**Elizabeth Singer Rowe and the Development of the English Novel** Paula R. Backscheider, 2013-03-29 Elizabeth Singer Rowe played a pivotal role in the development of the novel during the eighteenth century. Winner of the CHOICE Outstanding Academic Title of the Choice ACRL Elizabeth Singer Rowe and the Development of the English Novel is the first in-depth study of Rowe's prose fiction. A four-volume collection of her work was a bestseller for a hundred years after its publication, but today Rowe is a largely unrecognized figure in the history of the novel. Although her poetry was appreciated by poets such as Alexander Pope for its metrical craftsmanship, beauty, and imagery, by the time of her death in 1737 she was better known for her fiction. According to Paula R. Backscheider, Rowe's major focus in her novels was on creating characters who were seeking a harmonious, contented life, often in the face of considerable social pressure. This quest would become the plotline in a large number of works in the second half of the eighteenth century, and it continues to be a major theme today in novels by women. Backscheider relates Rowe's work to popular fiction written by earlier writers as well as by her contemporaries. Rowe had a lasting influence on major movements, including the politeness (or gentility) movement, the reading revolution, and the Bluestocking society. The author reveals new information about each of these movements, and Elizabeth Singer Rowe emerges as an important innovator. Her influence resulted in new types of novel writing, philosophies, and lifestyles for women. Backscheider looks to archival materials, literary analysis, biographical evidence, and a configuration of cultural and feminist theories to prove her groundbreaking argument.

**Neocortical Neurogenesis in Development and Evolution** Wieland B. Huttner, 2023-08-08 NEOCORTICAL NEUROGENESIS IN DEVELOPMENT AND EVOLUTION Understanding the development and evolution of the mammalian neocortex The development of the mammalian brain, including the human brain, is inextricably linked with its evolution. Of particular interest is the development of the neocortex, the youngest part of the cerebral cortex in evolutionary terms and the seat of such vital functions as sensory perception, generation of motor commands, and higher-order cognition. The process of neurogenesis is crucial to the formation and function of the neocortex, but this process is complex, based on species-specific adaptations of old and acquired new traits that subserve specific functions introduced during mammalian evolution. Neocortical Neurogenesis in Development and Evolution provides a groundbreaking and comprehensive overview of neurogenesis in the developing neocortex and its evolutionary implications. It covers the generation of neurons and their migration to their functional positions, neural patterning, cortical folding, and variations and malformations of cortical development. Readers will find: A comprehensive review of the evolution and development of the neocortex in mammals – the part of our brain involved in the higher cognitive functions A multitude of subject disciplines ranging from neuroscience, molecular biology, genetics, developmental biology, evolutionary biology and medicine to provide a holistic understanding of the evolutionary youngest part of the cerebral cortex Coverage of neurogenesis in the developing neocortex and how this contributes to our understanding of the evolutionary implications Neocortical Neurogenesis in Development and Evolution is essential for researchers and postgraduates in neuroscience, developmental biology, evolutionary biology, and medical research.

**Agricultural Development and Food Security in Africa** Renu Modi, Fantu Cheru, 2013-08-08 The subject of food security and land issues in Africa has become one of increased importance and contention over recent years. In particular, the focus has shifted to the role new global South donors - especially India, China and Brazil - are playing in shaping African agriculture through their increased involvement and investment in the continent. Approaching the topic through the framework of South-South co-operation, this highly original volume presents a critical analysis of the ways in which Chinese, Indian and Brazilian engagements in African agriculture are structured and implemented. Do these investments have the potential to create new opportunities to improve local living standards, transfer new technology and knowhow to African producers, and reverse the persistent productivity decline in African agriculture? Or will they simply aggravate the problem of food insecurity by accelerating the process of land alienation and displacement of local people from their land? Topical and comprehensive, *Agricultural Development and Food Security in Africa* offers fresh insight into a set of relationships that will shape both Africa and the world over the coming decades.
