Financial Soundness Indicators for Financial Sector Stability in Viet Nam

Asian Development Bank, 2015-09-01 Financial soundness indicators (FSIs) are methodological tools that help quantify and qualify the soundness and vulnerabilities of financial systems according to five areas of interests: capital adequacy, asset quality, earnings, liquidity, and sensitivity to market risk. With support from the Investment Climate Facilitation Fund under the Regional Cooperation and Integration Financing Facility, this report describes the development of FSIs for Viet Nam and analyzes the stability and soundness of the Vietnamese banking system by using these indicators. The key challenges to comprehensively implementing reforms and convincingly addressing the root causes of the banking sector problems include (i) assessing banks' recapitalization needs, (ii) revising classification criteria to guide resolution options, (iii) recapitalization and restructuring that may include foreign partnerships, (iv) strengthening the Vietnam Asset Management Company, (v) developing additional options to deal with nonperforming loans, (vi) tightening supervision to ensure a sound lending practice, (vii) revamping the architecture and procedures for crisis management, and (viii) strengthening financial safety nets during the reform process.

Analytics in Finance and Risk Management Nga Thi Hong Nguyen, Shivani Agarwal, Ewa Ziemba, 2023-12-13 This book presents contemporary issues and challenges in finance and risk management in a time of rapid transformation due to technological advancements. It includes research articles based on financial and economic data and intends to cover the emerging role of analytics in financial management, asset management, and risk management. Analytics in Finance and Risk Management covers statistical techniques for data analysis in finance. It explores applications in finance and risk management, covering empirical properties of financial systems. It addresses data science involving the study of statistical and computational models and includes basic and advanced concepts. The chapters incorporate the latest methodologies and challenges facing financial and risk management and illustrate related issues and their implications in the real world. The primary users of this book will include researchers, academicians, postgraduate students, professionals in engineering and business analytics, managers, consultants, and advisors in IT firms, financial markets, and services domains.

The Political Economy of Asian Transition from Communism Sujian Guo, 2017-11-28 A comparative study of the political economy of the transition from communism in East and Southeast Asian countries (China, North Korea, Vietnam, Laos and Cambodia), addressing the key theoretical questions generated from the debate between shock-therapists and gradualists. While accurately defining the pre-reform model, this book explores the causal variables that have contributed to reform efforts within Asia, examining the significance of the sequencing of political and economic transition and the interplay between politics and the economy in determining variations in transition

outcomes. Comparing the 'real world' experiences of transition nations in communist Asia with Eastern Europe, prominent questions are brought to the fore; will market capitalism or market socialism prevail after the grand failure of communism? This book makes an important contribution to the political economy theory of comparative communist and post-communist studies and provides detailed analytical insights that will prove influential in future theoretical work.

Vietnam's Economic Entities in Transition S. Sakata, 2013-07-12 During the last two decades, Vietnam has been undergoing a process of deregulating economic activities and integrating into the global economy. The passing of the Enterprise Law in 1999, which facilitated the establishment of private enterprises, and the achievement of membership of the World Trade Organization (WTO) in 2007 were two of the landmark events in Vietnam's rapid growth over this period. In order to cope with such a socioeconomic and institutional transformation, Vietnam's domestic economic entities have employed various measures, including technical upgrading, a shift into new areas of business, the diversification of capital acquisition, the adoption of new models of corporate governance, and other measures. As a result, the reorganization of Vietnam's domestic economic entities, such as the equitization of many state-owned enterprises, the emergence of large-scale private enterprises and the revitalization of rural entrepreneurs have taken place in many areas. This book attempts to analyze economic activity in Vietnam, covering a variety of types and sizes of Vietnam's domestic economic entities from large-scale stateowned enterprises to micro-scale rural entrepreneurs.

The International Directory of Government 2022 Europa Publications, 2022-08-05

The International Directory of Government is the definitive guide to people in power in every part of the world. All the top decision-makers are included in this one-volume publication, which brings together government institutions, agencies and personnel from the largest nations (China, India, Russia, etc.) to the smallest overseas dependencies (Guadeloupe, Guernsey and Christmas Island, etc). Institutional entries contain the names and titles of principal officials, postal, e-mail and internet addresses, telephone and fax numbers where applicable, and other relevant details. Key features: - comprehensive lists of government ministers and ministries - coverage of state-related agencies and other institutions arranged by subject heading - details of important state, provincial and regional administrations, including information on US states, Russian republics, and the states and territories of India. Contents include: A comprehensive directory section organized by country or territory; Details of co-ordinating bodies, and of foundations, trusts and non-profit organizations; A full index of organizations, and indexes by main activity and by geographical area of activity.

Recovering Financial Systems M. Watanabe, 2006-09-29 This book explores what happened in the transition economies of China, Vietnam and Myanmar from both macro and micro perspectives, and questions whether the governments of these countries are capable of implementing effective reform and transformation.

Financial Crisis and Bank Management in Japan (1997 to 2016) Mitsuhiro Nakano, 2016-11-22 This book explores the challenges faced by the Japanese economy and the Japanese banking industry following the financial crisis that emerged around the turn of the last millennium. The author explores how the Japanese financial crisis of the late

1990s engendered huge restructuring efforts in the banking industry, which eventually led to even more sweeping changes of the economic system and long-term deflation in the 2000s. The discussion begins with an overview of the unconventional monetary policy launched by the Bank of Japan at this time, while banking administrative policies maintained their strict code of governance. The author describes how, just as recovery seemed possible, the twin disasters of the Lehman shock and the Great East Japan Earthquake buffeted the recovering economy, and pushed Japan again into deflation. The book also looks to the very recent past, with the sudden advent of Abenomics in 2013, with its three-pronged approach, which was intended to break the deflationary mindset. Finally, the author projects what the future of the banking industry in Japan might encompass, as looming demographic changes gradually threaten both the economy and the banking industry.

ASEAN Corporate Governance Scorecard Asian Development Bank, 2013-05-01

Corporate governance principles provide guidance on how corporations should operate and can be useful to attract foreign investments. In the Association of Southeast Asian Nations (ASEAN), countries use national methodologies to assess corporate governance performance of publicly listed companies. The Asian Development Bank in partnership with the ASEAN Capital Markets Forum have jointly developed an ASEAN methodology of corporate governance assessment using a scorecard system that is based on international best practices and that encourages publicly listed companies to go beyond national legislation requirements. This inaugural report is a compilation of corporate governance assessments of publicly listed companies in six ASEAN countries using the Scorecard. The

assessment is useful to improve corporate governance in the region collectively and to brand ASEAN as an asset class.
