Speaking in Subtitles Tessa Dwyer,2017-05-18 Over 6000 different languages are used in the world today, but the conventions of 'media speak' are far from universal and the complexities of translation are rarely acknowledged by the industry, audiences or scholars. Redressing this neglect, *Speaking in Subtitles* argues that the specific contingencies of translation are vital to screen media's global storytelling. Looking at a range of examples, from silent era intertitling to contemporary crowdsourced subtitling, and from avant-garde dubbing to the increasing practice of 'fansubbing', Tessa Dwyer proposes that screen media itself is a fundamentally 'translational' field.

No End to Her Martha Nochimson, 1992 Santa Barbara General Hospital Days of our lives.

Strong Connections Rosa Wang, 2022-02-01 Rosa Wang's remarkable book takes readers to the last frontier of the mobile/digital revolution. While much has been written about breakthrough technologies and early adopters who live where roads are good and smart phones are affordable, this book explores the largely undocumented journey of how digital technologies are entering the lives of those in extreme poverty—people, often women, often illiterate—who live without electricity or running water. With powerful stories, Wang brings you to the front lines of the revolution—to join meetings with small-holder farmers in raucous town halls in remote parts of Tanzania, and to sit on dirt floors alongside non-literate women in rural India. The book chronicles the exponential trajectory of the mobile phone through the arc of the author's own journey, an Asian-American woman from Mississippi navigating male-dominated environments and cultures, while changing the digital world without a background in technology. Readers will learn of the challenges that come with life on less than two dollars a day, and in that world, the transformative power of digital technologies: to give identity, improve finances, and to bring some degree of empowerment. Along the way, the author introduces memorable individuals and guides them on their journey across the digital divide to join the mobile generation. These people, poor in monetary resources and literacy, are rich in social connections, warmth, and wisdom. Their day-to-day lives seem implausibly hard, and their resilience humbles at every turn. This book is about them. At its heart, this is their story.

The Mobile Connection Rich Ling, 2004-06-25 Has the cell phone forever changed the way people communicate? The mobile phone is used for "real time coordination while on the run,

adolescents use it to manage their freedom, and teens “text to each other day and night. The mobile phone is more than a simple technical innovation or social fad, more than just an intrusion on polite society. This book, based on world-wide research involving tens of thousands of interviews and contextual observations, looks into the impact of the phone on our daily lives. The mobile phone has fundamentally affected our accessibility, safety and security, coordination of social and business activities, and use of public places. Based on research conducted in dozens of countries, this insightful and entertaining book examines the once unexpected interaction between humans and cell phones, and between humans, period. The compelling discussion and projections about the future of the telephone should give designers everywhere a more informed practice and process, and provide researchers with new ideas to last years. *Rich Ling (an American working in Norway) is a prominent researcher, interviewed in the new technology article in the November 9 issue of the New York Times Magazine. *A particularly good read, this book will be important to the designers, information designers, social psychologists, and others who will have an impact on the development of the new third generation of mobile telephones. *Carefully and wittily written by a senior research scientist at Telenor, Norway's largest telecommunications company, and developer of the first mobile telephone system that allowed for international roaming.
