*Solvency Compendium* ,2008-07 A solvency opinion provides assurance to a company's Board of Directors and/or the lenders that the transaction will not likely subject the Company and its unsecured and other creditors to undue financial distress. Houlihan will undertake a solvency opinion engagement for companies involved in highly leveraged transactions. Examples include leveraged buyouts, leveraged recapitalizations, leveraged dividends or other such situations where there may be minimal equity involved. Houlihan has also completed solvency opinions for spin-off transactions in conjunction with capital restructuring and significant debt refinancing. The Federal Bankruptcy Code defines insolvent as the condition in which the total of a person's debts exceeds the value of its property at a fair valuation. Recent case law suggests that the fair valuation of property is its value on a going-concern basis. A solvency letter expresses an independent expert opinion on a borrower's ability to remain solvent under the burden of additional liability, to pay debts as they mature, and to continue operations as a going-concern in dynamic economic conditions. In connection with a leveraged

recapitalization, interested parties such as new secured lenders and sellers will often, due to fraudulent conveyance concerns, seek an independent determination and opinion as to the impact of the acquisition debt on working capital, cash flow, and equity value. Houlihan is highly familiar with the Tests of Capitalization and Solvency and is able to efficiently and cost-effectively provide analysis that provides a layer of comfort to interested parties.

**Minding the Weather** Robert R. Hoffman,Daphne S. Ladue,H. Michael Mogil,Paul J. Roebber,J. Gregory Trafton,2023-08-15 A detailed study of research on the psychology of expertise in weather forecasting, drawing on findings in cognitive science, meteorology, and computer science. This book argues that the human cognition system is the least understood, yet probably most important, component of forecasting accuracy. Minding the Weather investigates how people acquire massive and highly organized knowledge and develop the reasoning skills and strategies that enable them to achieve the highest levels of performance. The authors consider such topics as the forecasting workplace; atmospheric scientists' descriptions of their reasoning strategies; the nature of expertise; forecaster knowledge, perceptual skills, and reasoning; and expert systems designed to imitate forecaster reasoning. Drawing on research in cognitive science, meteorology, and computer science, the authors argue that forecasting involves an interdependence of humans and technologies. Human expertise will always be necessary.
