Cultural Confluence in Organisational Change Alette Vonk,Vasco Freitas Silva,2024-02-08 This book examines the challenges of intercultural management in sub-Saharan Africa. It presents a case study of Vasco Silva, a Portuguese businessman who established a successful business in Luanda, Angola. After four years of growth, Silva encounters a culture shock due to a wild strike by his employees. He embarks on a deep cultural exploration using the Hofstede 6D model and the Toyota-management tool Genchi Genbutsu (go and see for yourself). Gradually, Silva gains an understanding of effective leadership in the Angolan context, unraveling important features of local culture and initiating an organizational change project. This work contributes to the ongoing discourse in African management literature, particularly regarding the integration of modern and contemporary traditional organizational and leadership concepts. It responds to the demand for descriptive accounts of hybrid case studies of confluencing cultures. Scholars of African management philosophy and business leaders can utilize this case study to explore indigenous African notions in a business setting, demonstrating the performative characteristics of local leadership forms and the adaptability required for success in foreign business environments

The 39 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on stream control and management, management and control of multicast communications, ad-hoc and sensor networks, QoS and mobility management in wireless networks, traffic engineering and routing, differentiated network services, on-demand networking issues and policies, multimedia QoS management, security management, and (corresponding to an associated workshop) end-to-end monitoring techniques and services.

High Speed Networks and Multimedia Communications Zoubir Mammeri,Pascal Lorenz,2004-09-21 Nowadays, networks and telecommunications are two of the most active fields. Research and development in these areas have been going on for some time, reaching the stage of products. The

objectives of HSNMC 2004 (International Conference on High Speed Networks and Multimedia Communications) were to promote research and development activities and to encourage communication between academic researchers and engineers throughout the world in the areas related to high-speed networks and multimedia communications. The seventh edition of HSNMC was held in Toulouse, France, on June 30– July 2, 2004.

There were 266 submissions to HSNMC this year from 34 countries, which were evaluated by program committee members assisted by external reviewers. Each paper was reviewed by several reviewers. One hundred and one papers were selected to be included in these proceedings. The quality of submissions was high, and the committee had to decline some papers worthy for publication. The papers selected in this book illustrate the state of the art, current discussions, and development trends in the areas of networks, telecommunication and multimedia applications. The contributions published in this book underline the international importance of the related field of research. They cover a variety of topics, such as QoS in DiffServ networks, QoS analysis and measurement, performance modelling, TCP modelling and analysis, MPLS for QoS provision, scheduling and resource allocation, routing, multicast, security and privacy issues, peer-to-peer applications, video applications, software and middleware for networks, mobile networks, mobility, satellite, mobile IP, wireless networks, WLAN, ad hoc networks, 3G/UMTS, IEEE 802.

NETWORKING 2002: Networking Technologies, Services, and Protocols; Performance of Computer and Communication Networks; Mobile and Wireless Communications Enrico Gregori, Marco Conti, Andrew T. Campbell, Guy Omidyar, Moshe Zukerman, 2007-06-30 This book constitutes the refereed proceedings of the Second IFIP-TC6 Networking Conference, Networking 2002. Networking 2002 was sponsored by the IFIP Working Groups 6.2, 6.3, and 6.8. For this reason the conference was structured into three tracks: i) Networking Technologies, Services, and Protocols, ii) Performance of Computer and Communication Networks, and iii) Mobile and Wireless Communications. This year the conference received 314 submissions coming from 42 countries from all five continents Africa (4), Asia (84), America (63), Europe (158), and Oceania (5). This represents a 50% increase in submissions over the first conference, thus indicating that Networking is becoming a reference conference for worldwide researchers in the networking community. With so many papers to choose from, the job of the Technical Program Committee, to provide a conference program of the highest technical excellence, was both challenging and time consuming. From the 314 submissions, we finally selected 82 full papers for presentation during the conference technical sessions. To give young researchers and researchers from emerging countries the opportunity to present their work and to receive useful feedback from

participants, we decided to include two poster sessions during the technical program. Thirty-one short papers were selected for presentation during the poster sessions. The conference technical program was split into three days, and included, in addition to the 82 refereed contributions, 5 invited papers from top-level researchers in the networking community.

Enterprise Information Systems Joaquim Filipe, 2013-11-11 This book includes a set of selected papers from the first International Conference on Enterprise Information Systems, (ICEIS'99) held in Seútbal, Portugal, from 27 to 30 March 1999. ICEIS focuses on real world applications and aims at becoming a major point of contact between research scientists, engineers and practitioners in the area of business applications of information systems. This year four simultaneous tracks were held, covering different aspects related to enterprise computing, including: Systems Analysis and Specification, Database Technology and its Applications, Artificial Intelligence and Decision Support Systems, and Internet and Intranet Computing. Although ICEIS'99 received more than 200 submissions, only 96 papers were accepted for oral presentation and only 24 were selected for inclusion in this book. These numbers demonstrate stringent quality criteria and the intention of maintaining a high quality forum for future editions of this conference. A number of additional keynote lectures, case studies and technical tutorials were also held. These presentations, by specialists in different knowledge areas made an important contribution to increase the overall quality of the Conference, and are partially expressed in the first two papers of the book.

Research and Advanced Technology for Digital Libraries Jose Borbinha, Thomas Baker, 2003-06-26 ECDL2000, the Fourth European Conference on Research and Advanced Technology for Digital Libraries, is being held this year in Lisbon, Portugal, following previous events in Pisa (1997), Heraklion (1998), and Paris (1999). One major goal of the ECDL conference series has been to draw information professionals, stakeholders, and user communities from both the research world and from industry into a discussion of the alternative technologies, policies, and scenarios for global digital libraries. The success of previous conferences makes them a hard act to follow. The field of digital libraries draws on a truly diverse set of scientific and technical disciplines. In the past three years, moreover, global cooperation on research and development has emerged as an urgent priority, particularly in the new European Framework Programme and in the Digital Library Initiative in the United States. Because of this diversity, the field is perhaps still struggling for an identity. But this struggle for identity is itself a source of energy and creativity. Participants in this field feel themselves to be part of a special community, with special people. Each of us may claim expertise on a narrow issue, with specific projects, but the choices we make and the

methods we use in local solutions can have unforeseen impacts within a growing universe of interconnected resources.

Innovative Housing Practices Vitor Abrantes,Oktay Ural,2014-06-28 The 53 papers contained in this volume reflect the aims of the International Association for Housing Science which are to improve every phase of housing technology and production particularly through new urban planning, new designs, new materials, new technological and management developments and innovative financing. Emphasis is placed on the application of all these aspects to developing countries although there is much to interest professionals in the developed world.

Enclosure Masonry Wall Systems Worldwide S. Pompeu Santos,2014-04-21 Enclosure walls have a key role in building construction, providing structural safety and protecting interiors from intrusion. The concept of an enclosure wall is a traditional one, common to the building history of many

countries. There is a tremendous variety in types of enclosure walls, depending on such variables as climate and local technology

Web Caching and Its Applications S.V. Nagaraj, 2004-06 The last decade has seen a tremendous growth in the usage of the World Wide Web. The Web has grown so fast that it seems to be becoming an unusable and slow behemoth. Web caching is one way to tame and make this behemoth a friendly and useful giant. The key idea in Web caching is to cache frequently accessed content so that it may be used profitably later. This book focuses entirely on Web caching techniques. Much of the material in this book is very relevant for those interested in understanding the wide gamut of Web caching research. It will be helpful for those interested in making use of the power of the Web in a more profitable way. Audience and purpose of this book This book presents key concepts in Web caching and is meant to be suited for a wide variety of readers including advanced undergraduate and graduate students, programmers, network administrators, researchers, teachers, technologists and Internet Service Providers (ISPs).

Calypso and Other Music of Trinidad, 1912-1962 , 2015-04-30 Calypso, with its diverse cultural heritage, was the most significant Caribbean musical form from World War I to Trinidad and Tobago Independence in 1962. Though wildly popular in mid-1950s America, Calypso--along with other music from the island of the hummingbird--has been largely neglected or forgotten. This first-ever discography of the first 50 years of Trinidadian music includes all the major artists, as well as many obscure performers. Chronological entries for 78 rpm recordings give bibliographical references, periodicals, websites and the recording locations. Rare field recordings are cataloged for the first time, including East Indian and Muslim community performances and Shango and Voodoo rites. Appendices give 10-inch LP (78 rpm), 12-inch LP (33 1/3 rpm), extended play (ep) and 7-inch single (45) listings. Non-commercial field recordings, radio broadcasts and initially unissued sessions also are listed. The influence of Trinidadian music on film, and the Calypso craze are discussed. Audio sources are provided. Indexes list individual artists and groups, recording titles and labels.

External Thermal Insulation Composite Systems (ETICS) Eva Barreira, Vasco Peixoto de Freitas, 2015-10-14 This book analyzes the hygrothermal behaviour of external thermal insulation composite systems (ETICS), components that increase the thermal efficiency of buildings. Treating a topic that has largely been neglected, it explores the main cause of biological growth within ETICS. The results of two experimental test series are presented: (i) a long-term assessment of four façades covered with ETICS and (ii) an evaluation of the factors affecting the façades' hygrothermal behaviour.

Furthermore, using a previously validated numerical model, it presents a sensitivity analysis of the hygrothermal behaviour of façades coated with ETICS. It also provides a methodology to assess the surface humidification of ETICS, which combines the effect of surface condensation, wind-driven rain and the drying process (three of the most prevalent parameters influencing the surface moisture content), which can then be used as a decision-support tool. ETICS are now frequently used in Europe to improve the thermal efficiency of buildings. Despite their advantages in terms of thermal efficiency, their low cost and their ease of application, these systems are adversely affected by microbiological growth, which causes defacement of cladding. Although the thermal and mechanical performance of the system is not impaired, biological defacement has an enormous aesthetic impact, affecting the inhabitants' living experience and restricting the full implementation of this technology. **External Thermal Insulation Composite Systems (ETICS): An Evaluation of Hygrothermal Behaviour** provides a valuable resource to engineers and architects utilizing ETICS in their work, and for

researchers and students interested in the hygrothermal behaviour of ETICS. It is also intended for those employed in industry and manufacturers of ETICS.
