Carol Miller

*Death Rides A Pony* Carol Miller,2022-12-06 The second entry in the fun-filled The Fortune Telling Mysteries series sees the Bailey sisters offering light-hearted fortune telling for charity that soon turns deadly. Sisters Hope and Summer Bailey run Bailey's Boutique, a mystic shop in Asheville, North Carolina. The annual charity festival is approaching, and the sisters are roped in to offering fortune telling to raise money. Before proceedings can begin, Summer receives a bad Tarot card reading. She fears she'll be left destitute from her upcoming divorce battle as the realtor charged with selling her and her soon-to-be ex-husband's home, Davis Scott, keeps making unwelcome appearances. Davis's most troublesome appearance comes when he's found dead at the festival. Davis had a bad reputation amongst the Asheville community, but who would go to the lengths of killing him . . . and during a charity event, no less! The Tarot cards predicted a death, but do they hold clues to who the murderer is?

My little pony ,

*Far Rider* Sam Abshier,2013-09-07 In 1851, Crow Dog and his Comanche tribe take Sara Johns hostage; but after only seven months, they cast Sara and her mysterious doll aside fearing they are Death Spirits. While the Reconstruction Era is passing into history, some speak of Sara as Confederate campfire trash, still others tell of her sheer elegance, her abilities as a deadly gunfighter, or her perceptive business instincts. In 1876, after spending twenty-five years alone, Sara falls in love with Tierel Slaughter, a wealthy and respected Arkansas rancher. However, Tierel Slaughter is an alias for Frank Cobb, a man who believes he has successfully hidden his past from everyone, including Sara Johns. Known by the Comanche as the Far Rider, Sara Johns, Tierel Slaughter, their friends, and their enemies, are all destined to travel Crow Dog's Trail of Life . . . and death, in this story of lies, deception, jealousy, cheating, and murder.

**Big Horses, Little Horses** Jim Medway,2018 Horse and ponies of all sorts and types are brought together in this one book for young children. Big Horses, Little Horses features over 130 horse and pony breeds from around the world, Divided into sections on British, European, North American, Asian and World horses, every known breed is included: from the English Thoroughbred racehorse to the tiny Shetland Pony, from the enormous Drum Horse to the elegant Arabian. Horses for trotting, horses for climbing mountains, horses for cattle work, horses for jumping, horses for pulling carriages - they are all here.--

**The Whole Horse Catalog** Gail Rentsch,Steven D. Price,Barbara Burn,David A. Spector,1998-12-17 A guide to owning, riding, and caring for a horse, with information on selection, apparel, stabling, health, grooming, feeding, equestrian sports, tack, and other subjects.

40jahrevideokunst.de Peter Weibel,2010 ... Features over fifty early and largely unknown German videos by and with artists such as Joseph Beuys, Valeska Gert, and Klaus Rinke. It offers an illustrated history of video techniques and features discussions on modern restoration practices. In addition, texts by experts--artists, curators, art theorists, and media scholars--as well as a comprehensive annotated bibliography provide profound insight into one of the most influential genres in twentieth- and twenty-first-century art. --publisher.

Winter of the Crystal Dances Angela Dorsey,2019-10-30 An exciting horse adventure, perfect for readers from 9 to 14 years old - and older according to many readers! Try it for FREE to see if you like the full series. Evy can telepathically understand horses, but she's not sure if it's a blessing or a curse. Her secret "gift" certainly seems to get her in lots of trouble. When some starving mustangs wander close to the wilderness cabin that she shares with her hermit mother, she knows she must help them. Her act of kindness quickly snowballs into a series of events that forever change her life and the life of a very special mustang filly. "Fantastic story in every way. I adored the characters and the setting and the adventure . . . and couldn't

turn pages fast enough.” ~ Ev Bishop, Author “Another super story from one of the best writers of modern pony books around. Angela Dorsey gives us a traditional old fashioned story of the love of a girl for a wild horse with an interesting and intriguing modern twist, and just a dash of mystery. Animal loving children of all ages will enjoy the story, whilst parents can be happy in the knowledge that the important values of empathy and integrity are being upheld. As with many of the author’s other books, this story explores an important issue – that of animal and human interaction and communication – whilst still delivering a page-turning story. Not an easy feat, but something this author is adept at. The book can be enjoyed at many levels and will keep the interest of a wide range of age groups, including adults. 4-5 HORSESHOES: VERY GOOD to EXCELLENT.” ~ Pony Mad Book Lovers “LOVED IT! I saw this ebook priced for free in the store and thought, “Well, why not?” I was not expecting it to be a very, extremely good book that would get me deeply interested. Oh, how wrong I was! I absolutely LOVED “Winter of the Crystal Dances” so much! I was up late in the night reading because I couldn’t turn my Kindle off and stop reading!! I highly recommend this book to read for anybody! Such a great book!” ~ Amazon Reader

Meta- and Inter-Images in Contemporary Visual Art and Culture Carla Taban,2013-10-14 Exploring the epistemological potential of meta- and inter-images Since the 1990s, when the question of the visual became central in various arts and humanities disciplines, images that refer to themselves as such or to other images have enjoyed an increasing interest. Meta- and Inter-Images in Contemporary Visual Art and Culture partakes in, enriches and updates these debates. It investigates what meta- and inter-images can make known about the visual, in its own terms, by its own means. Written by scholars in aesthetics, art history, and cultural, film, literary, media, and visual studies, the essays gathered here tackle meta- and inter-images in an array of creative artefacts, practices, and media. They unfold the epistemological potential of every meta- and inter-image discussed to raise questions such as: What are images? How do they work? By whom, to what purpose, to what effect and in what context/s are they used? How are they created and understood? And how do they challenge our (pre)conceptions of images and the ways we study them? Water-Related Death Investigation Kevin L. Erskine, Erica J. Armstrong, 2021-05-18 Nearly ten years after the first edition of Water-Related Death Investigation: Practical Methods and Forensic Applications, water death cases continue to be improperly investigated. The pathologist's report can determine the cause of death as a drowning, but the manner of death is the most challenging to prove. The report will not determine if a victim jumped into the water to commit suicide, fell into the water accidentally, or was pushed in as a homicidal act. Many drowning cases do not reflect injury to the body, so evidence collected at the scene plays a vital role. The importance of an on-scene body assessment cannot be overemphasized. Often, the body evidence begins to change rapidly upon recovery and may not be present during an autopsy. Written statements on the scene are an effective tool to use to determine the accuracy of information given to arriving officers. These statements need to be written by the witnesses themselves as well as the reporting person. The Show Me technique can also help reveal discrepancies in a person's version of what occurred as well as aid in providing the most details to an incident as is humanly possible. This second edition includes updated information on the latest technology to assist water death investigators. Parabon Snapshot can help determine the faceless identity of skeletal remains and help locate potential suspects using the science of DNA. Drones can aid in locating missing persons as well as human remains, even months after death. Updated information is provided regarding fingerprints from submerged objects, and Carbon-14 can help determine the origin of a found corpse. Key Features: Thoroughly reviews the physiological aspects of drowning Reveals the investigative characteristics inherent to various scenes of water-related deaths Highlights certain red flag indicators that may point to foul play or scene staging Outlines autopsy protocols, trial preparation, and expert witness testimony Provides numerous case studies and numerous illustrations to further clarify key points presented in the text Coauthored by a Master Water Death Investigator and an experienced forensic pathologist, Water-Related Death Investigation: Practical Methods and Forensic Applications, Second Edition merges the essentials of evidence collection and field investigation with autopsy best practices and laboratory testing. It will continue to serve as a valuable resource for the various professionals involved in these cases.

**Computer Vision -- ECCV 2010** Kostas Daniilidis, Petros Maragos, Nikos Paragios, 2010-09-07 The 2010 edition of the European Conference on

Computer Vision was held in Heraklion, Crete. The call for papers attracted an absolute record of 1,174 submissions. We describe here the selection of the accepted papers: ? Thirty-eight area chairs were selected coming from Europe (18), USA and Canada (16), and Asia (4). Their selection was based on the following criteria: (1) Researchers who had served at least two times as Area Chairs within the past two years at major vision conferences were excluded; (2) Researchers who served as Area Chairs at the 2010 Computer Vision and Pattern Recognition were also excluded (exception: ECCV 2012 Program Chairs); (3) Minimization of overlap introduced by Area Chairs being former student and advisors; (4) 20% of the Area Chairs had never served before in a major conference; (5) The Area Chair selection process made all possible efforts to achieve a reasonable geographic distribution between countries, thematic areas and trends in computer vision. ? Each Area Chair was assigned by the Program Chairs between 28-32 papers. Based on paper content, the Area Chair recommended up to seven potential reviewers per paper. Such assignment was made using all reviewers in the database including the conflicting ones. The Program Chairs manually entered the missing conflict domains of approximately 300 reviewers. Based on the recommendation of the Area Chairs, three reviewers were selected per paper (with at least one being of the top three suggestions), with 99.
