Travelling Concepts in the Humanities Mieke Bal,2002-11-02 Attempting to bridge the gap between specialised scholarship in the humanistic disciplines and an interdisciplinary project of cultural analysis, Mieke Bal has written an intellectual travel guide that charts the course 'beyond' cultural studies. As with any guide, it can be used in a number of ways and the reader can follow or willfully ignore any of the paths it maps or signposts. Bal's focus for this book is the idea that interdisciplinarity in the humanities - necessary, exciting, serious - must seek its heuristic and methodological basis in concepts rather than its methods. Concepts are not grids to put over an object. The counterpart of any given concept is the cultural text or work or 'thing' that constitutes the object of analysis. No concept is meaningful for cultural analysis unless it helps us to understand the object better on its own terms. Bal offers the reader a sustained theoretical reflection on how to 'do' cultural analysis through a tentative practice of doing just that. This offers a concrete practice to theoretical constructs, and allows the proposed method more accessibility. Please note: illustrations have been removed from the ebook at the request of the rightsholder.

Cinematic Appeals Ariel Rogers,2013-11-19 Cinematic Appeals follows the effect of technological innovation on the cinema experience, specifically the introduction of widescreen and

stereoscopic 3D systems in the 1950s, the rise of digital cinema in the 1990s, and the transition to digital 3D since 2005. Widescreen cinema promised to draw the viewer into the world of the screen, enabling larger-than-life close-ups of already larger-than-life actors. This technology fostered the illusion of physically entering a film, enhancing the semblance of realism. Alternatively, the digital era was less concerned with the viewer's physical response and more with information flow, awe, and the reevaluation of spatiality and embodiment. This study ultimately shows how cinematic technology and the human experience shape and respond to each other over time.

Antebellum American Pendant Paintings Wendy N. E. Ikemoto, 2017-07-06 Antebellum American Pendant Paintings: New Ways of Looking marks the first sustained study of pendant paintings: discrete images designed as a pair. It opens with a broad overview that anchors the form in the medieval diptych, religious history, and aesthetic theory and explores its cultural and historical resonance in the 19th-century United States. Three case studies examine how antebellum American artists used the pendant format in ways revelatory of their historical moment and the aesthetic and cultural developments in which they partook. The case studies on John Quidor's *Rip Van Winkle and His Companions at the Inn Door* of Nicholas Vedder (1839) and *The Return of Rip Van Winkle* (1849) and Thomas Cole's *Departure and Return* (1837) shed new light on canonical antebellum American artists and their practices. The chapter on Titian Ramsay

Peale's Kilauea by Day and Kilauea by Night (1842) presents new material that pushes the geographical boundaries of American art studies toward the Pacific Rim. The book contributes to American art history the study of a characteristic but as yet overlooked format and models for the discipline a new and productive framework of analysis focused on the fundamental yet complex way images work back and forth with one another.

Creating the Viewer Justin Wyatt, 2024-04-23 A study of the largely hidden world of primary media market research and the different methods used to

understand how the viewer is pictured in the industry. The first book on the intersection between market research and media, *Creating the Viewer* takes a critical look at media companies' studies of television viewers, the assumptions behind these studies, and the images of the viewer that are constructed through them. Justin Wyatt examines various types of market research, including talent testing, pilot testing, series maintenance, brand studies, and new show "ideation," providing examples from a range of programming including news, sitcoms, reality shows, and dramas. He looks at brand studies for networks such as E!, and examines how the brands of individuals such as showrunner Ryan Murphy can be tested. Both an analytical and practical work, the book includes sample questionnaires and paths for study moderators and research analysts to follow. Drawn from over fifteen years of experience in research departments at various media companies, *Creating the Viewer* looks toward the future of media viewership, discussing how the concept of the viewer has changed in the age of streaming, how services such as Netflix view market research, and how viewers themselves can shift the industry through their media choices, behaviors, and activities.

A Theory of Narrative Rick Altman, 2008-07-03
Narrative is a powerful element of human culture, storing and sharing the cherished parts of our personal memories and giving structure to our laws, entertainment, and history. We experience narrative in words, pictures, and film, yet regardless of how the tale is told, story remains

independent from the media that makes it concrete. Narrative follows humans wherever they travel and adapts readily to new forms of communication. Constantly evolving and always up-to-date, narrative is a necessary strategy of human expression and a fundamental component of human identity. In order to understand human interaction, award-winning scholar Rick Altman launches a close study of narrative's nature, its variation in different contexts, and the method through which it makes meaning. Altman's approach breaks away from traditional forms of analysis, identifying three basic strategies: single-focus, dual-focus, and multiple-focus. Unpacking an intentionally diverse selection of texts, Altman demonstrates how these strategies function in context and illustrates their theoretical and practical applications in terms of textual analysis, literary and film history, social organization, religion, and politics. He employs inventive terminology and precise analytical methods throughout his groundbreaking work, making this volume ideal for teaching literary and film theory and for exploring the anatomy of narrative on a more general level.

Renaissance Theories of Vision John Shannon Hendrix, Charles H. Carman, 2016-12-05 How are processes of vision, perception, and sensation conceived in the Renaissance? How are those conceptions made manifest in the arts? The essays in this volume address these and similar questions to establish important theoretical and philosophical bases for artistic production in the Renaissance and beyond. The essays also attend to the views of historically significant writers from the ancient classical period to the eighteenth century, including Plato, Aristotle, Plotinus, St Augustine, Ibn Sina (Avicenna), Ibn al-Haytham

(Alhazen), Ibn Sahl, Marsilio Ficino, Nicholas of Cusa, Leon Battista Alberti, Gian Paolo Lomazzo, Gregorio Comanini, John Davies, Rene Descartes, Samuel van Hoogstraten, and George Berkeley. Contributors carefully scrutinize and illustrate the effect of changing and evolving ideas of intellectual and physical vision on artistic practice in Florence, Rome, Venice, England, Austria, and the Netherlands. The artists whose work and practices are discussed include Fra Angelico, Donatello, Leonardo da Vinci, Filippino Lippi, Giovanni Bellini, Raphael, Parmigianino, Titian, Bronzino, Johannes Gump and Rembrandt van Rijn. Taken together, the essays provide the reader with a fresh perspective on the intellectual confluence between art, science, philosophy, and literature across Renaissance Europe.

Exploring Alterity in a Globalized World

Christoph Wulf, 2016-01-13 This volume develops a unique framework to understand India through indigenous and European perspectives, and examines how it copes with the larger challenges of a globalized world. Through a discussion of religious and philosophical traditions, cultural developments as well as contemporary theatre, films and media, it explores the manner in which India negotiates the trials of globalization. It also focuses upon India's school and education system, its limitations and successes, and how it prepares to achieve social inclusion. The work further shows how contemporary societies in both India and Europe deal with cultural diversity and engage with the tensions between tendencies towards homogenization and diversity. This eclectic collection on what it is to be a part of global network will be of interest to scholars and

researchers of South Asian studies, philosophy, sociology, culture studies, and religion.

Drawing Investigations Sarah Casey, Gerry Davies, 2020-06-11 Using close visual analysis of drawings, artist interviews, critical analysis and exegesis, *Drawing Investigations* examines how artists use drawing as an investigative tool to reveal information that would otherwise remain unseen and unnoticed. How does drawing add shape to ideas? How does the artist accommodate to challenges and restraints of a particular environment? To what extent is a drawing complementary and continuous with its subject and where is it disruptive and provocative? Casey and Davies address these questions while focusing on artists working collaboratively and the use of drawing in challenging or unexpected environments. *Drawing Investigations* evaluates the emergence of a way of thinking among an otherwise disconnected group of artists by exploring commonalities in the application of analytical drawing to the natural world, urban environment, social forces and lived experience. Examples represent a spectrum of research in international contexts: an oceanographic Institute in California, the archives of Amsterdam's Rijksmuseum, the Antarctic Survey, geothermal research in Japan and the Kurdish diaspora in Iraq. Issues are situated in the contemporary theory and practice of drawing including relationships to historical precedents. By exploring drawing's capacity to capture and describe experience, to sharpen visual faculties and to bridge embodied and conceptual knowledge, *Drawing Investigations* offers a fresh critical

perspective on contemporary drawing practice.

Specifically, it addresses the subject of a healthy media from a variety of fractal perspectives. Covering topics such as collective unconscious, mediated reality, and government media trust, this major reference work is an essential resource for librarians, media specialists, media analysts, sociologists, government employees, communications specialists, psychologists, researchers, educators, academicians, and students.
