15 let studentského divadla Fakulty informatiky Masarykovy univerzity Josef Prokeš, 2014-01-01 Nakladatelství MU představuje jubilejní publikaci vydanou k patnáctému výročí trvání studentského PROFIDIVADLA na Fakultě informatiky Masarykovy univerzity. Jde o knihu celobarevnou, bohatě vypravenou, která na 120 stranách přibližuje zájemcům jednotlivé inscenace i vzpomínky pamětníků. Je věnována památce prof. Ludvíka Kundery, který souboru s počáteční dramaturgií pomáhal. Na starších fotografiích (např. na stranách 19–22) jsou historicky působící záběry z míst, která dnes již neexistují, neboť podlehla přestavbě fakulty. Co je však nejsympatičtější: celá knížka nepostrádá náhled, humor i specificky studentskou recesi, zahalenou arciť místy nostalgií nenávratně uplynulého. A najdeme zde i kontroverzní kritické ohlasy na vyznění některých inscenací. Editorem knihy je doc. Josef Prokeš, zakladatel, vůdčí duch, dramatik a režisér divadla. Ve stejném čtvercovém formátu s obdobnou grafickou úpravou obálky současně vyšel i malonákladový apendix výše uvedeného sborníku: text dvou divadelních her posledního období (Emodrín z Elsinoru, Rychlé šípy na kolenou). Tato publikace je věnována památce Venduly Borůvkové.

Landscapes and Landforms of the Czech Republic Tomáš Pánek, Jan Hradecký, 2016-03-08 The book aims to present the unique geomorphological landscapes of the Czech Republic. The geomorphic uniqueness of this country benefits from the proximity to two distinct European geological domains: the old cratonized Bohemian Massif and the relatively young Tertiary fold and thrust belt of the Western Carpathians. Landscapes and Landforms of the Czech Republic introduces general physiographical characteristics of the landscape and presents the main driving factors leading to the evolution of the present landscape. The book contains twenty two chapters describing the most interesting geomorphic landscapes of the Czech Republic. The selection of individual landscapes was based on visual exceptionality (e.g. sandstone landscapes of the Northern Bohemia), scientific importance (e.g. patterned grounds in the Sudetic Mountains) and historical relevance (e.g. mining of the Nízký and Hrubý Jeseník Mountains). The final chapters of the book discuss the protection of geomorphic heritage in the Czech Republic.

The Grove Book of Opera Singers Laura Williams Macy, 2008 Covering over 1500 singers from the birth of opera to the present day, this marvelous volume will be an essential resource for all serious opera lovers and an indispensable companion to the enormously successful Grove Book of Operas. The most comprehensive guide to opera

singers ever produced, this volume offers an alphabetically arranged collection of authoritative biographies that range from Marion Anderson (the first African American to perform at the Met) to Benedict Zak (the classical tenor and close friend and colleague of Mozart). Readers will find fascinating articles on such opera stars as Maria Callas and Enrico Caruso, Ezio Pinza and Fyodor Chaliapin, Lotte Lehmann and Jenny Lind, Lily Pons and Luciano Pavarotti. The profiles offer basic information such as birth date, vocal style, first debut, most memorable roles, and much more. But these articles often go well beyond basic biographical information to offer colorful portraits of the singer's personality and vocal style, plus astute evaluations of their place in operatic history and many other intriguing observations. Many entries also include suggestions for further reading, so that anyone interested in a particular performer can explore their life and career in more depth. In addition, there are indexes of singers by voice type and by opera role premiers. The articles are mostly drawn from the acclaimed Grove Music Online and have been fully revised, and the book is further supplemented by more than 40 specially commissioned articles on contemporary singers. A superb new guide from the first name in opera reference, The Grove Book of Opera Singers is a lively and authoritative work, beautifully illustrated with color and black-and-white pictures. It is an essential volume--and the perfect gift--for opera lovers everywhere.

Bio-Geo Interactions in Metal-Contaminated Soils Erika Kothe, Ajit Varma, 2012-01-05 Metal contamination is an increasing ecological and eco-toxicological risk. Understanding the processes involved in metal mobilization, sorption and mineralization in soils are key features for soil bioremediation. Following an introduction to the physical, chemical and biological components of contaminated soils, various chapters address the interactions of soil, microorganisms, plants and the water phase necessary to transfer metals into biological systems. These include topics such as potential hazards at mining sites; rare earth elements in biotic and abiotic acidic systems; manganese redox reactions; biomineralisation, uranium in seepage water; metal-resistant streptomycetes; mycorrhiza in re-forestation; metal (hyper)accumulation in plants; microbial metal uptake; and their potential for bioremediation. This book will be of interest to soil biologists, geologists and chemists, researchers and graduate students, as well as consulting companies and small enterprises involved in bioremediation.
