give rise to it and sustain it. The key questions raised include: * what are the main circumstances that provide preconditions for the emergence of various types of terrorism? * what are the typical precipitants that trigger terrorist campaigns? * to what extent is it possible to reduce the problem of terrorism by influencing these causes and circumstances? * should we address those factors that sustain terrorist campaigns rather than root causes? Decoding 'The God' and 'The Religion' - (Volume-1) Akhil Rajendra,2020-09-15 Decoding ‘The God’ and ‘The Religion’ is written in a format that is easy to read and understand, whether the reader is a 13-15 years old or 50-60 years old, a 10th grader or a post graduate. It caters to everyone in a simplified manner with the idea of not asking one to ‘believe’, but to understand, feel, introspect, explore and know the answers. Each line is written matter-of-factly, which will make readers feel like this is something they already knew, they already had inside them and will hopefully encourage you to look within. Evolution plays a huge part here in this era, so to help you enjoy the experience of your individual journey into the Divinity, I do not need to make you wear the coloured spectacles of belief and dogmas. In today’s time, there already is so much information, and awareness, so many studies on physical and medical education, which are progressing every passing day. Social and judicial systems also get upgraded in most democratic countries, so I do not need to write a lot about it; that would be like rewriting an existing software as religion in a book or this series of books. All I need to do here is remove the coloured lens of belief and dogma, and open all eyes to understanding, giving accessibility to upgrades and updates of existing software, with the right intent, taking the human brain as the hardware. I have refrained from taking the name of any religion, sect or belief, or of their respective preachers, so that opportunists do not mislead people from the right context and intent of this book for the sake of their greed, lust, personal gains and agendas.

The Foundations of Buddhism Rupert Gethin,1998-07-16 In this introduction to the foundations of Buddhism, Rupert Gethin concentrates on the ideas and practices which constitute the common heritage of the different traditions of Buddhism (Thervada, Tibetan and Eastern) which exist in the world today.

A Global Alliance Against Forced Labour International Labour Office,2005 This report is an account of contemporary forced labour to date. It provides the first global and regional estimates by an international organization of forced labour in the world today, including the number of people affected and how many of them are victims of trafficking, as well as of the profits made by the criminals exploiting trafficked workers.Based on these data, the report highlights the gravity of the problem of forced labour. From this data emerges three major categories of forced labour: forced labour imposed by the State for economic, political or other purposes, forced labour linked to poverty and discrimination and forced labour that arises from migration and trafficking of workers across the world, often associated with globalization.The report provides evidence that the abolition of forced labour represents a challenge for virtually every country in the world industrialized, transition and developing countries alike. It assesses experience at the national level in taking up this challenge, with particular emphasis on the importance of sound laws and policies and their rigorous enforcement, as well as effective prevention strategies. The report also reviews the actions against forced labour taken over the past four years by the ILO and its tripartite partners governments, employers and workers. It calls for a new global alliance to relegate forced labour to history.
