The Economy and Business Environment of Vietnam Roderick

Macdonald, 2020-08-17 This Palgrave Pivot provides an introduction to the economy and business environment of Vietnam, a member of the ASEAN Economic Community whose economy is rapidly growing. The introduction argues that though there may be perceived disadvantages in investing in Vietnam, there are a number of benefits as well, such as the country's openness to trade and foreign direct investment, the increasing ease of doing business there and the dynamism of the economy. The book then provides an overview of Vietnam's economic policy since 1975, covering reunification, attempts at a command economy, and finally renovation under Doi Moi Policy. Further chapters cover the expansion of the private sector, interest in foreign investment, and the peculiarities of marketing and finance in Vietnam. As an edited volume with chapters written by Vietnamese scholars across economics, history, and business, this book is critical reading for researchers studying Vietnam and other Asian economies and for businesses interested in expanding into that market.

Impact Investment Funds for Frontier Markets in Southeast Asia Manuel

Stagars, 2015-05-28 Until now, most socially responsible and impact investments have centred on developed markets, with growth potential and investment opportunities in the frontier economies of countries such as Cambodia, Laos, Myanmar, and Vietnam being mostly overlooked. While some individuals and organizations have begun to develop responsible investment opportunities with these countries in mind, large new sources of capital for development could still emerge. This book explores the greater potential for global investment in Southeast Asia, and the ways in which socially responsible investment styles can be used in their developing economies. It demonstrates how the benefits of investment could create a robust platform for separate stakeholders, including governments, non-governmental organizations, development banks, the financial sector, and small and medium sized enterprises. The author explores how shaping collaborative sustainable investment policies could speed up inclusive development, address the needs of those at the bottom of the pyramid, and ensure sustainable future growth.
