The book includes comparisons with the American shuttle system and offers accounts of the Soviet test pilots chosen for training to fly the system, and the operational, political and engineering problems that finally sealed the fate of Buran and ultimately of NASA's Shuttle fleet.

Beyond Memory Diane Neumaier, 2004 Photography possesses a powerful ability to bear witness, aid remembrance, shape, and even alter recollection. In *Beyond Memory: Soviet Nonconformist Photography and Photo-Related Works of Art*, the general editor, Diane Neumaier, and twenty-three contributors offer a rigorous examination of the medium's role in late Soviet unofficial art. Focusing on the period between the mid-1950s and the late 1980s, they explore artists' unusually inventive and resourceful uses of photography within a highly developed Soviet dissident culture. During this time, lack of high-quality photographic materials, complimented by tremendous creative impulses, prompted artists to explore experimental photo-processes such as camera and darkroom manipulations, photomontage, and hand-coloring. Photography also took on a provocative array of forms including photo installation, artist-made samizdat (self-published) books, photo-realist painting, and many other surprising applications of the flexible medium. *Beyond Memory* shows how innovative conceptual moves and approaches to form and content—echoes of Soviet society's coded communication and a Russian sense of absurdity—were common in the Soviet cultural underground. Collectively, the works in this anthology demonstrate how late-Soviet artists employed irony and invention to make positive use of difficult circumstances. In the process, the volume illuminates the multiple characters of

photography itself and highlights the leading role that the medium has come to play in the international art world today. Beyond Memory stands on its own as a rigorous examination of photography's place in late Soviet unofficial art, while also serving as a supplement to the traveling exhibition of the same title.

Ukraine Sharon L. Wolchik, 2000 This

comprehensive book focuses on the challenges facing Ukraine as a newly emerged state after the collapse of the Soviet Union. Like all countries with no recent history of independence, Ukraine had to invent or recreate effective political institutions, reintroduce a market economy, and reorient its foreign policy. These tasks were impossible to accomplish without resolving the question of national identity. In this balanced and clear-eyed assessment, a team of U.S. and Ukrainian specialists explores the external and internal dimensions of national identity and statehood, providing a wealth of information previously unavailable to Western scholars. Arguing that the search for national identity is a multidimensional process, the authors show that it reflects the realities of the dawning twenty-first century. Paradoxically, this quest must cope with the both the weakening of state boundaries caused by globalization and the strengthening of the national model as new countries emerge from the disintegration of the Soviet Union and Yugoslavia. After providing the historical context of Ukraine's international debut, the book analyzes the complexities of constructing a national identity. The authors explore questions of ethnic relations and regionalism, the development of political values and attitudes, mass-elite relations, the cultural background of economic strategies, gender issues, and the threat of organized crime to emergent civil society.

Advances in Design, Simulation and Manufacturing III Vitalii Ivanov, Ivan Pavlenko, Oleksandr Liaposhchenko, José Machado, Milan Edl, 2020-06-04
This book explores topics at the interface between mechanical and chemical engineering, with a focus on design, simulation, and manufacturing. Covering recent developments in the mechanics of solids and structures; numerical simulation of coupled problems, including wearing, compression,

detonation and collision; and chemical process technologies, including ultrasonic technology, capillary rising process, pneumatic classification, membrane electrolysis and absorption processes, it reports on developments in the field of heat and mass transfer, energy-efficient technologies, and industrial ecology. Part of a two-volume set based on the 3rd International Conference on Design, Simulation, Manufacturing: The Innovation Exchange (DSMIE-2020), held on June 9-12, 2020, in Kharkiv, Ukraine, this book provides academics and professionals with extensive information on the latest trends, technologies and challenges in the field as well as practical lessons learned.

America's Dreyfus Joan Brady, 2015-09-10 As a young dancer of 18, Joan Brady met Alger Hiss, recently released from jail after a perjury trial which had made headlines for months in the US. Over the following 35 years of friendship she had no basis for questioning the verdict, but her growing knowledge of Hiss himself, and the puzzles raised by his own reactions to his trial and imprisonment led her, after Hiss's death, to delve back into the transcripts of the hearings and into FBI files about the case. The story Brady tells in this book overturns the received view that Hiss was a spy and a former communist who lied in court. But more surprising still is her analysis of how Richard Nixon's rise to fame, culminating in the US presidency, was based on the Hiss case, which Nixon instigated and conducted to create anti-communist hysteria and aid him in his election campaigns.

Endgame in NATO's Enlargement Yaroslav Bilinsky, 1999-02-28 After briefly dealing with arguments for and against NATO's enlargement as far as Poland, the Czech Republic, and Hungary, the author shows why the enlargement process must be carried forward to include, in the near future,

the three Baltic States (Estonia, Latvia, Lithuania) and Ukraine. Inclusion of the Baltic States and of Ukraine in NATO would stabilize the region by helping the Russian democrats to concentrate on building a genuinely democratic, market-oriented Russian national state, instead of succumbing to the temptation to restore the Soviet Union. Ukraine could also contribute to NATO a sizable conventional military force and a prime strategic area; the Baltic States offer a prime location and an indomitable spirit. The Balts and Ukraine will help NATO when finally admitted as full members. Using polling data, printed material, and interviews with Lithuanian and Ukrainian diplomats, the book convincingly shows the soundness of the Baltic and Ukrainian security goals without glossing over some difficulties, both internal and external.

My Memoirs Taras Hunczak, 2015-12-01 Hunczak reflects on his youth growing up in Europe during WWII in this revealing memoir. Having witnessed prisoner of war camps and displaced persons camps, Hunczak tells unique and personal stories of tragedies and developments with a focus on the importance of friends and family.
