The Impossible City Karen Cheung,2022-02-15 A boldly rendered—and deeply intimate—account of Hong Kong today, from a resilient young woman whose stories explore what it means to survive in a city teeming with broken promises. “[A] pulsing debut . . . about what it means to find your place in a city as it vanishes before your eyes.”—The New York Times Book Review ONE OF THE MOST ANTICIPATED BOOKS OF 2022—Entertainment Weekly, PureWow Hong Kong is known as a place of extremes: a former colony of the United Kingdom that now exists at the margins of an ascendant China; a city rocked by mass protests, where residents rally—often in vain—against threats to their fundamental freedoms. But it is also misunderstood, and often romanticized. Drawing from her own experience reporting on the politics and culture of her hometown, as well as interviews with musicians, protesters, and writers who have watched their home transform, Karen Cheung gives us a rare insider’s view of this remarkable city at a pivotal moment—for Hong Kong and, ultimately, for herself. Born just before the handover to China in 1997, Cheung grew up questioning what version of Hong Kong she belonged to. Not quite at ease within the middle-class, cosmopolitan identity available to her at her English-speaking international school, she also resisted the conservative values of her deeply traditional, often dysfunctional family. Through vivid and character-rich stories, Cheung braids a dual narrative of her own coming of age alongside that of her generation. With heartbreaking candor, she recounts her yearslong struggle to find reliable mental health care in a city reeling from the traumatic aftermath of recent protests. Cheung also captures moments of miraculous triumph, documenting Hong Kong’s vibrant counterculture and taking us deep into its indie music and creative scenes. Inevitably, she brings us to the protests, where her understanding of what it means to belong to Hong Kong finally crystallized. An exhilarating blend of memoir and reportage, *The Impossible City* charts the parallel journeys of both a young woman and a city as they navigate the various, sometimes contradictory paths of coming into one’s own.

Firelight of a Different Colour Nigel Collett,2014 When Leslie Cheung Kwok-wing threw himself to his death from the terrace of Hong Kong's Mandarin Oriental Hotel in 2003, he was the greatest star of his generation in the city. A performer loved for his character as much as for his magic as an entertainer, his death sent shock waves across Asia and amongst Asian populations around the world. Despite the fact that he was openly gay, he was adored, and remains adored, by multitudes in societies where his sexual orientation remains a little-discussed taboo. *Firelight of a Different Colour* traces Leslie's story from birth in 1950s Hong Kong to his death during the city's crippling SARS epidemic. Through initial struggles to gain a foothold in TV and the nascent world of Cantopop, he achieved final success as a megastar of music and the big screen and held that position for nearly two decades. At the forefront of almost all the cultural changes Hong Kong saw during his lifetime, Leslie came to embody the unique spirit of the city. No Western performer can boast so widespread an influence across so many arts. *Firelight of a Different Colour* commemorates a life that continues to amaze and inspire.

Expanding Underrepresented Minority Participation Institute of Medicine, National Academy of Engineering, National Academy of Sciences, Policy and Global Affairs, Committee on Science, Engineering, and Public Policy, Committee on Underrepresented Groups and the Expansion of the Science and Engineering Workforce Pipeline, 2011-07-29 In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals, we must invest in research, encourage innovation, and grow a strong and talented science and technology workforce. *Expanding Underrepresented Minority Participation* explores the role of diversity in the science, technology, engineering and mathematics (STEM) workforce and its value in keeping America innovative and competitive. According to the book, the U.S. labor market is projected to grow faster in science and engineering than in any other sector in the coming years, making minority participation in STEM education at all levels a national priority. *Expanding Underrepresented Minority Participation* analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce. Although minorities are the fastest growing segment of the population, they are underrepresented in the fields of science and engineering. Historically, there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy. *Expanding Underrepresented Minority Participation* suggests that the federal government, industry, and post-secondary institutions work collaboratively with K-12 schools and school systems to increase minority access to and demand for post-secondary STEM education and technical training. The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of their education. It offers recommendations that focus on academic and social support, institutional roles, teacher preparation, affordability and program development.

Seattle City of Literature Ryan Boudinot, 2015 This bookish history of Seattle includes essays, history and personal stories from such literary luminaries as Frances McCue, Tom Robbins, Garth Stein, Rebecca Brown, Jonathan Evison, Tree Swenson, Jim Lynch, and Sonora Jha among many others. Timed with Seattle's bid to become the second US city to receive the UNESCO designation as a City of Literature, this deeply textured anthology pays homage to the literary riches of Seattle. Strongly grounded in place, funny, moving, and illuminating, it lends itself both to a close reading and to casual browsing, as it tells the story of books, reading, writing, and publishing in one of the nation's most literary cities.

Congress of Arts and Science: Physics. Chemistry. Astronomy. Sciences of the Earth Howard Jason Rogers, 1905

Advancing the Science of Climate Change National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, America's Climate Choices: Panel on Advancing the Science of Climate Change, 2011-01-10 Climate change is occurring, is caused largely by human activities, and poses significant risks for—and in many cases is already affecting—a broad range of human and natural systems. The compelling case for these conclusions is provided in *Advancing the Science of Climate Change*, part of a congressionally requested

suite of studies known as America's Climate Choices. While noting that there is always more to learn and that the scientific process is never closed, the book shows that hypotheses about climate change are supported by multiple lines of evidence and have stood firm in the face of serious debate and careful evaluation of alternative explanations. As decision makers respond to these risks, the nation's scientific enterprise can contribute through research that improves understanding of the causes and consequences of climate change and also is useful to decision makers at the local, regional, national, and international levels. The book identifies decisions being made in 12 sectors, ranging from agriculture to transportation, to identify decisions being made in response to climate change. Advancing the Science of Climate Change calls for a single federal entity or program to coordinate a national, multidisciplinary research effort aimed at improving both understanding and responses to climate change. Seven cross-cutting research themes are identified to support this scientific enterprise. In addition, leaders of federal climate research should redouble efforts to deploy a comprehensive climate observing system, improve climate models and other analytical tools, invest in human capital, and improve linkages between research and decisions by forming partnerships with action-oriented programs.

Children of Hawaii, 1999 Introduces the history, geography, and culture of the island of Hawaii through the daily lives of children who live there.

Die Free Cheryl Wills, 2011-01-03 When award-winning television news anchor Cheryl Wills discovers that her great-great-great grandfather, Sandy Wills, was a runaway slave who joined the historic fight for freedom in the American Civil War, she embarks on a gut-wrenching search to learn more. Cheryl's journey leads her to a courageous ancestor who demonstrated the same courage that she knew in her beloved father, an intrepid New York City firefighter, who died when she was thirteen. Her father never knew his family's notable legacy. Told with deep love and brow-raising honesty, *Die Free* stretches from Haywood County, Tennessee, in the 1860s to New York City in the twentieth century. Cheryl shares the unvarnished truth about the Wills' family roots, ever entwined in passion, music, and faith. Cheryl also exhumes the spirit of her great-great-great grandmother Emma Wills, an illiterate lionhearted widow, who was discriminated against as she fought to obtain her husband's Civil War pension and unwittingly dictated her historic life, from slavery to freedom, in sworn depositions to a lawyer. The century-old pension papers become the Holy Grail for the newscaster who nails a scoop that has forever changed her life and that of future generations. A lesson in the pruning of one's imagination, *Die Free* takes readers on a haunting yet exhilarating ride through the side door of American history.
