Holocaust Testimonies Lawrence L. Langer,1993-01-27 Annotation This important and original book is the first sustained analysis of the unique ways in which oral testimony of survivors contributes to our understanding of the Holocaust. Langer argues that it is necessary to deromanticize the survival experience and that to burden it with accolades about the indomitable human spirit is to slight its painful complexity and ambivalence.

Inna Caroline Fourest,2014-01-22 A vingt-trois ans, Inna Shevchenko est célèbre. Qui ne connaît ses yeux verts, ses cheveux blonds couronnés de fleurs, ses seins nus, peints de slogans noirs dénonçant les religions, les dictatures et la prostitution ? Pourtant, l'icône politique reste une énigme. Qui est vraiment cette élève brillante, éduquée par un père colonel dans l'Ukraine post-soviétique ? Comment a-t-elle découvert l'engagement politique au lycée, au moment de la Révolution orange, avant de se jeter à corps perdu dans le mouvement Femen ? Qui est cette femme battue et arrêtée cent fois, torturée en Biélorussie, fuyant son pays après avoir tronçonné une croix en soutien aux Pussy Riots ? Caroline Fourest a accompagné Inna dès le premier jour de son exil à Paris. Elle s'est engagée avec elle, parfois contre elle... Lors des combats de rue face à Civitas, pour sauver Amina en Tunisie. Paris serait-elle redevenue la capitale de la révolution ? Bien plus que le portrait d'une héroïne fascinante, ce livre raconte l'odyssée d'une frondeuse tourmentée, tentée par le nihilisme, qui exige en tout la liberté mais s'impose une vie de soldate. Dans ce récit haletant, tout est vrai : la solitude, la force d'âme, le goût un peu âcre de la vérité. Tour à tour enquêtrice, conseillère, amie, amoureuse et femme libre, Caroline Fourest raconte à la fois ses doutes, leurs combats et leur romance. Et pour la première fois, se livre.

Energy and Economic Reform in the Former Soviet Union L. Dienes,I. Dobozi,M. Radetzki,1994-01-21 This book provides a succinct account of what may happen to the energy sector in the former Soviet Union in the medium- to long-run under alternative scenarios for macroeconomic reform. The analyses reveal the serious damage of the oil resource base caused by the reckless exploitation practices of the past. Production of oil and coal can recover only slowly from the doldrums of the early 1990s, but the potential to expand gas output is very considerable. Energy consumption practices have been extremely wasteful in the past. The total savings potential that could be accomplished as energy prices are allowed to rise, and incentives to economise on energy use are introduced, is huge. The analysis of production, and consumption prospects is disaggregated by major republic. The likely evolution of FSU energy exports until 2005 is also explored, and the impact that changing export flows could have on the international prices of oil, coal and natural gas, is discussed in detail.

Bionanotechnology in Cancer D. Sakthi Kumar,Aswathy Ravindran Girija,2022-10-27 The cancer research world is looking forward to bionanotechnology to find the best solutions for a complete cure from cancer, which is not possible with the current established treatment methods. The past decade of research on nano imaging and drug delivery in cancer has witnessed many interesting papers and reviews, but there has not been a concise resource that discusses all fields related to nano cancer research in diagnosis and drug delivery. This book fills this gap and presents the latest bionano research in cancer, focusing on nanodiagnostics and nanotherapy. The book is organized into two sections. The section on nanodiagnostics focuses on topics such as diagnostic methods in cancer-related therapy and use of radiolabeled nanoparticles, magnetic nanoparticles, acoustically reflective nanoparticles, X-ray computed tomography, and optical nanoprobe for diagnosis. The section on nanotherapy focuses on nanomaterials in chemotherapy, magnetic nanoparticles for hyperthermia against cancer, phototherapy, nanotechnology-mediated radiation therapy, nanoparticle-mediated small-RNA deliveries for molecular therapies, and theranostics. The book will serve as the gateway to enter the beautiful and elegant field of bionanoscience, which is considered the last hope for the fight against cancer and will be a highly useful resource for the students, researchers, teachers, and curious readers working in this field or related fields.
