Security and Software for Cybercafes Adomi,
Esharenana E., 2008-04-30 Cybercafes, which are
places where Internet access is provided for free,
provide the opportunity for people without access
to the Internet, or who are traveling, to access
Web mail and instant messages, read newspapers,
and explore other resources of the Internet. Due
to the important role Internet cafes play in
facilitating access to information, there is a
need for their systems to have well-installed
software in order to ensure smooth service
delivery. Security and Software for Cybercafes
provides relevant theoretical frameworks and
current empirical research findings on the
security measures and software necessary for
cybercafes, offering information technology
professionals, scholars, researchers, and
educators detailed knowledge and understanding of
this innovative and leading-edge issue, both in
industrialized and developing countries.
