EG-ICE 2020 Workshop on Intelligent Computing in Engineering

Ungureanu, Lucian Constantin, Hartmann, Timo, 2020-06-30 The 27th EG-ICE International Workshop 2020 brings together international experts working at the interface between advanced computing and modern engineering challenges. Many engineering tasks require open-world resolutions to support multi-actor collaboration, coping with approximate models, providing effective engineer-computer interaction, search in multi-dimensional solution spaces, accommodating uncertainty, including specialist domain knowledge, performing sensor-data interpretation and dealing with incomplete knowledge. While results from computer science provide much initial support for resolution, adaptation is unavoidable and most importantly, feedback from addressing engineering challenges drives fundamental computer-science research. Competence and knowledge transfer goes both ways.

Der 27. Internationale EG-ICE Workshop 2020 bringt internationale Experten zusammen, die an der Schnittstelle zwischen fortgeschrittener Datenverarbeitung und modernen technischen Herausforderungen arbeiten. Viele ingenieurwissenschaftliche Aufgaben erfordern Open-World-Resolutionen, um die Zusammenarbeit mehrerer Akteure zu unterstützen, mit approximativen Modellen umzugehen, eine effektive Interaktion zwischen Ingenieur und Computer zu ermöglichen, in mehrdimensionalen Lösungsräumen zu suchen, Unsicherheiten zu berücksichtigen, einschließlich fachspezifischen Domänenwissens, Sensordateninterpretation durchzuführen und mit unvollständigem Wissen umzugehen. Während die Ergebnisse aus der Informatik anfänglich viel Unterstützung für die Lösung bieten, ist eine Anpassung unvermeidlich, und am wichtigsten ist, dass das Feedback aus der Bewältigung technischer Herausforderungen die computerwissenschaftliche Grundlagenforschung vorantreibt. Kompetenz

und Wissenstransfer gehen in beide Richtungen.

Environments for Multi-Agent Systems Danny Weyns,H.

Van Dyke Parunak,Fabien Michel,2005-02-18 The modern ?eld of multiagent systems has developed from two main lines of earlier research. Its practitioners generally regard it as a form of arti?cial intelligence (AI). Some of its earliest work was reported in a series of workshops in the US dating from1980,revealinglyentitled,“DistributedArti?cialIntelligence,”and pioneers often quoted a statement attributed to Nils Nilsson that “all AI is distributed. ” The locus of classical AI was what happens in the head of a single agent, and much MAS research re?ects this heritage with its emphasis on detailed modeling of the mental state and processes of individual agents. From this perspective, intelligenceisultimatelythepurviewofasinglemind,thoughitcanbeampli?ed by appropriate interactions with other minds. These interactions are typically mediated by structured protocols of various sorts, modeled on human conver- tional behavior. But the modern ?eld of MAS was not born of a single parent. A few - searchershavpersistentlyadvocatedideasfromthe?eldofarti?ciallife(ALife). These scientists were impressed by the complex adaptive behaviors of commu- ties of animals (often extremely

simple animals, such as insects or even micro-organisms). The computational models on which they drew were often created by biologists who used them not to solve practical engineering problems but to test their hypotheses about the mechanisms used by natural systems. In the artificial life model, intelligence need not reside in a single agent, but emerges at the level of the community from the nonlinear interactions among agents. - cause the individual agents are often subcognitive, their interactions cannot be modeled by protocols that presume linguistic competence.

Building Futures Richard Garber, 2023-08-03 BUILDING FUTURES An approach to Information Modeling engaging concepts of equality, sustainability, and labor as they relate to environment and architectural practice Building Futures: Technology, Ecology, and Architectural Practice explores how architects, and the buildings and environments we create, can engage future realities, both abstract and readily understood. These range from climate change and public health to advanced ideas about manufacture and construction. The text demonstrates multiple and hybrid paths in which building information modeling (BIM) and outgrowth technological processes including environmental simulation and human-robot interaction can be utilized in today's contemporary context, expanding the architect's agency by focusing on a more conceptual, and ecological, basis for our work. Moving beyond a basic understanding of the role of computation in architecture and design, the work shows how to think critically and speculatively about technology's deeper and more lasting impacts on both architecture and society. Topics covered in Building Futures include: Technology: information modeling and the relationship between computational and real objects, new approaches to coding in architectural design, and direct-to-manufacture workflows Environment: understanding part-to-whole relationships at a variety of scales and the interconnectedness of

things, post-subjective architectural approaches to ecology, and new ideas about sustainability Practice: revisiting architecture by remote control in the time of new global challenges, and novel ideas about creativity, authorship, and professionalism Design professionals and practice leaders grappling with the relationship of technology to design pedagogy will use Building Futures to better theorize and execute their architectural vision. Students in upper-level courses studying technique and theory will also find value in the work, which prepares incoming professionals for the major changes that the Architecture, Engineering, and Construction (AEC) industry may undergo in the coming years and decades. "The book prompts us to consider simulating events where architecture and architects could mitigate, redirect or develop contingencies, in relation to the environment, flows of material and capital, and other "things" that operate from the immediate, through to almost geological timescales." From the Foreword by Robert Stuart-Smith, Director of the Autonomous Manufacturing Lab, University of Pennsylvania

Services Marketing: Text and Cases Harsh V. Verma, The second edition of Services Marketing: Text and Cases takes a leap forward to develop a strategic perspective to the service marketing framework. Extensively revised and restructured, this edition includes five additional chapters aimed at widening the reader's horizons for a richer learning experience. The book begins with an initiation into the field of services and then develops an appreciation of the service marketing system. The focus is then directed at service strategy and the creation of sustainable differentiation. The book finally looks at the management of operational issues such as quality, demand matching, recovery and empowerment.

Mahara 1.2 Eportfolios Glenys Gillian Bradbury, Richard William Hand, Margaret Anne Kent, 2010-02-09 Mahara is a user-centred environment with a permissions framework that enables different views of an e-portfolio to be easily managed. These

views helps you display your artefacts – text files, spreadsheets, images, and videos – in a way you choose and to the people you want. You can also create online communities and social networks through groups, blogs, and forums. Being a novice, you will need a quick and easy implementation guide to set up your feature-rich digital portfolio. This book is your step-by-step guide to building an impressive professional e-portfolio using Mahara. It covers the key features of Mahara that will help you set up your customized digital portfolio and display the artefacts in your preferred way allowing contribution from selected users only. This book will introduce to the exciting features of Mahara framework and help you develop a feature-rich e-portfolio for yourself. You will see how easily you can create folders, upload multiple files like journals, project documents, pictures, and videos and share them with your friends. You will learn to set up views of these files, making these visible to your chosen friends only. And then, you will allow people to give their inputs. You will learn to create blogs and forums and get connected to the rest of the world. Customization and administration of your Mahara site will become easy after you have gone through this book. Imagine how good you will feel when you will see your knowledge, success, and ideas going live and available to your chosen audiences for their inputs.

Critical Race Theory in Education Adrienne D. Dixon, Celia K.

Rousseau Anderson, Jamel K. Donnor, 2014-05-22 Although Critical Race Theory (CRT) has been used to analyze difficult issues of race and racism in education for over ten years, the function of CRT in educational research is still not entirely clear. By bringing together the voices of various CRT scholars and education experts, this volume presents a comprehensive chorus of answers to the question of how and why CRT should be applied to

educational scholarship. The collected chapters address CRT's foundations in legal theory, current applications of CRT, and possible new directions for CRT in education. Appropriate for both students curious about CRT and established CRT scholars, *Critical Race Theory in Education* is a valuable guide to how CRT can help us better understand and seek solutions to educational inequity.

TQM in the Service Sector R.P. Mohanty & R.R. Lakhe,2008-02-01 The service sector contributes to the economy by absorbing surplus labor released from the agriculture and manufacturing sectors due to automations. It plays a positive role in maintaining economic stability. This sector covers many organizations such as health-care, education, banking, municipalities,etc. This book is about understanding TQM concepts and applications in the service sector.

Principal Leadership for Parent Engagement in Disadvantaged Schools Linda-Dianne Willis,Jenny Povey,Julie Hodges,Annemaree Carroll,2021-04-23 This book presents and theorises research findings into why and how school principals play a critical role in engaging parents and their school communities to enhance student learning and wellbeing. It highlights the imperative of parent engagement as evidenced by clear, consistent findings from research over the last fifty years and government reforms, policies and frameworks internationally and nationally in Australia which have been driven by the weight of this evidence. It focuses on a research project conducted from

2016 to 2017, titled 'Principal leadership for parent-school-community engagement in disadvantaged schools'. This project investigated four principals identified as successful in parent engagement based on findings of state-wide survey research of principals and presidents of parents and citizens' associations in 2014 in Queensland, Australia. This book offers theoretical and empirical evidence based on literature for the qualities successful principals in parent engagement exhibit, and the strategies they take to achieve parent and community engagement. It shows how the concept of agency as achievement can be used by educators and public policy makers to enable school leaders and teachers to adopt qualities and strategies that will engage parents in their child's learning and wellbeing, so that improved outcomes for their child and schools can result.

Interactions between emotions and social context - Basic, clinical and non-human evidence Maria Ruz, Agustin Ibanez, Sonja A E Kotz, Louise Barrett, Jorge Moll, 2014-07-17 The emotions that we feel and also those that we perceive in others are crucial to the social functioning of both humans and non-human animals. Although the role of context has been extensively studied in basic sensory processing, its relevance for social cognition and emotional processing is little understood. In recent years, several lines of research at the behavioral and neural levels have highlighted the bidirectional interactions that take place between emotions and social context. Experienced emotions, even when incidental, bias decision-making. Remarkably, even basic emotions can be strongly influenced by situational contexts. In addition, both humans and non-human animals can use emotional expressions strategically as a means of influencing and managing the behavioral response of others in relation to specific environmental situations. Moreover, social emotions (e.g., engaged in moral judgment, empathic concern and social norms) seem to be context-dependent, which also questions a purely abstract account of emotion understanding and expression, as

well as other social cognition domains. The present Research Topic of Frontiers in Human Neuroscience highlights the need for a situated approach to emotion and social cognition. We presented theoretical and empirical work at the behavioral and neural levels that contribute to our understanding of emotion within a highly contextualized social realm, and vice-versa. Relevant contributions are presented from diverse fields, including ethology, neurology, biology, cognitive and social neuroscience, and as well as psychology and neuropsychiatry. This integrated approach that entails the interaction between emotion and social context provide important new insights into the growing field of social neuroscience.
