The Rhetorical Presidency of George H. W. Bush Martin J. Medhurst, 2006-02-15 For George H. W. Bush, the distinction between campaigning ("politics") and governing ("principles") was crucial. Once in office, he abandoned his campaign mode and with it the rhetorical strategies that brought electoral success. Not recognizing the crucial importance of rhetoric to policy formation and implementation, Bush forfeited the resources of the bully pulpit and paid the price of electoral defeat. In this first-ever analysis of Bush's rhetoric to draw on the archives of the Bush Presidential Library, scholars explore eight major events or topics associated with his presidency: the first Gulf War, the fall of the Berlin wall, the "New World Order," Bush's "education presidency," his environmental stance, the "vision thing," and the influence of the Religious Right. The volume concludes with a cogent of the 1992 re-election campaign and Bush's last-gasp use of economic rhetoric. Drawing on the resources of the Bush Presidential Library and interviews with many of Bush's White House aides, the scholars included in this tightly organized volume ask, How well did President Bush and his administration respond to events, issues, and situations? In the process, they also suggest how a more perceptive embrace of the art of rhetoric might have allowed them to respond more successfully. The Rhetorical Presidency of George H. W. Bush breaks important ground for our understanding of the forty-first president's time in office and the reasons it ended so quickly.

World Regional Geography (with Subregions) Lydia Mihelic Pulsipher, Alex Pulsipher, 2007-09-14 Shows how individuals are affected by, and respond to, economic, social, and political forces at all levels of scale: global, regional and local. It offers an inclusive picture of people in a globalizing world - men, women, children, both mainstream and marginalized citizens - not as seen from a western perspective, but as they see themselves. Core topics of physical, economic, cultural, and political geography are examined from a contemporary perspective, based on authoritative insights from recent geographic theory and examples from countries from around the world.

Music in the World Timothy D. Taylor, 2017-04-11 In music studies, Timothy D. Taylor is known for his insightful essays on music, globalization, and capitalism. Music in the World is a collection of some of Taylor's most recent writings—essays concerned with questions about music in capitalist cultures, covering a historical span that begins in the late nineteenth and early twentieth centuries and continues to the present. These essays look at shifts in the production, dissemination, advertising, and consumption of music from the industrial capitalism of the nineteenth century to the globalized neoliberal capitalism of the past few decades. In addition to chapters on music, capitalism, and globalization, Music in the World includes previously unpublished essays on the continuing utility of the concept of culture in the study of music, a historicization of treatments of affect, and an essay on value and music. Taken together, Taylor's essays chart the changes in different kinds of music in twentieth- and twenty-first-century music and culture from a variety of theoretical perspectives.

Tensions in World Literature Weigui Fang, 2018-09-28 This collection gives a diversified account of world literature, examining not only the rise of the concept, but also problems such as the relation between the local

and the universal, and the tensions between national culture and global ethics. In this context, it focuses on the complex relationship between Chinese literature and world literature, not only in the sense of providing an exemplary case study, but also as an introspection and re-location of Chinese literature itself. The book activates the concept of world literature at a time when it is facing the rising modern day challenges of race, class and culture.

World Trade Systems of the East and West Geoffrey C. Gunn, 2017-11-13 In *World Trade Systems of the East and West*, Geoffrey C. Gunn profiles Nagasaki's historical role in mediating the Japanese bullion trade, especially silver exchanged against Chinese and Vietnamese silk.

World City Network Peter J. Taylor, Ben Derudder, 2004-06-02 Peter Taylor's compelling insights challenge us to view cities as part of a global network, divorced from the constraints of national or even regional boundaries.

The New World History Ross E. Dunn, Laura J. Mitchell, Kerry Ward, 2016-08-23 *The New World History* is a comprehensive volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field. The forty-four articles in this book take stock of the history, evolving literature, and current trajectories of new world history. These essays, together with the editors' introductions to thematic chapters, encourage educators and students to reflect critically on the development of the field and to explore concepts, approaches, and insights valuable to their own work. The selections are organized in ten chapters that survey the history of the movement, the seminal ideas of founding thinkers and today's practitioners, changing concepts of world historical space and time, comparative methods, environmental history, the "big history" movement, globalization, debates over the meaning of Western power, and ongoing questions about the intellectual premises and assumptions that have shaped the field.

A World History of Chinese Literature Yingjin Zhang, 2023-07-25 Providing a broad introduction to the area, *A World History of Chinese Literature* maps the field of Chinese literature across its various worlds, looking both within – at the world of Chinese literature, its history, linguistic, cultural, local, and regional specificities – and without – at the way Chinese literature has circulated throughout the world. The thematic focus allows for a broad number of key categories, such as authors, genres, genders, regions, as well as innovative explorations of new topics and issues such as inter-arts performativity and transmediation. The sections cover the circulation and reception of China in world literature, as well as the worlds of: Chinese literature across the globe Borders, oceans, and rainforests Comparative literary genres Translingual writers and scholars Gender configurations Translation and transmediation With a focus on the twentieth and twenty-first century, this collection intervenes in current debates on global Chinese literature, Sinophone and Sinoscript studies, and the production and reception of literary works by ethnic Chinese in non-Sinitic languages, as well as Anglophone literature inspired by Chinese literary tradition. It will be of interest to anyone working on or studying Chinese literature, language and culture, as well as world literatures in relation to China.

Taiwanese Literature as World Literature Pei-yin Lin, Wen-chi Li, 2022-12-15 Owing to Taiwan's multi-ethnic nature

and palimpsestic colonial past, Taiwanese literature is naturally multilingual. Although it can be analyzed through frameworks of Japanophone literature and Chinese literature, and the more provocative Sinophone literature, only through viewing Taiwanese literature as world literature can we redress the limits of national identity and fully examine writers' transculturation practice, globally minded vision, and the politics of its circulation. Throughout the colonial era, Taiwanese writers gained inspiration from global literary trends mainly but not exclusively through the medium of Japanese and Chinese. Modernism was the mainstream literary style in 1960s Taiwan, and since the 1980s Taiwanese literature has demonstrated a unique trajectory shaped jointly by postmodernism and postcolonialism. These movements exhibit Taiwanese writers' creative adaptations of world literary thought as a response to their local and trans-national reality. During the postwar years Taiwanese literature began to be more systematically introduced to world readers through translation. Over the past few decades, Taiwanese authors and their translated works have participated in global conversations, such as those on climate change, the post-truth era, and ethnic and gender equality. Bringing together scholars and translators from Europe, North America, and East Asia, the volume focuses on three interrelated themes – the framing and worlding ploys of Taiwanese literature, Taiwanese writers' experience of transculturation, and politics behind translating Taiwanese literature. The volume stimulates new ways of conceptualizing Taiwanese literature, demonstrates remarkable cases of Taiwanese authors' co-option of world trends in their Taiwan-concerned writing, and explores its readership and dissemination.

The Effectiveness of World Bank Support for Community-based and -driven Development , 2005-01-01 Participatory approaches that involve local communities in their own development have gained substantial support among international donors over the past quarter-century and have become increasingly important in the work of the World Bank. Community participation is an approach to development that can be used with any Bank lending instrument and across sectors. Projects can involve communities in different ways--by sharing information, consulting, collaborating, or empowering them. The process of involving communities in project activities is also expected to contribute in most cases to communi.

Great Powers and World Order Charles W. Kegley,Gregory A. Raymond,2020-02-12 Great Powers and World Order encourages critical thinking about the nature of world order by presenting the historical information and theoretical concepts needed to make projections about the global future. Charles W. Kegley and Gregory Raymond ask students to compare retrospective cases and formulate their own hypotheses about not only the causes of war, but also the consequences of peace settlements. Historical case studies open a window to see what strategies for constructing world order were tried before, why one course of action was chosen over another, and how things turned out. By moving back and forth in each case study between history and theory, rather than treating them as separate topics, the authors hope to situate the assumptions, causal claims, and policy prescriptions of different schools of thought within the temporal domains in which they took root, giving the reader a better sense of why policy makers embraced a particular view of world order instead of an alternative vision.

World War I and the Jews Marsha L. Rozenblit,Jonathan Karp,2017-08-01 World War I utterly transformed the lives of Jews around the world: it allowed them to display their patriotism, to dispel antisemitic myths about Jewish cowardice, and to fight for Jewish rights. Yet Jews also suffered as refugees and deportees, at times catastrophically. And in the aftermath of the war, the replacement of the Habsburg Monarchy and the Russian and Ottoman Empires with a system of nation-states confronted Jews with a new set of challenges. This book provides a fascinating survey of the ways in which Jewish communities participated in and were changed by the Great War, focusing on the dramatic circumstances they faced in Europe, North America, and the Middle East during and after the conflict.

World Cities And Climate Change Hodson, Mike, Marvin, Simon, 2010-06-01 Relationships between cities and socio-technical energy, water, waste and transport networks are changing. Global Urbanism argues that this is not something that is happening naturally but is the product of social, economic, political and spatial processes and that these changes have profound implications for the mutual organisation of urbanism and resource flows and consequently for the shape of contemporary and future cities.

Francophone Literature as World Literature Christian Moraru, Nicole Simek, Bertrand Westphal, 2020-06-25
Francophone Literature as World Literature examines French-language works from a range of global traditions and shows how these literary practices draw individuals, communities, and their cultures and idioms into a planetary web of tension and cross-fertilization. The Francophone corpus under scrutiny here comes about in the evolving, markedly relational context provided by these processes and their developments during and after the French empire. The 15 chapters of this collection delve into key aspects, moments, and sites of the literature flourishing throughout the francosphere after World War II and especially since the 1980s, from the French Hexagon to the Caribbean and India, and from Québec to the Maghreb and Romania. Understood and practiced as World Literature, Francophone literature claims--with particular force in the wake of the littérature-monde debate--its place in a more democratic world republic of letters, where writers, critics, publishers, and audiences are no longer beholden to traditional centers of cultural authority.

World Cities and Nation States Greg Clark, Tim Moonen, 2016-12-19 World Cities and Nation States takes a global perspective to show how national governments and states/provinces/regions continue to play a decisive, and often positive, partnership role with world cities. The 16 chapter book – comprised of two introductory chapters, 12 central chapters that draw on case studies, and two summary chapters - draws on over 40 interviews with national ministers, city government officials, business leaders and expert academics.
