Teenagers, Sexual Health Information and the Digital Age Kerry Mckellar,Elizabeth Sillence,2020-01-06 Teenagers, Sexual Health Information and the Digital Age examines the online resources available on teenagers, including games and digital interventions. In addition, it highlights current issues such as sexting and pornography. Information needs and provisions are examined, and existing sexual health interventions and digital interventions are discussed, gathering both teenagers' and sexual health professionals' views on these services. In addition to a review of the current literature on sexual health and teenagers, the book examines groups of teenagers, particularly those vulnerable to risky sex and asks what are the predictors of these behaviors and what can be done to address the behaviors. Finally, the book will also provide reflections and practical advice on the ethical issues associated with research in this context. Provides guidance on the ethical issues with research associated with this topic Covers both teenagers' information needs as well as their existing levels of knowledge Assesses how teenagers engage with, and evaluate, sexual health information Addresses the challenges inherent in the online environment, such as unreliable and misleading information

Peterson's Graduate Programs in the Physical Sciences, Mathematics, Agricultural Sciences, the Environment & Natural Resources 2012 Peterson's,2011-12-30 Graduate Programs in the Physical Sciences, Mathematics, Agricultural Sciences, the Environment & Natural Resources 2012 contains more than 2,900 graduate programs in 59 disciplines-including agriculture and food sciences, astronomy and astrophysics, chemistry, physics, mathematics, environmental sciences and management, natural resources, marine sciences, and more. This guide is part of Peterson's six-volume Annual Guides to Graduate Study, the only annually updated reference work of its kind, provides wide-ranging information on the graduate and professional programs offered by U.S.-accredited colleges and universities in the United States and throughout the world. Informative data profiles for more than 2,900 graduate programs in 59 disciplines, including facts and figures on accreditation, degree requirements, application deadlines and contact information, financial support, faculty, and student body profiles. Two-page in-depth descriptions, written by featured institutions, offer complete details on specific graduate programs, schools, or departments as well as information on faculty research and the college or university. Expert advice on the admissions process, financial support, and accrediting agencies. Comprehensive directories list programs in this volume, as well as others in the graduate series. Up-to-date appendixes list institutional changes since the last addition along with abbreviations used in the guide

Considering Computer Contracting? Michael Powell,2016-06-06 Considering Computer Contracting?: The Computer Weekly Guide to Becoming a Freelance Computer Professional explores many aspects of the contracting world and attempts to give advice to both the newcomer and the experienced contractors in possible progressions in contracting. The book discusses the reasons why companies take on contract staff and what specific skills and skill levels do they require. The text covers aspects of contracting, from setting up through preparing presentation materials, interviewing, and gaining the first contract to management as a contractor. Some details of opportunities available and the expected rates are also considered. The book describes the relationship of a contractor with agencies and with clients, and the actual mechanism for working as a contractor. The text concludes by providing after-contracting opportunities. People contemplating on becoming a computer contractor and practicing computer contractors will find this book useful.

Prairie Habitat Joint Venture Habitat Monitoring Program, Phase I : Recent Habitat Trends in NAWMP Target Landscapes Michael Watmough,Canadian Wildlife Service. Prairie and Northern Region,2002

Scale Issues in Remote Sensing Qihao Weng,2014-01-21 Provides up-to-date developments in the field of remote sensing by assessing scale issues in land surface, properties, patterns, and processes Scale is a fundamental and crucial issue in remote sensing studies and image analysis. GIS and remote sensing scientists use various scaling techniques depending on the types of remotely sensed images and geospatial data used. Scaling techniques affect image analysis such as object identification and change detection. This book offers up-to-date developments, methods, and techniques in the field of GIS and remote sensing and features articles from internationally renowned authorities on three interrelated perspectives of scaling issues: scale in land surface properties, land surface patterns, and land surface processes. It also visits and reexamines the fundamental theories of scale and scaling by well-known experts who have done substantial research on the topics. Edited by a prominent authority in the geographic information science community, Scale Issues in Remote Sensing: Offers an extensive examination of the fundamental theories of scale issues along with current scaling techniques Studies scale issues from three interrelated perspectives: land surface properties, patterns, and processes Addresses the impact of new frontiers in Earth observation technology (high-resolution, hyperspectral, Lidar

sensing, and their synergy with existing technologies) and advances in remote sensing imaging science (object-oriented image analysis and data fusion) Prospects emerging and future trends in remote sensing and their relationship with scale Scale Issues in Remote Sensing is ideal as a professional reference for practicing geographic information scientists and remote sensing engineers as well as supplemental reading for graduate level students.

▣ *Energy Research Abstracts* ,1994 Semiannual, with semiannual and annual indexes. References to all scientific and technical literature coming from DOE, its laboratories, energy centers, and contractors. Includes all works deriving from DOE, other related government-sponsored information, and foreign nonnuclear information. Entry gives bibliographical information and abstract. Corporate, author, subject, report number indexes.

▣ *Environment Canada's Prairie & Northern Region Habitat Monitoring Program, Phase II* Michael D. Watmough,Martin J. Schmoll,Canadian Wildlife Service. Prairie and Northern Region,2007 This report presents results from the phase II Prairie Habitat Monitoring Program, which examined habitat change within the Prairie Habitat Joint Venture (PHJV) delivery area between 1985 and circa 2001. The program was designed to provide an evaluation of habitat trends throughout the PHJV delivery area and establish the foundation for a long-term habitat monitoring program.

▣ **Music, Technology, and Education** Andrew King,Evangelos Himonides,2016-06-10 The use of technology in music and education can no longer be described as a recent development. Music learners actively engage with technology in their music making, regardless of the opportunities afforded to them in formal settings. This volume draws together critical perspectives in three overarching areas in which technology is used to support music education: music production; game technology; musical creation, experience and understanding. The fourteen chapters reflect the emerging field of the study of technology in music from a pedagogical perspective. Contributions come not only from music pedagogues but also from musicologists, composers and performers working at the forefront of the domain. The authors examine pedagogical practice in the recording studio, how game technology relates to musical creation and expression, the use of technology to create and assess musical compositions, and how technology can foster learning within the field of Special Educational Needs (SEN). In addition, the use of technology in musical performance is examined, with a particular focus on the current trends and the ways it might be reshaped for use within performance practice. This book will be of value to educators, practitioners, musicologists, composers and performers, as well as to scholars with an interest in the critical study of how technology is used effectively in music and music education.

▣ **Innovating Professional Services** Alastair Ross,2016-03-09 Innovating Professional Services provides a practical and detailed guide for change agents and leaders in professional service firms who are seeking to transform their firm's performance through innovation. The book covers business innovation in its broadest sense as it is relevant to the professional services sector. This includes process innovation - the re-engineering of services and internal support processes to reduce cost and increase value to clients. It also includes the development of new services, market-position innovation and also business model innovation. Alastair Ross draws heavily on his practical experience in working with leading law firms and business service and consulting firms over the past ten years in which he and his firm have applied best practice techniques and methods to create measurable improvements. Detailed techniques such as the use of Lean, process mapping, waste identification, service experience mapping and value profiling are explained. The book also details effective approaches for making the required changes in professional service firms. Multiple case studies are used to help demonstrate the opportunities - and challenges - of driving major improvement through innovation. The book can be used by leaders and change agents in law firms, accountants, consultants, architects, financial services and engineering services, to explore the opportunities for innovation in their firms and then to construct and implement a transformation programme to embed innovation in their organisations.

▣ *Mathematical Models of Infectious Diseases and Social Issues* Shah, Nita H.,Mittal, Mandeep,2020-06-26 When deadly illness spreads through a population at a rapid pace, time may be of the essence in order to save lives. Using mathematics as a language to interpret assumptions concerning the biological and population mechanics, one can make predictions by analyzing actual epidemiological data using mathematical tests and results. Mathematical models can help us understand the right disease status and predict the effects of the disease on populations, which can help limit the spread and devastation of the illness. Mathematical Models of Infectious Diseases and Social Issues is a collection of innovative research that examines the dynamics of diseases and their effect on populations. Featuring coverage of a broad range of topics including deterministic models, environmental pollution, and social issues, this book is ideally designed for diagnosticians, clinicians, healthcare providers, pharmacists, government health officials, policymakers, academicians, researchers, and students.

ⓘ **Advances in Automation** Andrey A. Radionov,Alexander S. Karandaev,2020-02-18 This book reports on innovative research and developments in automation.The chapters spans a wide range of disciplines, including communication engineering, power engineering, control engineering, instrumentation,signal processing and cybersecurity. Emphasis is given to methods and findings aimed at fostering better control and monitoring of industrial and manufacturing processes, and improving safety. Based on the International Russian Automation Conference, held in September 8-14, 2019, in Sochi,Russia, the book provides academics and professionals with a timely overview and extensive information on the state of the art in the field of automation and control systems, and is expected to foster new idea, as well as collaboration between different groups in different countries.

Vorozhtsov,2006-11-30 This book constitutes the refereed proceedings of the 9th International Workshop on Computer Algebra in Scientific Computing, CASC 2006. The book presents 25 revised full papers together with 2 invited papers, covering various expanding applications of computer algebra to scientific computing, the computer algebra systems themselves, and the CA algorithms. Topics addressed are studies in Grⓘbner bases, polynomial algebra, homological algebra, quantifier elimination, celestial mechanics, and more.

ⓘ An Introduction to Undergraduate Research in Computational and Mathematical Biology Hannah Callender Highlander,Alex Capaldi,Carrie Diaz Eaton,2020-02-17 Speaking directly to the growing importance of research experience in undergraduate mathematics programs, this volume offers suggestions for undergraduate-appropriate research projects in mathematical and computational biology for students and their faculty mentors. The aim of each chapter is twofold: for faculty, to alleviate the challenges of identifying accessible topics and advising students through the research process; for students, to provide sufficient background, additional references, and context to excite students in these areas and to enable them to successfully undertake these problems in their research. Some of the topics discussed include: • Oscillatory behaviors present in real-world applications, from seasonal outbreaks of childhood diseases to action potentials in neurons • Simulating bacterial growth, competition, and resistance with agent-based models and laboratory experiments • Network structure and the dynamics of biological systems • Using neural networks to identify bird species from birdsong samples • Modeling fluid flow induced by the motion of pulmonary cilia Aimed at undergraduate mathematics faculty and advanced undergraduate students, this unique guide will be a valuable resource for generating fruitful research collaborations between students and faculty.

ⓘ **Correspondence Analysis** Eric J. Beh,Rosaria Lombardo,2014-09-04 A comprehensive overview of the internationalisation of correspondence analysis Correspondence Analysis: Theory, Practice and New Strategies examines the key issues of correspondence analysis, and discusses the new advances that have been made over the last 20 years. The main focus of this book is to provide a comprehensive discussion of some of the key technical and practical aspects of correspondence analysis, and to demonstrate how they may be put to use. Particular attention is given to the history and mathematical links of the developments made. These links include not just those major contributions made by researchers in Europe (which is where much of the attention surrounding correspondence analysis has focused) but also the important contributions made by researchers in other parts of the world. Key features include: A comprehensive international perspective on the key developments of correspondence analysis. Discussion of correspondence analysis for nominal and ordinal categorical data. Discussion of correspondence analysis of contingency tables with varying association structures (symmetric and non-symmetric relationship between two or more categorical variables). Extensive treatment of many of the members of the correspondence analysis family for two-way, three-way and multiple contingency tables. Correspondence Analysis offers a comprehensive and detailed overview of this topic which will be of value to academics, postgraduate students and researchers wanting a better understanding of correspondence analysis. Readers interested in the historical development, internationalisation and diverse applicability of correspondence analysis will also find much to enjoy in this book.

Embracing the Track of Appearance: An Mental Symphony within **Watmough Software**
