India Inc. Phyllis Gestrin, 2010-12-15 India Inc.

examines the key players that are shaping the India of tomorrow. - Jim O'Neill, head of Global Economic Research, Goldman Sachs, and author of The BRICs Report India is well on the way to giving the world a new generation of role models to follow Bill Gates, Richard Branson, Rupert Murdoch, and Warren Buffett. This book reveals who these entrepreneurs and business leaders are and what makes them tick. It sifts through the jargon, dusts off the myths and spells out in simple terms what the future of India Inc. holds for the world at large. Pota shortlists 10 Indian high achievers who cover every aspect of India's growing prowess and highlights what these people have done to make it big. Besides a keen focus on information technology, others profiled work in fields as diverse as pharmaceuticals, biotechnology, banking, manufacturing,

entertainment and green energy. A fascinating insight into the minds of movers and shakers behind the success of huge corporations, including Narayana Murthy, Chairman of Infosys, K V Kamath, Chairman of ICICI Bank and role model Kiran Mazumdar Shaw who broke through the male-dominated Indian business world to become Chairwoman of Biocon India, Asia's largest biotechnology company.

Protein Families Christine A. Orengo,Alex

Bateman,2014-02-03 New insights into the evolution and nature of proteins Exploring several distinct approaches, this book describes the methods for comparing protein sequences and protein structures in order to identify homologous relationships and classify proteins and protein domains into evolutionary families. Readers will discover the common features as well as the key philosophical differences underlying the major protein classification systems, including Pfam, Panther, SCOP, and CATH. Moreover, they'll discover how these systems can be used to understand the evolution of protein families as well as understand and predict the degree to which structural and functional information are shared between relatives in a protein family. Edited and authored by leading international experts, Protein Families offers new insights into protein families that are important to medical research as well as protein families that help us understand biological systems and key biological processes such as cell signaling and the immune response. The book is divided into three sections: Section I: Concepts Underlying Protein Family Classification reviews the major strategies for identifying homologous proteins and classifying them into families. Section II: In-Depth Reviews of Protein Families focuses on some fascinating super protein families for which we have substantial amounts of sequence, structural and functional

data, making it possible to trace the emergence of functionally diverse relatives. Section III: Review of Protein Families in Important Biological Systems examines protein families associated with a particular biological theme, such as the cytoskeleton. All chapters are extensively illustrated, including depictions of evolutionary relationships. References at the end of each chapter guide readers to original research papers and reviews in the field. Covering protein family classification systems alongside detailed descriptions of select protein families, this book offers biochemists, molecular biologists, protein scientists, structural biologists, and bioinformaticians new insight into the evolution and nature of proteins.

A Bittersweet Nostalgia Vishal Gupta, 2012-09 A few of us are troubled enough that we choose to walk the remainder of this road called life, searching for answers and achieving some significance and bliss. An adolescent found the courage in his frailty to renounce everything and escape into the refuge of the wilderness of Northern India. Due to a vivid nightmare, he faltered at the last moment and stayed put within the confines of his tormented urban existence. A year passed and his compulsive impulse for that escape was suppressed. Rebuilding a new way to live, he channeled and fed those impulses by trekking into the mountains of Maharashtra, trailing through the forests of Bhandavgarh and Tadoba Andhari, whilst getting too close to tigers and crocodiles. In doing so, he transformed himself into a true backpacker. But something was still amiss. Love. It took just one woman to undo all the good. The adolescent turned man found himself weaker than ever before and

drenched in despair. He was back where he started, fighting the same impulse to escape into the Northern Mountains. Will the road cease for him or will he find a silver lining ahead? See where his path leads him in A Bittersweet Nostalgia.

The Economics of Religion in India Sriya

Iyer,2018-09-17 Religion is not a popular target for economic analysis. Yet the economist's tools offer insights into how religious groups compete, deliver social services, and reach out to converts—how religions nurture and deploy market power. Sriya Iyer puts these tools to use in an expansive study of India, one of the world's most religiously diverse nations.

Tumor Suppressor Par-4 Vivek M.

Rangnekar, 2022-01-01 Par-4 is a naturally occurring tumor suppressor. Studies have indicated that overexpression of Par-4 selectively induces apoptosis in cancer cells while leaving normal, healthy, cells unaffected. Mechanisms contributing to this cancer-selective action of Par-4 have been associated with PKA activation of intracellular Par-4 in cancer cells or GRP78 expression primarily on the surface of cancer cells. On the other hand, endogenous Par-4 sensitizes cells to the action of a broad range of apoptotic inducers acting via the extrinsic and intrinsic pathways. A number of binding partners of Par-4 have been identified and shown to regulate Par-4 function in cancer and other diseases, such as Alzheimer's and major depression. Recent studies have recognized a number of natural products, dietary supplements, synthetic molecules and FDA-approved drugs that induce the secretion of Par-4 protein to cause apoptosis in primary or metastatic tumors, one of which is in clinical trials. More than 50 different laboratories worldwide are involved in Par-4 based research of this unique protein that has progressed from the bench to clinical trials. This second, companion volume will provide a comprehensive overview of Par-4's role in cancer and other diseases. Chapters are written by leading researchers, and will be useful for a broad audience across the scientific

community, particularly students and trainees, who are the next generation of scientists and clinicians to participate in new studies and discoveries on Par-4.

Probiotics in Agroecosystem Vivek Kumar,Manoj Kumar,Shivesh Sharma,Ram Prasad,2017-09-26 This book focuses on food security in sustainable agriculture and nutrient management. The study of plant probiotic microbes' synergism using existing techniques has greatly improved our grasp of the structure and functioning of the plant microbiome. However, the function of plant probiotic microbes and their relation to plants' health in the context of food security, soil nutrient management, human and plant health are largely unexplored. Compared to human probiotics, diverse types and millions of microbiota inhabit plants, forming multifaceted and complicated ecological societies that stimulate plant growth and health through their combined metabolic activities. From the perspective of sustainable cropping systems, observing plant probiotics can provide insights on how to stimulate and maintain plant productivity, along with host stress tolerance and recycling of soil nutrients. This book combines reviews and original research articles to highlight the latest advances in plant probiotics, their specificity, diversity, function, as well as plant microbiome management to improve plant growth and productivity, nutrient management and human health.

Smart Nanomaterials for Bioencapsulation

Guillermo R. Castro, Ashok Kumar Nadda, Tuan Anh Nguyen, Swati Sharma, Ram K. Gupta, 2022-09-30 Smart Nanomaterials for Bioencapsulation focuses on the fundamentals, synthesis methods and matrix design for the encapsulation of drugs, drug release, food and nutraceuticals, mechanisms of nano- encapsulated drugs on liposomes, micelles, silica composites, carbon nanotubes, dendrimers, and protein inorganic nanohybrids. Providing detailed information on the encapsulation of food and drug derivatives, the book helps create new and modern approaches for both pharmaceutical and nutritional science. The target delivery of pharmacological agents, as well as food additives under various conditions is covered, including sections on systemic release of drug molecules, minimum loss at non-target sites, the accumulation of diseased tissue or organs, and more. Smart nanomaterial-

based nanocarriers protect the loaded molecules from premature degradation in the biological environment and enhance bioavailability for cellular uptake. The tuned properties of smart nanomaterials, such as porosity, pore-volume, surface area-to-volume ratio, coating with inert and labile materials, and more help determine the in vivo performance of the bioencapsulated food and drug derivatives. Outlines the major design principles surrounding the encapsulation of drugs, drug release, food and nutraceuticals at the nanoscale Discusses the pros and cons of different bioencapsulation methods for different application areas Outlines the major challenges of applying nanobioencapsulation at an industrial scale

Nanostructures for Cancer Therapy Alexandru Mihai Grumezescu, Anton Ficai, 2017-04-11 Nanostructures for Cancer Therapy discusses the available preclinical and clinical nanoparticle technology platforms and their impact on cancer therapy, including current trends and developments in the use of nanostructured materials in chemotherapy and chemotherapeutics. In particular, coverage is given to the applications of gold nanoparticles and quantum dots in cancer therapies. In addition to the multifunctional nanomaterials involved in the treatment of cancer, other topics covered include nanocomposites that can target tumoral cells and the release of antitumoral therapeutic agents. The book is an up-to-date overview that covers the inorganic and organic nanostructures involved in the diagnostics and treatment of cancer. Provides an examination of nanoparticle delivery systems for cancer treatment, illustrating how the use of nanotechnology can help provide more effective chemotherapeutic treatments Examines, in detail, the different types of nanomaterials used in cancer therapy, also explaining the effect of each Provides a cogent overview of recent developments in the

Urbanization, Biodiversity and Ecosystem Services: Challenges and Opportunities Thomas

Elmqvist, Michail Fragkias, Julie Goodness, Burak

Güneralp, Peter J. Marcotullio, Robert I. McDonald, Susan Parnell, Maria Schewenius, Marte Sendstad, Karen C.

Seto, Cathy Wilkinson, 2013-09-21 Urbanization is a global phenomenon and the book emphasizes that this is not just a social-technological process. It is also a social-ecological process where cities are places for nature, and where cities also are dependent on, and have impacts on, the biosphere at different scales from local to global. The book is a global assessment and delivers four main conclusions: Urban areas are expanding faster than urban populations. Half the increase in urban land across the world over the next 20 years will occur in Asia, with the most extensive change expected to take place in India and China Urban areas modify their local and regional climate through the urban heat island effect and by altering precipitation patterns, which together will have significant impacts on net primary production, ecosystem health, and biodiversity Urban expansion will heavily draw on natural resources, including water, on a global scale, and will often consume prime agricultural land, with knock-on effects on biodiversity and ecosystem services elsewhere Future urban expansion will often occur in areas where the capacity for formal governance is restricted, which will constrain the protection of biodiversity and management of ecosystem services
